*Education for Childbirth and Parenthood* Elizabeth R. Perkins,2017-12-15 Originally published in 1980 the setting of this book is in the practicalities of teaching on labour wards in antenatal clinics and in child health clinics In such settings health education about childbirth and parenthood is often an explicit and always implicit task for the health professional The book results from several years research on health service teaching methods and contains detailed studies of teaching in practice in clinics in classes and on wards by midwives health visitors physiotherapists doctors National Childbirth Trust teachers and the writers of educational pamphlets A number of transcripts of teaching sessions are presented to illustrate ways in which practitioners can develop more relevant and sensitive teaching strategies The author shows that realistic goals are essential if the needs of learners who are also problematically patients and clients are to be met The book offers insights into professional problems which voluntary organisations concerned with the health service and with educational work with parents can use to help both themselves and their clients to make a more intelligent use of the facilities available A more practical but critical philosophy of antenatal teaching is advocated enabling all professionals involved to take a fresh look at their courses and clients

**Midwifery & Childbirth** J. Pence, Childbirth is both a profound experience and a contested subject The experience of women has complex medical historical cultural and public policy dimensions In this book Judith Rooks achieves the rare feat of bringing these dimensions together in a way that can be appreciated by health care planners midwives physicians and women considering pregnancy The author vividly describes the history of struggle among health care providers over the meaning and handling of the birth process The medical model and the midwifery model continue to collide today the former focusing on pathology and monitoring the patient for it the latter focusing on birth as a normal healthy process The education and professional training of those who care for women during pregnancy childbirth and the important postpartum period reflects these divisions Obstetrics family physicians midwives nurses and others play roles in providing the necessary care In focusing on midwives Rooks deals fairly and sensitively between certified nurse midwives and direct entry midwives most of whom lack formal educational preparation in midwifery This book describes clearly and with documented scientific evidence the specific benefits of the midwifery approach to the care of pregnant women and their families In clear language accessible to the lay reader Rooks summarizes the research on the unintended effects of obstetrical interventions such as episiotomies epidurals C sections and continuous electronic fetal

heart monitoring and the effectiveness and important benefits of an approach that focuses on the positive potential of childbearing as contrasted with a narrow focus of potential for pathology While she acknowledges the importance of access to medical care extensive research shows the advantages of the midwifery approach Much that passes for routine obstetric care in the United States has been found to be unnecessary ineffective or even harmful when applied to women with normal pregnancies The arguments over the control of childbirth are set in the context of recent changes in health care including the current transition to managed care the impact of the women s movement and movements for natural childbirth home birth and breastfeeding and women s fear of and concern about the pain associated with labor Rooks also explains the influence of the reports and recommendations of prestigious scientific and health policy commissions and of federal initiatives and programs on the care provided to pregnant women in this country She contrasts U S practices with those of comparable industrialized countries like the European states Canada Australia New Zealand and Japan

Everything you need to know when carrying a child.** O.Nashchubskiy, There is nothing more magical in this world than the moment when life begins its new story This is the moment when a small miracle awakens in the arms of mother and father and the whole world reveals its miracles in new colors Like the pages of a magic book the life of a pregnant woman is filled with mysteries and surprises Every moment is a chapter every movement is an art and the beating of a small heart is a magic that cannot be described in words This book is the key to this magical book of life She invites you on a journey full of mystery and wonder into a world where the smallest touches become the most important This is a journey into the world of motherhood and fatherhood where every day is a new chapter every minute is an encounter with magic Here you will find stories about how dreams and hopes are born about how love and happiness are born This book is a colorful picture of life where every color every note is part of this magical symphony Let's open the first page of this magical book together and go on an incredible

