Steele,2017-03-20 This revealing work examines an approach from ancient astronomy to what was then a particularly important question namely that of understanding the relationship between the position in the ecliptic and the time it takes for a fixed length of the ecliptic beginning at that point to rise above the eastern horizon Schemes known as rising time schemes were used to give lengths of the celestial equator corresponding to each of the twelve zodiacal signs which make up the ecliptic This book investigates the earliest known examples of these schemes which come from Babylonia and date to the mid to late first millennium BC Making an important contribution to our knowledge of astronomy in the ancient world this volume includes editions and translations of all of the known Babylonian rising time texts including several texts that are identified for the first time Through a close examination of the preserved texts it has been possible to reconstruct the complete Babylonian rising time scheme This reconstruction is unprecedented in its completeness and it is also now possible to situate the scheme within a genre of Babylonian astronomy known as schematic astronomy which presents theoretical descriptions of the astronomical phenomena The unique discoveries and fresh explorations in this book will be of interest to historians of ancient astronomy scholars of Babylonian history and those investigating the origins of scientific thought **Exploring the World of Physics** John Hudson Tiner,2006-05-01 Physics is a branch of science that many people consider to be too complicated to understand In this exciting addition to the Exploring series John Hudson Tiner puts this myth to rest as he explains the fascinating world of physics in a way that students from elementary to high school can comprehend Did you know that a feather and a lump of lead will fall at the same rate in a vacuum Learn about the history of physics from Aristotle to Galileo to Isaac Newton to the latest advances Discover how the laws of motion and gravity affect everything from the normal activities of everyday life to launching rockets into space Learn about the effects of inertia

firsthand during fun and informative experiments Exploring the World of Physics is a great tool for students of all ages who want to have a deeper understanding of the important and interesting ways that physics affects our lives and is complete with illustrations chapter questions and an index World Building in Spanish and English Spoken Narratives Jane Lugea, 2016-06-16 Text World Theory is a powerful framework for discourse analysis that thus far has only been used in monolingual Anglophone stylistic analyses This work adapts Text World Theory for the analysis of Spanish discourse and in doing so suggests some improvements to the way in which it deals with discourse in particular with direct speech and conditional expressions Furthermore it applies Text World Theory in a novel way searching not for style in language but for the style of a language Focusing principally on deixis and modality the author examines whether Spanish speakers and English speakers construct the narrative text world in any patterned ways To do so the frog story methodology is employed eliciting spoken narratives from native adult speakers of both languages by means of a children's picture book These narratives are transcribed and subjected to a qualitative text world analysis which is supported with a quantitative corpus analysis The results reveal contrasts in Spanish and English speakers use of modality and deixis in building the same narrative text world and are relevant to scholars working in language typology cross cultural pragmatics and translation studies These novel applications of the Text World Theory push the boundaries of stylistics in new directions broadening the focus from monolingual texts to languages at large **Patient-Centered Care in Sports Medicine** René Revis Shingles, Lorin A. Cartwright, 2025-09-18 Patient Centered Care in Sports Medicine helps students achieve competency in patient centered care The text offers strategies to advocate engage and communicate with patients from varying social backgrounds and it includes self assessment tools practical forms and cultural background information **The Nautical Almanac for the Year ...** , 2006 Time in Antiquity Robert Hannah, 2008-11-26 Time in Antiquity offers a detailed survey of the science of time and its measurement in the Greek and Roman worlds including Babylon and Egypt where many of the first advances were made Robert Hannah focuses on the physical aspects of time measurement locating the means of measurement and the astronomers who developed these mechanisms within their scientific context for the first time This is a unique contribution to the understanding of the ancient world and its thinking and is of interest to classicists historians of the ancient world and of science philosophers and anthropologists
