The Sacred and its Scholars Idinopulos, Yonan, 1996-10-01 This volume of essays is devoted to a careful examination of the importance of methodology in the study of primary religious data. The essays focus on the Sacred as an ultimate object of descriptive analysis and critical scrutiny on the part of a select number of North American and European methodologists in the study and teaching of the history of religions and its allied disciplines. The central question to which the contributors respond are these: What is the Sacred? Is it a being or a concept of a being? Is it a mental state or an objective reality or something else entirely? Can the Sacred be described as an empirical fact or as a formal rule for religious inquiry? If the Sacred is a valid category in the study and teaching of religion, then what can be said about the antithesis of the sacred, namely the profane or the secular? This volume probes these questions with great care in order to justify a number of ways the Sacred can be construed as an indispensable notion for the study and teaching of religion.

The Sacred Network Chris H. Hardy, 2011-02-23 How sacred sites amplify the energies of consciousness, the earth, and the universe. Examines the web of geometrical patterns linking sacred sites worldwide with special focus on the sacred network of ley lines in Paris. Unveils the coming state of shared consciousness for humanity fueled by the sacred network. Reveals how consciousness is a tangible form of energy. First marked by the standing stones of our megalithic ancestors, the world's sacred sites are not only places of spiritual energy but also hubs of cosmic energy and earthly energy. Generation upon generation has recognized the power of these sites with the result that each dominant culture builds their religious structures on the same spots. The Cathedral of Notre Dame in Paris, for example, was constructed over a Temple to Diana that in turn had been built over a stone pillar worshipped by the Gauls. In *The Sacred Network*, Chris Hardy shows how the world's sacred sites coincide with the intersections of energetic waves from the earth's geomagnetic field and how, via their megaliths, temples, and steeples, these sites act as antennae for the energies of the cosmos. Delving deeply into Paris's sacred network, she also explores the intricate geometrical patterns created by the alignments of churches and monuments such as pentagrams and Stars of David. Revealing that consciousness is a tangible energy, she explains how the sacred network is fueling an 8,000-year evolutionary cycle initiated by our megalithic ancestors that will soon culminate in a new state of shared consciousness for humanity.

Each chapter includes case studies and methods for working in practical ways with children, explaining what may trigger nightmares for children and how monster dreams can be guided to become superhero dreams. deepening polarization in the United States *Flyover Fictions* is an exploration of the trope's current politicization historical contexts and general proliferation of meanings Instead of resolving the ambiguities inherent in the concept the volume considers what can be done with these ambiguities and how precisely their fuzziness might be used to create an analytic tool to describe understand and critique processes of cultural hierarchization The contributors show how flyover fictions may operate in different national contexts and also internationally or transnationally not only providing a fresh perspective on historical and contemporary American culture but also supplying a conceptual toolbox for broader use
