

SOCIAL EXCHANGE THEORY

Social exchange theory postulates that people form a relationship through cost-benefit analysis.

COMPONENTS

According to social exchange theory, every relationship has the following components:

1. **Costs** – the elements of a relationship which have a negative value to a person.
2. **Rewards** – the elements of a relationship which have a positive value to a person.

EXAMPLES

1. Highest Reward

Costs being equal, an individual will choose the alternative from which they expect to receive the highest reward.

2. Lowest Cost

Rewards being equal, an individual will choose the alternative from which they expect the lowest cost.

Social Exchange Theory Its Structure And Influence In Social Psychology:

Social Exchange Theory John K. Chadwick-Jones,1976 *The Social Psychology of Groups* John W. Thibaut,2017-09-29

This landmark theory of interpersonal relations and group functioning argues that the starting point for understanding social behavior is the analysis of dyadic interdependence. Such an analysis portrays the ways in which the separate and joint actions of two persons affect the quality of their lives and the survival of their relationship. The authors focus on patterns of interdependence and on the assumption that these patterns play an important causal role in the processes, roles and norms of relationships. This powerful theory has many applications in all the social sciences including the study of social and moral norms, close pair relationships, conflicts of interest and cognitive disputes, social orientations, the social evolution of economic prosperity and leadership in groups and personal relationships. *Social Exchange* Kenneth Gergen,2012-12-06

INTRODUCTION In developing scientific theory there is perhaps nothing more propitious than a compelling metaphor. If the metaphor is rich in imagery, complexly differentiated, emotionally evocative and vitally wedded to the cultural lore, the theory to which it gives rise may enjoy a long and vigorous life. If the metaphor is sufficiently powerful, the theory may even be sustained in independence of systematic empirical support. Role theory is likely to remain prosperous so long as there is a thriving theater. Decision theory experienced a dramatic rejuvenation with the development of the electronic computer and in spite of its archaic construction, Jungian theory will prevail so long as ancient myths and symbols continue to haunt us. (Smith, 1978) From this standpoint, the development of social exchange theory is hardly surprising. Experience with the marketplace is extensive in society; its images are both complex and richly evocative; its challenges are often exciting and its lessons sometimes painful. It is thus both intellectually and emotionally invigorating to consider the social arena in all its diversity as an extended market in which each individual seeks to maximize profits. The economic metaphor is hardly new to the social sciences. The recent intellectual roots of contemporary exchange theory can be traced to the works of Claude Lévi-Strauss, Marcel Mauss, Karl Marx and B.

Social Exchange in Developing Relationships Robert L. Burgess, Ted L. Huston, 2013-09-11 *Social Exchange in Developing Relationships* is a collection of papers that deals with the systematic study of the development of relationships. The papers discuss several theoretical perspectives such as evolutionary theory, personality theory, cognitive developmental theory, equity theory, role theory and attribution theory. One paper discusses romantic relationships, the evolution of first acquaintance to close or intimate commitment. Another paper presents the hypothesis that the factors causing a relationship to begin will also probably steer intermediate cognitive processes, eventually influencing the nature of the relationship. Commitment requires specific concepts such as input levels contributed to the relationship, duration of these inputs and their consistency of occurrence. The equity theory suggests that equity principles determine the selection of one's mate and how they, the partners, will get along in the future. One paper analyzes the dynamic theories of social relationships and the resulting research strategies that the conceptualization of a parameter of

a social relationship can affect the choice of data collection techniques and other matters Sociologists psychologists historians students and academicians doing sociological research can benefit greatly from this collection

Social Network Analysis Christina Prell, 2011-10-26 We live in a world that is paradoxically both small and vast each of us is embedded in local communities and yet we are only a few links away from anyone else in the world This engaging book represents these interdependencies positive and negative consequences their multiple effects and the ways in which a local occurrence in one part of the world can directly affect the rest Then it demonstrates precisely how these interactions and relationships form This is a book for the social network novice learning how to study think about and analyse social networks the intermediate user not yet familiar with some of the newer developments in the field and the teacher looking for a range of exercises as well as an up to date historical account of the field It is divided into three clear sections 1 historical traditional and current analytical procedures and fundamental mathematical equations needed to get a foothold in the field

Communication in Development W. P. Robinson, 2013-09-11 Communication in Development is composed of papers derived from two sources An International Conference on Social Psychology and Language was held in Bristol in July 1979 Considerations of space rather than merit prevented some of the papers given in supplementary sessions on language development from being published in the proceedings These papers are published in this volume Also included are recent and hitherto unpublished papers from European researchers working in the field of language and cognitive development The contents of this volume range from the early non verbal communication to the emergence of the child's understanding about referential communication and to between and within socio economic status differences in maternal and child behavior The kinds of verbal and non verbal experience that promote intellectual development are considered within the frames of both observed changes within children and cross sectional studies of individual differences in mother child interaction The idea that the child's performance is context sensitive is one of the general ideas that has been taken increasingly into account Two chapters pay close attention to this issue both treat it as a challenge to experimental and theoretical ingenuity recognizing that the child is an active participant in situations where he is observed and that the challenge is to divine the principles regulating the child's behavior

Handbook of Social Psychology John DeLamater, Amanda Ward, 2013-08-13 This handbook provides a broad overview of the field of social psychology and up to date coverage of current social psychological topics It reflects the recent and

substantial development of the field both with regard to theory and empirical research. It starts out by covering major theoretical perspectives including the interactionist, identity, social exchange, social structure, and the person perspectives. Next, it discusses development and socialization in childhood, adolescence, and adulthood. In addition to updated discussions of topics that were included in the first edition, the part examining personal processes includes entirely new topics such as social psychology and the body and individual agency and social motivation. Interpersonal processes are discussed from a contemporary perspective with a focus on stress and health. The final section examines the person in sociocultural context and includes another topic new to the second edition: the social psychology of race and gender and intersectionality.

Social Influence Network Theory Noah E. Friedkin, Eugene C. Johnsen, 2011-04-18. Social influence network theory presents a mathematical formalization of the social process of attitude changes that unfolds in a social network of interpersonal influences. This book brings the theory to bear on lines of research in the domain of small group dynamics concerned with changes of group members' positions on an issue, including the formation of consensus and of settled disagreement via endogenous interpersonal influences in which group members are responding to the displayed positions of the members of the group. Social influence network theory advances a dynamic social cognition mechanism in which individuals are weighing and combining their own and others' positions on an issue in the revision of their own positions. The influence network construct of the theory is the social structure of the endogenous interpersonal influences that are involved in this mechanism. With this theory, the authors seek to lay the foundation for a better formal integration of classical and current lines of work on small groups in psychological and sociological social psychology.
