

Our number system is a legacy of our culture. The study of how mothers teach their children about number provides important insights into the way in which children come to internalize their own developing understandings with achievements that have occurred in our culture's social history.

The Social Organization of Early Number Development

Geoffrey B. Saxe

Maryl Gearhart

Steven R. Guberman

Research in cognitive development is generally motivated by the concern to understand the nature of developmental shifts in children's conceptual understandings and logical operations. To pursue this research interest, investigators have often studied children removed from the everyday social contexts in which they use their conceptual skills, and they have interviewed and observed children as they solved problems without the support and collaboration of others. While divorcing the investigation of children's conceptual development from the social contexts in which it occurs permits the researcher greater access to the child's reasoning processes, it removes from observation the ways in which the development of children's reasoning is supported and informed by interactions with others.

The writings of Vygotsky (1962, 1978) and recent elaborations of his works (for example, Wertsch, 1979) address the social network of meanings, activities and historical achievements within which the individual operates and

This research was supported by grants from the National Institute of Education (NIE-G-80-0019), the Spencer Foundation, and the Research Committee of UCCLA (No. 83862).
