Teun Hoekstra Arguments And Structure Studies On The Architecture Of The Sentence:

Arguments and Structure Teun Hoekstra, R. P. E. Sybesma, 2004 Review text this collection of Hoekstra's writing seems not only interesting but also useful reading for contemporary researchers since both the problems and ideas discussed in this volume are very far from being outdated Pavel Grashchenkov in *Linguist List* 16 2534 **Arguments and Structure** Teun Hoekstra, 2008-08-22 This book contains 14 articles by Teun Hoekstra 1953 1998 on core issues in syntactic theory Some articles focus on the structure of DP others on the structure of the sentence as a whole while others still deal explicitly with the parallels between the two The papers are distributed over four sections Argument structure T chains The morpho syntax of verbal and nominal projections and Small clauses More than half of the articles in this book are published here for the first time or appear for the first time in English Hoekstra's work is characterized by a fundamental interest in the central questions of syntactic theory most notably the relation between argument structure and X bar structure This concentrated interest led to a deep understanding of the notion of transitivity with respect to both the status of the external argument and that of the internal argument where status refers to both the content and the licensing In this collection of papers Hoekstra reports on his insights in these matters As far as content and licensing of the external argument is concerned this collection contains papers on the relation between passives and their active counterparts the parallels between possessives and transitives and the differences and similarities between past participles and infinitives As to the internal argument we find papers addressing sentential complementation verbal affixation and resultatives And there is a whole section on tense and its role in keeping the sentence together One of the papers in this collection is Hoekstra's classic but hitherto unpublished Small clauses everywhere more than 70 pages which summarizes Hoekstra's views on such issues as resultatives particle verbs and double object constructions Romance Linguistics 2006 José Camacho, Nydia Flores-Ferrán, Liliana Sánchez, Viviane Déprez, María José Cabrera, 2007-11-21 This volume presents selected papers from the 36th LSRL conference held at Rutgers University in 2006 It contains twenty two articles of current approaches to the study of Romance linguistics Well known researchers present their findings in areas such as of syntax and semantics phonology psycholinguistics sociolinguistics The volume contains scholarly research in areas such as parenthetical null topic construction expletives number and language change performative verbs in colonial court Spanish aspect shift palatalization in Romanian melodic contours in Majorcan Catalan variation in verb type and position and deviance in early child bilingualism among many others It is a well rounded selection of research topics that will enrich and widen our understanding of Romance languages **Syntax of Dutch** Hans Broekhuis, Norbert Corver, 2025-10-01 The Syntax of Dutch aims at presenting a synthesis of the currently available syntactic knowledge of Dutch It is primarily concerned with language description and not with linguistic theory and provides support to all researchers interested in matters relating to the syntax of Dutch including advanced students of language and linguistics Syntax of Dutch Verbs and Verb Phrases consists of three volumes Volume 1 opens with a general introduction to

verbs including a review of various verb classifications and discussions on inflection tense mood modality and aspect This is followed by a comprehensive discussion of complementation argument structure and verb frame alternations Volume 2 continues the discussion of complementation but is more specifically focused on clausal complements the reader will find detailed discussions of finite and infinitival argument clauses complex verb constructions and verb clustering Volume 3 concludes with a description of adverbial modification and the overall structure of clauses in relation to e g word order verb placement wh movement extraposition phenomena scrambling etc

The Wiley Blackwell Companion to Syntax, 8 Volume Set Martin Everaert, Henk Van Riemsdijk, 2017-12-26 An invaluable reference tool for students and researchers in theoretical linguistics The Wiley Blackwell Companion to Syntax Second Edition has been updated to incorporate the last 10 years of syntactic research and expanded to include a wider array of important case studies in the syntax of a broad array of languages A revised and expanded edition of this invaluable reference tool for students and researchers in linguistics now incorporating the last 10 years of syntactic research Contains over 120 chapters that explain analyze and contextualize important empirical studies within syntax over the last 50 years Charts the development and historiography of syntactic theory with coverage of the most important subdomains of syntax Brings together cutting edge contributions from a global group of linguists under the editorship of two esteemed syntacticians Provides an essential and unparalleled collection of research within the field of syntax available both online and across 8 print volumes This work is also available as an online resource at www.companiontosyntax.com

