Vose, Kier D. Klepzig, 2013-12-05 Forest land managers face the challenges of preparing their forests for the impacts of climate change. However, climate change adds a new dimension to the task of developing and testing science-based management options to deal with the effects of stressors on forest ecosystems in the southern United States. The large spatial scale and complex inter

**Homeowners and the Resilient City** Thomas Thaler, Thomas Hartmann, Lenka Slavíková, Barbara Tempels, 2023-01-01 This book provides an important overview of how climate-driven natural hazards like river or pluvial floods, droughts, heat waves, or forest fires continue to play a central role across the globe in the 21st century. Urban resilience has become an important term in response to climate change. Resilience describes the ability of a system to absorb shocks and depends on the vulnerability and recovery time of a system. A shock affects a system to the extent that it becomes vulnerable to the event. This book focuses on examining how private property owners might implement such measures or improve their individual coping and adaptive capacity to respond to future events. The book looks at the existence of various planning, legal, financial incentives, and psychological factors designed to encourage individuals to take an active role in natural hazard risk management and through the presentation of theoretical discussions and empirical cases shows how urban resilience can be achieved. In addition, the book guides the reader through different conceptual frameworks by showing how urban regions are trying to reach urban resilience on privately owned land. Each chapter focuses on different cultural, socio-economic, and political backgrounds to demonstrate how different institutional frameworks have an impact.      Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations for Fiscal Year 2008 United States.
