Despite providing energy that runs the country the region is still forced to the political and economic periphery as the power they produce is controlled by centralized international Spanish corporations Local resistance to wind farm installation in Southern Catalonia relies on the notion of dignity the ability to live within one's means and according to one's own decisions Power Struggles shows how without careful attention renewable energy production can reinforce patterns of exploitation even as it promises a fair and hopeful future **Identity, Territories, and Sustainability** Salvatore Monaco, 2024-07-12 Addressing the urgent need to tackle the global challenges of poverty inequality and environmental degradation this is highly valuable reading for those interested in implementing sustainable development strategies across a variety of contexts
