Derek Gregory, John Urry, 1985-01-01 Social Relations and Spatial Structures D. GREGORY, 1985 Postmodern Geographies Edward W. Soja, 1989 Written by one of America's foremost geographers Postmodern Geographies contests the tendency still dominant in most social science to reduce human geography to a reflective mirror or as Marx called it an unnecessary complication Beginning with a powerful critique of historicism and its constraining effects on the geographical imagination Edward Soja builds on the work of Foucault Berger Giddens Berman Jameson and above all Henri Lefebvre to argue for a historical and geographical materialism a radical rethinking of the dialectics of space time and social being Soja charts the respatialization of social theory from the still unfolding encounter between Western Marxism and modern geography through the current debates on the emergence of a postfordist regime of flexible accumulation The postmodern geography of Los Angeles exposed in a provocative pair of essays serves as a model in his account of the contemporary struggle for control over the social production of space **Giddens' Theory of Structuration** Christopher Bryant, David Jary, 2014-06-03 Anthony Giddens is one of the most respected and influential social theorists at work today This wide ranging and stimulating volume first published in 1991 provides an authoritative and penetrating critical assessment of social theory It will be of use to all students of sociology and social theory **The Intelligible Metropolis** Nora Pleške, 2014-08-15 Writings on the metropolis generally foreground illimitability stressing thereby that the urban ultimately remains both illegible and unintelligible Instead the purpose of this interdisciplinary study is to demonstrate that mentality as a tool offers orientation in the urban realm Nora Pleške develops a model of urban mentality to be employed for cities worldwide Against the background of the Spatial Turn she identifies dominant urban specific structures of London mentality in contemporary London novels such as Monica Ali's Brick Lane J G Ballard's Millennium People Nick Hornby's A Long Way Down and Ian McEwan's Saturday **Geographies of Globalization** Andrew Herod, 2009-02-02 Exploring a wide range of issues from the integration of the world economy to how contemporary processes are shaping and shaped by nation states and how workers are organizing transnationally in response to transformations in the planet's economic geography Geographies of Globalization is a critical examination of what has become the leitmotif of our contemporary world Challenges neoliberal assumptions on the nature of globalization Provides a conceptual overview of how globalization is a spatial process and of its relation to capitalism Explores whether we are in fact living in a more globalized world or only in a more internationalized one Considers arguments concerning whether globalization is a new phenomenon or simply the latest manifestation of processes many hundreds of years in the making Focuses on how nation states have shaped and been shaped by contemporary processes of globalization how globalization has been imagined discursively and how workers are responding to such processes Explores how workers are creating new organizing strategies in response to globalization

Ciaran Carson Neal Alexander, 2010-09-15 An Open Access edition of this book is available on the Liverpool University Press website and the OAPEN library Ciaran Carson is one of the most challenging and inventive of contemporary Irish writers exhibiting verbal brilliance formal complexity and intellectual daring across a remarkably varied body of work This study considers the full range of his oeuvre in poetry prose and translations and discusses the major themes to which he returns including memory and history narrative language and translation mapping violence and power It argues that the singularity of Carson s writing is to be found in his radical imaginative engagements with ideas of space and place The city of Belfast in particular occupies a crucially important place in his texts serving as an imaginative focal point around which his many other concerns are constellated The city in all its volatile mutability is an abiding frame of reference and a reservoir of creative impetus for Carson s imagination Accordingly the book adopts an interdisciplinary approach that draws upon geography urbanism and cultural theory as well as literary criticism It provides both a stimulating and thorough introduction to Carson s work and a flexible critical framework for exploring literary representations of space

Economies of Signs and Space Scott Lash, John Urry, 1993-12-09 This is a novel account of social change that supplants conventional understandings of society and presents a sociology that takes as its main unit of analysis flows through time and across space Developing a comparative analysis of the UK and US the new Germany and Japan Lash and Urry show how restructuration after organized capitalism has its basis in increasingly reflexive social actors and organizations The consequence is not only the much vaunted postmodern condition but also a growth in reflexivity In exploring this new reflexive world the authors argue that today s economies are increasingly ones of signs information symbols images desire and of space where both signs and social subjects refugees financiers tourists and fl ci aneurs are mobile over ever greater distances at ever greater speeds

