Testing a Nuclear Test Ban David A. Koplow, 1996 This work studies the issue of scope regarding a ban to nuclear testing It focuses on dilemmas such as exactly what should be banned what activities should be tolerated and how a treaty should deal with other problematic events *Defending the Arsenal* Adam B. Lowther, Stephen J. Cimbala, 2016-09-19 One important area of interest within military and policy circles focuses on an effort to revitalize the nuclear triad amidst a number of competing strategic interests The difficulties arising from US engagement in Iraq and Afghanistan are leading many scholars and policy makers to question whether a reinvigorated nuclear triad has any role in deterring modern adversaries This volume takes an unashamed pro nuclear modernization position and argues for designing and fielding new nuclear warheads and delivery systems submarine ICBM and bomber while also arguing against signing the Comprehensive Test Ban Treaty or agreeing to further reductions in the nuclear arsenal It also argues that nuclear deterrence remains as relevant today perhaps more than it was during the Cold War With so many authors advocating for Global Zero and highlighting perceived dangers from a nuclear arsenal this work stands in stark contrast to the chorus of anti arsenal works Because of the work s structure and effort to answer questions of current relevance it should appeal to a broad audience including service staffs PME students COCOM staffs Pentagon personnel Capitol Hill staffers policy makers academics graduate students and interested readers **Documents on Disarmament** United States. Goldanskii, 2012-12-06 After many years of sterile arms control negotiations between the super powers which did not produce a single genuine disarmament measure and sometimes had the opposite effect of stimulating the development of new weapons to serve as bargaining chips an agreement to abolish completely two categories of nuclear weapons the INF Treaty was signed and is now being implemented This historical event the first actual destruction of deployed nuclear missiles although not of their warheads became possible largely because of the radical changes in the policies of the Soviet Union the new way of thinking advanced by its leader Mikhail Gorbachev The relaxation of tension that resulted from this policy was one of the factors contributing to the successful conclusion of the INF Treaty Another no less important factor was the acceptance by the Soviet Union of on site inspections as a basic element of a verification system essential to ensure compliance with the Treaty This breakthrough led to the mutual acceptance of an elaborate and precise verification regime and thus made possible the signing of the INF Treaty which in turn contributed to the further lessening of tension between East and West But perhaps the most important factor one which carries much promise for the future was the changed approach to security problems *Research Handbook on International Arms Control Law* Eric P.J. Myjer, Thilo Marauhn, 2022-12-06 This Research Handbook provides a broad yet detailed treatment of international arms control law It takes stock of existing arms control agreements addresses current challenges and aims to indicate avenues for the future development of this distinct branch of public international law **Bulletin of the Atomic Scientists**, 1996-01 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world *Yearbook of the United Nations, Volume 41 (1987)* United Nations, 2023-11-27 Issued annually since 1946 47 the Yearbook is the principal reference work of the United Nations
