*Social and Personality Development* Kevin B. MacDonald, 2012-12-06 This volume is an attempt to integrate the theory and data of social and personality development within a modern evolutionary framework The various chapters are not meant to be read in isolation from one another but rather are intended to form an integrated whole There is thus a great deal of cross referencing between chapters and to some extent they all stand or fall together This also suggests that the accuracy or usefulness of a particular chapter cannot be judged until the book is comprehended as a whole Chapter 1 deals with the theoretical foundations of this enterprise and the focus is on the compatibility of mainstream approaches within the field to a modern evolutionary approach Chapters 2 4 concern what I view to be the fundamental proximal mechanisms underlying social and personality development Chapter 2 on temperament and personality development is particularly central to the rest of the volume because these processes are repeatedly invoked as explanatory concepts at later points in the volume

**Introduction to Behavioral Science in Medicine** F.R. Hine, R.C. Carson, G.L. Maddox, R.J. Jr. Thompson, R.B. Williams, 2012-12-06 This book is the product of many years experience teaching behavioral science in a way that demonstrates its relevance to clinical medicine We have been guided by the reactions and evaluations of many first year medical students The result is a conceptual framework different from those that we and others had tried before Because the clinical relevance of knowledge about human behavior is less apparent to many first year students than that of the other traditional pre clinical courses books and courses organized as brief introductions to psychology sociology and behavioral neurology have often been poorly

received Various medical schools and texts have explored ways to overcome this difficulty One text organizes the presentation around very practical problems which are of unmistakable interest to the future physician the therapeutic relationship death and dying sexuality and pain to give a few examples Another emphasizes stages of development periods of the human life cycle as its organizing principle Both of these approaches have merit and have been used successfully in various schools They seem to us however to have a potentially serious shortcoming They focus student attention too much on the more immediately intriguing issues of specific clinical problems or on the more easily recognized age specific behavioral issues In the limited time available the teaching of general principles of human behavioral functioning may then be neglected

Contemporary Perspectives on Social Learning in Early Childhood Education Olivia Saracho,Bernard Spodek,2007-06-01 Social epistemology is a broad set of approaches to the study of knowledge and to gain information about the social dimensions This intellectual movement of wide cross disciplinary sources reconstructs the problems of epistemology when knowledge is considered to be intrinsically social In the first chapter Social Epistemology and Social Learning Olivia Saracho and Bernard Spodek discuss the social and historical contexts in which different forms of knowledge are formulated based on the perspective of social epistemology They also discuss the emergence of social epistemology which guides researchers to

investigate social phenomena in laboratory and field settings Social factors external to the appropriate business of science have a major impact in the social studies researchers historical case studies Thus social studies researchers may be considered social epistemologists because a they focus on knowledge of social influences and b they infer epistemologically significant conclusions from their sociological or anthropological research In addition analyses indicate that studies of scientific paradigms are basically a struggle for political power rather than reflecting reliable epistemic merit Social studies researchers focus on knowledge of social influences on knowledge which is analogous to the knowledge of the social epistemologists They also use their sociological or anthropological research to infer epistemologically significant conclusions