Routledge Handbook of Social and Cultural Theory Anthony Elliott, 2013-12-04 If today students of social theory read Jurgen Habermas Michel Foucault and Anthony Giddens then proper regard to the question of culture means that they should also read Raymond Williams Stuart Hall and Slavoj Zizek The Routledge Handbook of Social and Cultural Theory offers a concise comprehensive overview of the convergences and divergences of social and cultural theory and in so doing offers a novel agenda for social and cultural research in the twenty first century This Handbook edited by Anthony Elliott develops a powerful argument for bringing together social and cultural theory more systematically than ever before Key social and cultural theories ranging from classical approaches to postmodern psychoanalytic and post feminist approaches are drawn together and critically appraised There are substantive chapters looking at among others structuralism and post structuralism critical theory network analysis feminist cultural thought cultural theory and cultural sociology Throughout the Handbook there is a strong emphasis on interdisciplinarity with chapters drawing from research in sociology cultural studies psychology politics anthropology women s studies literature and history Written in a clear and direct style this Handbook will appeal to a wide undergraduate and postgraduate audience across the social sciences and humanities

The Rural Richard Munton, 2017-05-15 The rural has long been regarded as an important site of geographical inquiry even if our understanding of it has not always been treated as conceptually different from the urban That said rural research has pursued a number of distinct empirical agendas ranging from the operation and impacts of agribusiness to local resistance to global food supply chains to differing representations of the rural In doing so rural geographers have critically examined the relevance and significance of ideas drawn from numerous traditions including political economy ecological

modernization and cultural theory amending them as appropriate in their search to understand the nature and trajectory of rural areas Up until the 1980s attention remained largely focused upon agriculture as the primary land use but increasingly new forms of rural consumption housing recreation nature conservation have taken centre stage as the primacy of local agricultures has been undermined by reduced state protection and new rural populations which have migrated out from the city More recently research has been dominated by the cultural turn with particular emphases upon society nature relations interpretations of landscape marginalised others and analyses of the relations between representation and practice In the last decade a more holistic view of the rural bringing together different aspects of the two previous themes has emerged through more politically oriented studies of rural governance concerned with the functioning of interest groups participation protest and the allocation and management of resources The volume is thus structured into three sections concerned with agriculture and food the rural and rural governance The great majority of the selected papers combine both empirical material often highly informative case studies and important conceptual arguments about change in the rural condition that can be linked to ideas being employed elsewhere in Geography and the Social Sciences more generally These critical reflections have been drawn very largely from research conducted in advanced economies which at least provide some commonality of experience allowing the transfer of ideas between what otherwise might be seen as very differing geographical contexts

Mobilities and Complexities Ole B. Jensen, Sven Kesselring, Mimi Sheller, 2018-10-25 The new mobilities turn has become a powerful perspective in social theory John Urry's oeuvre has been very influential in the emergence of this new field and has had lasting impacts on many scholars This collection presents originally commissioned essays from leading scholars in the field who reflect on how Urry's writing influenced the course of their research and theorizing This volume gathers contributions in relation to John Urry's path breaking work The new mobilities turn made a strong imprint in European social theory and is beginning to make an impact in the Americas and Asia as well It challenges mainstream theoretical and empirical approaches that were grounded in a sedentary and bounded view of states It propels innovative thinking about social and media ecologies complex systems and social change It bridges many disciplines and methodologies leading to new approaches to existing problems while also resonating with questions about both history and the future Mobilities research marks the rise of academic and intellectual cooperation and collaboration beyond societies as nations around the world face the ecological limits of contemporary mobility and energy systems The contributors represent several national contexts including England Germany Denmark Finland Taiwan Brazil Canada Australia and the USA This book collects personal essays and gives insight into a vivid network of scientists who have connections of various degrees to the late John Urry as an academic figure an author and a person
