Addressing Community Problems Ximena B. Arriaga,Stuart Oskamp,1998-07-23 Problems in community life are among the most distressing and troublesome aspects of our modern society yet psychology as a field has given them relatively little attention The great bulk of psychological practice and

research is directed at individual psychological problems and the difficulties in dyadic relationships. However, community problems arguably are broader and more important because to a large degree they affect us all young and old rich and poor male and female and majority and minority group members. In this new volume from the Claremont Symposium on Applied Social Psychology contributors examine one or more pressing community problems: homelessness, racism, delinquency, alcoholism, violence, unemployment, workplace health from a social psychological perspective as well as a clinical one. The contributors, all leaders in their fields, then present the results of their empirical research. An ideal supplement for courses in community psychology. Addressing Community Problems is ideal for academics and students in the fields of social psychology, clinical and counseling psychology, social work, gender studies, sociology, and public health.
