

Eras of Testing

Years	Era	Description
1945-1956	Debugging orientated	In this era, there was no clear difference between testing and debugging.
1957-1978	Demonstration orientated	In this era, debugging and testing are distinguished now - in this period it was shown, that software satisfies the requirements.
1979-1982	Destruction orientated	In this era, the goal was to find errors.
1983-1987	Evaluation orientated	In this era, the intention here is that during the software lifecycle a product evaluation is provided and measuring quality.
1988-	Prevention orientated	In the current era, tests are used to demonstrate that software satisfies its specification, to detect faults and to prevent faults.
