Goldstone, Leonid Grinin, Andrey Korotayev, 2022-05-19 The 21st century has witnessed a considerable and increasing number of political revolutions around the world This contradicts the popular belief of many experts in the 1970s that revolutions occurred mainly in monarchies and empires Instead the revolutions of this century have several new characteristics which call for a renewed analysis of the subject This handbook offers a comparative perspective on the new wave of revolutions of the last decade Presenting case studies on the color revolutions the Arab revolutions of 2010 2011 and the global wave of revolutions in 2013 2018 that spanned regions ranging from Africa to the Caucasus it offers a better understanding of the varied forms features and historical backgrounds of revolutions as well as their causes Accordingly it highlights recent revolutions in their historical and world systems contexts The handbook is divided into seven parts the first of which examines the history of views on revolution and important aspects of the theory of revolution The second part analyzes revolutions within long term historical trends and in their world system contexts In turn the third part explores specific major revolutionary waves in history The fourth part analyzes the first revolutionary wave of the 21st century 2000 2009 the so called color revolutions while the fifth discusses the second wave the Arab Spring 2010 2013 as an important turning point The sixth part is dedicated to analyzing revolutions and revolutionary movements beyond the Arab Spring and some revolutionary events from the third wave that began in 2018 The seventh and final part offers forecasts on the future of revolutions Given its scope the book will appeal to scholars and students from various disciplines interested in historical trends sociopolitical change contentious politics social movements and revolutionary processes involving both nonviolent campaigns and political violence Once again this volume demonstrates the kind of open minded systematic analysis that the field of revolutionary studies requires Prof George Lawson Department of International Relations Australian National University Canberra

**An Analysis of Theda Skocpol's States and Social Revolutions** Riley Quinn, 2017-07-05 Many people want to understand what revolutions are and especially how they come about from the academics who study them to the states that wish to prevent or in some cases provoke them But it is arguably the US scholar Theda Skocpol who has done most to create a viable model of revolution and *States and Social Revolutions* is the work in

which she sets out her intellectual stall Skocpol's magnum opus can be considered a classic product of the critical thinking skill of problem solving She assesses several different revolutions those of France Russia and China and asks new productive questions about their causes and outcomes The answers collectively allow her to move beyond existing theories such as the voluntarist school which suggests that revolutionaries have agency and the Marxist school which sees state institutions as nothing more than a front for class interests Skocpol's model assumes that states are autonomous bureaucratic institutions which act in their own interests a fundamental re imagining based on fresh interpretations of the evidence Her analysis extends beyond the causes of revolution to their consequences and her argument that the revolutionary state that survives is the one that successfully implements a far reaching program of reform helps to explain not only why the three revolutions she studied have proved enduringly influential but also why hundreds of others less successful are barely remembered today

He also identifies two ideal typical forms of revolutionary change. In *The Iranian Revolution Then and Now* Dariush Zahedi assesses the Islamic Republic's potential for revolution through an in-depth theoretically informed comparative analysis of the present with 1979 pre-Revolutionary Iran. Zahedi discusses how the potential for a revolutionary coup is based on two things: the inherent defects and vulnerabilities in the regime and the coordinated actions of the social groups and individuals opposed to the regime. He also identifies two ideal typical forms of revolutionary change: the regime collapses on its own or the regime is overthrown. He concludes that the chances for overthrowing the present regime are moderate.

**A Social Revolution** Kevan Harris, 2017-08-08 For decades political observers and pundits have characterized the Islamic Republic of Iran as an ideologically rigid state on the verge of collapse exclusively connected to a narrow social base. In *A Social Revolution* Kevan Harris convincingly demonstrates how they are wrong. Previous studies ignore the forceful consequences of three decades of social change following the 1979 revolution. Today more people in the country are connected to welfare and social policy institutions than to any other form of state organization. In fact, much of Iran's current political turbulence is the result of the success of these social welfare programs which have created newly educated and mobilized social classes advocating for change. Based on extensive fieldwork conducted in Iran, Harris shows how the revolutionary regime endured through the expansion of health, education, and aid programs that have both embedded the state in everyday life and empowered its challengers. This focus on the social policies of the Islamic Republic of Iran opens a new line of inquiry into the study of welfare states in countries where they are often overlooked or ignored.
