## **Textbook Of Ethics In Pediatric Research:**

**Textbook of Ethics in Pediatric Research** Gideon Koren, 1993 This work covers various aspects of the research ethics area involving fetuses infants and children It discusses issues associated with conducting medical research including consent and assent definitions of risk and benefit and a variety of specific paediatric problems The Oxford Textbook of Clinical Research Ethics Ezekiel J. Emanuel, Christine C. Grady, Robert A. Crouch, Reidar K. Lie, Franklin G. Miller, David D. Wendler, 2011-02 The Oxford Textbook of Clinical Research Ethics is the first comprehensive and systematic reference on clinical research ethics Under the editorship of experts from the U S National Institutes of Health of the United States the book s 73 chapters offer a wide ranging and systematic examination of all aspects of research with human beings Considering the historical triumphs of research as well as its tragedies the textbook provides a framework for analyzing the ethical aspects of research studies with human beings Through both conceptual analysis and systematic reviews of empirical data the contributors examine issues ranging from scientific validity fair subject selection risk benefit ratio independent review and informed consent to focused consideration of international research ethics conflicts of interests and other aspects of responsible conduct of research The editors of The Oxford Textbook of Clinical Research Ethics offer a work that critically assesses and advances scholarship in the field of human subjects research Comprehensive in scope and depth this book will be a crucial resource for researchers in the medical sciences as well as teachers and students **Ethical Issues in Mental Health Research With Children and Adolescents** Kimberly Hoagwood, Peter S. Jensen, Celia B. Fisher, 2014-06-03 Studies involving children with mental emotional or behavioral problems or their families have to meet certain standards of research ethics This book contains chapters on the kinds of ethical dilemmas that typically occur in different types of studies of children and then presents 65 real world cases from experts who study children s mental health These experts offer practical suggestions for how to handle these dilemmas Chapters on the perspectives of parents regulators and bioethicists provide additional points of view on these issues Written in down to earth language this book will be useful for professionals who study children for those who train students in research methods and for parents who are thinking about participating in research studies In attempting to bridge the apparent gap between ethics and science the editors close this volume on a note commonly sounded by researchers more research is needed Yet in this area a new kind of research is required The science of scientific ethics must be developed and expanded and better understanding of the determinants and circumstances under which children can comprehend and evaluate risks and benefits is needed Likewise fuller knowledge of the contextual factors affecting children s and families consent to participate in research is essential In particular development of scales to assess children s ability to comprehend risk benefit issues studies of families reactions to research procedures and empirical data on the impact of various forms of participant reimbursement will advance both science and ethics This volume should spur further research serving as a guide for current investigators participating families institutional review boards and

policymakers who shape the research enterprise      **The Olivieri Report** Jon Thompson, Patricia Baird, Jocelyn Downie, 2001-10-30 In 1996 Dr Nancy Olivieri identified an unexpected risk associated with a drug she was testing to treat a rare blood disorder When she moved to inform patients of this risk as required by medical ethics the drug manufacturer Apotex terminated the research trial and threatened to take legal action This was the opening salvo in a long contest involving Olivieri Apotex Toronto's Hospital for Sick Children and the University of Toronto Olivieri expected to receive support on the ethical issue from the hospital and the university but neither institution provided effective support against ongoing legal harassment by Apotex Intense media coverage followed the case from beginning to end The Olivieri Report is the report of an independent inquiry commissioned by the Canadian Association of University Teachers into the case conducted by three widely respected Canadian academics      The Ethics of Pediatric Research David Wendler, 2010-03 Background Evaluating the worry Proposed justifications Human interests and human causes Our connection to our contribution The value of passive contributions Implications Objections and the potential for abuse      *Clinical Ethics in Pediatrics* Douglas S.