journey where every moment is filled with the magic of a New Life In this world where every step leads to a new beginning and every beginning carries with it the eternal circle of life conceiving a child is one of the most magical and mysterious moments It is like a quiet whisper of nature a promise of new life gently emerging in the secret depths of existence This act of creating new life is the moment when love transcends the visible and becomes a force that can change the world Conceiving a child is not just a biological process it is an act of love and hope This is the moment when two hearts work together to create a miracle giving the world a new soul This is the beginning of a journey full of excitement joy sometimes fear and uncertainty but always full of love And then comes the moment of birth a solemn and magical event when new life meets the light for the first time This is the moment when time stops and the entire universe seems concentrated in this small creature that lies so helplessly in the arms of its mother The birth of a child is the fulfillment of the meaning of life the embodiment of love and hope that were inherent at the moment of conception With this event comes a new responsibility responsibility for a new life for this little miracle which now depends on its parents This is a responsibility not only for the physical well being of the child but also for his emotional and spiritual development Parents become the first teachers the first mentors and the first support in this world for their child And of course with the birth of a child comes incredible love love that knows no boundaries knows no fatigue and knows no fear This is love that is stronger than anything in the world love that is capable of the greatest sacrifices and deeds This is love that stays with parents for life grows and develops with the child Conceiving and giving birth to a child are not just natural stages of life they are sacred acts full of deep meaning and grandeur They remind us of the miracle of life the power of love and how important it is to cherish every moment spent with our children This is a journey that changes us makes us better wiser and happier In a world where every breath and every step carries the invisible magic of the beginning the psychological education of a child starting from the moment of conception and especially in the first year of life is one of the most significant and subtle threads with which we adults weave the fabric of the future From the moment of conception when new life barely begins to pulsate in the womb it already absorbs the essence of the surrounding world through the senses of the mother The emotional state thoughts sensations of the mother become the first colors with which she perhaps unknown paints the first images in the mind of her child Love calm and harmony surrounding the mother become the basis for the development of a sense of security in the child When a baby is born his psychological development takes on a new round Every touch every look every word of the parents is imprinted in the child's tender memory forming his ideas about the world about himself and about those who surround him In the first year of life when the baby cannot yet speak he actively learns to understand the world through emotions and tactile sensations This is the time when the foundation of trust in the world is laid through the warmth of hands the tenderness of hugs and the confidence that parents are always there Mom's smile dad's gentle voice their calmness and confidence are transmitted to the baby giving him a feeling of security and anticipation of good things The importance of psychological

education during this period cannot be overestimated This is the time when the foundations of self esteem adaptability and first social skills are laid Parents are the first teachers and mentors through whom the child learns to understand himself and others learns to feel and express his emotions The love and attention respect and understanding that a child receives in the first year of his life become the cornerstone of his psychological health and well being for the rest of his life This is the foundation on which all his future relationships his self confidence and his ability to face difficulties will be built Thus psychological education begins long before the first word the first step it begins with the first heartbeat in the womb and continues with every moment of the first year of life It is a mysterious and majestic task to fill this world with love raising a new soul that will one day make it a better place

**Birthing from Within** Pam England, Rob Horowitz, 1998 Here is a holistic approach to childbirth that examines this profound rite of passage not as a medical event but as an act of self discovery Exercises and activities such as journal writing meditation and painting will help mothers analyze their thoughts and face their fears during pregnancy For use during birth the book offers proven techniques for coping with labor pain without drugs a discussion of the doctor or midwife s role and a look at the father s responsibilities Childbirth education should also include what to expect after the baby is born Here are baby basics such as how to bathe a newborn how to get the little one to sleep and tips for getting nursing off to a good start Pregnancy birth and postpartum is a process of continuous learning and adjustment Birthing From Within provides the necessary support and education to make each phase of birthing a rewarding experience

**The Dance of Teaching Childbirth Education** Julie Jensen PhD, Connie Livingston, 2018-03-07 The Dance of Teaching Childbirth Education will hold a special place in the hearts of so many people This was the last book that Connie Livingston collaborated on before her sudden passing in 2016 Julie Jensen has done an outstanding job of taking the vision they both held and making it happen This book is an excellent resource for new educators It really walks the reader through the process of creating a class The authors were able to incorporate pitfalls of many educators with solutions and ways to keep up with the world as it is today As a seasoned educator I found it to be an easy read and a great reminder of the how s and why s of teaching The book should be an essential for any childbirth educator s library Elizabeth Smith MPH ICCE IBCLC RLC The Dance of Teaching Childbirth Education is a comprehensive book for childbirth educators and other perinatal practitioners that contains the practical essentials and insights in all areas of this wonderful field Your journey is a dance of coordinating many moves to meet your needs and those of your learners This book teaches you to incorporate evidence based practices and create a curriculum to help you empower your participants and yourself It is a cutting edge guide that contains and demonstrates unique practical areas that are not ordinarily included in most instructional guides for educators Some topics covered in this book include Detailed evidence based comfort strategies and an easy to use reference list Unique approaches and considerations to effectively reach adult learners Appendix of handouts lists and charts referenced throughout the book Strategies major topics and class details for your curriculum Self

reflective activities for the educator to enhance teaching Guidelines for hospital based and private teaching settings Specific strategies for the often overlooked second stage Self care techniques for the educator
