socio logical theories and research concerning gender which are discussed across the full array of social processes structures and institutions As editor I have explicitly tried to shape the contributions to this volume along several lines that reflect my long standing views about sociology in general and gender sociology in particular First I asked authors to include cross national and historical material as much as possible This request reflects my belief that understanding and evaluating the here and now and working realistically for a better future can only be accomplished from a comparative perspective Too often American sociology has been both tempero and ethnocentric Second I have asked authors to be sensitive to within gender differences along class racial ethnic sexual preference and age cohort lines
