Social Perception:

Social Perception Leslie A. Zebrowitz, 1990 This book argues that the mainstream approach to social perception is a cognitive one which focuses primarily on the processes of perceiving people It aims to redress the imbalance by giving greater emphasis to the content of social perceptions the stimulus information on which they are based and the functions which they serve

Social Perception and Social Reality Lee Jussim, 2012-04-06 Social Perception and Social Reality contests the received wisdom in the field of social psychology that suggests that social perception and judgment are generally flawed biased and powerfully self fulfilling Jussim reviews a wealth of real world survey and experimental data collected over the last century to show that in fact social psychological research consistently demonstrates that biases and self fulfilling prophecies are generally weak fragile and fleeting Furthermore research in the social sciences has shown stereotypes to be accurate Jussim overturns the received wisdom concerning social perception in several ways He critically reviews studies that are highly cited darlings of the bias conclusion and shows how these studies demonstrate far more accuracy than bias or are not replicable in subsequent research Studies of equal or higher quality which have been replicated consistently are shown to demonstrate high accuracy low bias or both The book is peppered with discussions suggesting that theoretical and political blinders have led to an odd state of affairs in which the flawed or misinterpreted bias studies receive a great deal of attention while stronger and more replicable accuracy studies receive relatively little attention In addition the author presents both personal and real world examples such as stock market prices sporting events and political elections that routinely undermine heavy handed emphases on error and bias but are generally indicative of high levels of rationality and accuracy He fully embraces scientific data even when that data yields unpopular conclusions or contests prevailing conventions or the received wisdom in psychology in other social sciences and in broader society

Social Perception from Individuals to Groups Steven J. Stroessner, Jeffrey W. Sherman, 2015-02-11 This volume focuses on social perception the processing of information about people This issue has always been central to social psychology but this book brings together literatures that in large part have been separated by the nature of the social target that is involved Historically research on person perception developed quite independently from

research involving perceptions of groups Whereas the former research generally focused on the cognitive processes involved in forming impressions of individuals research on group perception examined the content of stereotypes and the conditions under which they are used in social judgment There was been little overlap in the theories and methods of these subfields and different researchers were central in each The chapters in this book highlight research and theorizing about social perception exploring the processes involved in social perception from persons to groups Some chapters describe work that was originally developed in person perception but is being extended to understanding groups Other chapters illustrate how some processes studied in the domain of stereotyping also affect perceptions of individual persons Finally other chapters focus on variables that affect perceptions and judgments of both individuals and groups providing opportunities for greater recognition of the common set of factors that are central to all types of social perception This groundbreaking book highlights the research contributions of David L Hamilton whose research has played a central role in uniting these previously independent areas of research It provides essential reading for upper level courses on social cognition or social perception and could also serve as an auxiliary text in courses on interpersonal perception relations and courses on stereotyping intergroup relations

Motivated Social Perception Steven J. Spencer, Steven Fein, Mark P. Zanna, James M. Olson, 2003-01-30 The 9th book in the Ontario Symposium series It highlights research on motivated social perception The targeted market includes scholars researchers and advanced students interested in social perception