Syntax of Dutch: Adjectives and Adjective Phrases Hans Broekhuis, 2025-10-01 The Syntax of Dutch will be published in at least seven volumes in the period 2012 2016 and aims at presenting a synthesis of the currently available syntactic knowledge of Dutch It is primarily concerned with language description and not with linguistic theory and provides support to all researchers interested in matters relating to the syntax of Dutch including advanced students of language and linguistics The volume Adjectives and Adjective Phrases discusses the internal make up as well as the distribution of adjective phrases Topics that will be covered include complementation and modification of adjective phrases comparative and superlative formation the attributive predicative and adverbial uses of adjective phrases Special attention is paid to the so called partitive genitive construction and the adverbial use of past passive participles and infinitives

The Syntax of Dutch Jan-Wouter Zwart, 2011-09-15 Dutch is a West Germanic language closely related to English and German but its special properties have long aroused interest and debate among students of syntax This is an informative guide to the syntax of Dutch offering an extensive survey of both the phenomena of Dutch syntax and their theoretical analyses over the years In particular the book discusses those aspects of Dutch syntax that have played an important role in the development of syntactic theory in recent decades Presupposing only a basic knowledge of syntax and complete with an extensive bibliography this survey will be an important tool for students and linguists of all theoretical persuasions and for anyone working in Germanic linguistics linguistic typology and linguistic theory

Dependency and Directionality Marcel den Dikken, 2018-07-05 The direction in which the structure of sentences and filler gap dependencies are built is a topic of fundamental importance to linguistic theory and its applications This book develops an integrated understanding of structure building movement and locality embedded in a syntactic theory that argues for a top down approach presenting an explicit counterweight to the bottom up derivations pervading the Chomskian mainstream It combines a compact and comprehensive historical perspective on structure building the cycle and movement with detailed discussions of island effects the typology of long distance filler gap dependencies and the special problems posed by the subject in clausal syntax Providing introductions to the main issues reviewing extant arguments for bottom up and top down approaches and presenting several case studies in its development of a new theory this book should be of interest to all students and scholars of language interested in syntactic structures and the dependencies inside them **Subordination in**

English Elena Seoane, Carlos Acuña-Fariña, Ignacio Palacios-Martínez, 2018-07-09 This book provides a collection of articles on subordination in English framed from both a synchronic and a diachronic perspective It covers ample areas of the history of the major subordinated structures of English and their recent development in various native and non native varieties Most contributions are based on large electronic databases and corpora of written and spoken texts The book focuses on the continuum that links subordinated and coordinated structures in a fluid way shows their permanent state of flux and sheds light on the whole system's dynamic essence by discussing a large number of explanatory principles at work in shaping it Many of these are well known from the grammaticalization and the Construction Grammar theories such as the concepts of attractor multi sourcing inheritance categorial incursion metaphorization or exaptation This volume represents the latest trends in the field by some of its most prestigious specialists *Nonfinite Inquiries* Alain Rouveret, 2023-03-06 This study

aims at developing a unified perspective on nonfiniteness encompassing its morphological syntactic and semantic aspects It puts the emphasis on clause types distinct from standard infinitives gerund clauses Celtic verbo nominal structures Portuguese inflected infinitives Latin dominant participle constructions and takes advantage of the most recent developments in syntactic theory The notions of defectiveness and completeness the inheritance hypothesis the labeling requirement the syntactic definition of lexical categories once combined together appear to make accessible tighter and more elegant analyses than previous accounts *The Underspecification of Past Participles* Dennis Wegner, 2019-02-19 Are the past

participial forms that occur in passive and perfect periphrases substantially identical or should they rather be distinguished into accidentally homophonous passive and perfective participles This book discusses the long standing mystery of past participial non identity on the basis of a broad range of synchronic data from Germanic and Romance eventually focussing on German and English as these draw the most relevant distinctions e.g auxiliary alternation a passive auxiliary that is not BE Together with some contrastive insights from Slavic as well as the diachrony of passive and perfect periphrases this clearly points to an identity view The novel approach that is laid out suggests that past participles conflate diathetic and aspectual

properties The former cause the suppression of an external argument whereas the latter impose event structure sensitive perfectivity which only induces the completion of a situation if the underlying eventuality denotes a simple change of state An approach along these lines sheds light on the intricate properties of past participles and the auxiliaries they occur with the determinants of auxiliary selection as well as the interplay of argument and event structure

The Non-verbal Type of Small Clauses in English and Lithuanian Judita Giparaite, 2009-12-14 The study *The Non verbal Type of Small Clauses in English and Lithuanian* is one of the first attempts to apply the methods of generative grammar to the analysis of a fragment of Lithuanian grammar i e constructions with secondary predicates of the type V NP1 NP2 and V NP1 AP the sub strings NP1 NP2 and NP1 AP of which in generative works are usually called small clauses The investigation is contrastive the evidence of Lithuanian is compared with that of English Whereas the syntactic study of secondary predicates in English has a certain tradition traditional Lithuanian grammar does not have a single notion to what is known elsewhere as secondary predicates In Lithuanian traditional grammar secondary predicates are usually referred to as a part of compound nominal predicates predicative attributes a part of complex objects and are not singled out as a distinct category but are given different often contradictory treatments Thus the research can be considered pioneering work as far as Lithuanian is concerned It not only contributes to the theoretical discussion about the adequate way of dealing with secondary predicates in Government and Binding framework but can also be considered instrumental in propagating modern methods of syntactic analysis in tradition ridden Lithuanian grammar The present work addresses an important problem whether the Lithuanian and English constructions under investigation express a subject predicate relationship and form a constituent and can be described as having the syntactic function of a clause For this purpose the syntactic and semantic as well as clausal properties of the sequences NP1 NP2 and NP1 AP in the two languages under consideration are discussed The clausal properties of the sub strings NP1 NP2 and NP1 AP are investigated on the basis of the presence of agreement features sentence negation the resemblance to full clauses theta role assignment word order and applying sentence constituency tests

Relators and Linkers Marcel den Dikken, 2006 Presents a syntax of predication and Predicate Inversion that emphasizes meaningless elements called RELATORS and LINKERS that play an essential role in the establishment and syntactic manipulation of predication relationships

The Syntax of Compound Tenses in Slavic Krzysztof Marek Migdalski, 2006

Spanish Clitics on the Move Elisabeth Mayer, 2017-04-10 This volume explores the complex relationship between primary agreement by means of object marking or differential object marking DOM and secondary agreement through clitics in non standardized variation data from Lime o Spanish contact varieties LSCV As such it is concerned with diachronic as well as synchronic morphosyntactic variation of the third person object pronoun paradigm so called clitics as used in Standard Spanish and non standardized Spanish contact dialects The argumentation as well as the data presented cross diachronic and synchronic boundaries

"Haben" als Vollverb

Martin Businger, 2011 In dieser Studie wird sorgfältig begründet, dass Konstruktionen von haben als Vollverb in der syntaktischen Analyse systematisch in Beziehung zu absoluten mit Konstruktionen vgl. Mit den F'en auf dem Tisch erwartete ich meine Schwiegereltern zu setzen sind. Auf dieser Grundlage erweist sich eine einheitliche Modellierung der unterschiedlichen syntaktischen Verwendungsweisen von haben als Vollverb als theoretisch wie empirisch angemessen. In weiterer Perspektive bietet die Arbeit Evidenz für die Annahme, dass für die Beschreibung von Phänomenen an der Syntax-Semantik-Schnittstelle auf das Konzept verletzbarer Beschränkungen im Sinne der Optimalitätstheorie zurückzugreifen ist. Ein Ergebnis in Bezug auf die Syntax und Semantik von Adjektiven ist, dass syntaktisch die attributive Realisierung als unmarkiert zu gelten hat, semantisch jedoch die Interpretation von Adjektiven als Prädikate nicht als Attribute präferiert ist.
