Social Learning and Imitation Miller, John Dollard, 1979 **Social learning and imitation by Neal E. Miller and John Dollard** Neal Elgar Miller, 1953 **Recent Trends in Social Learning Theory** Ross D. Parke, 2014-05-10 Recent Trends in Social Learning Theory offers a convenient overview of the state of social learning theory This book is organized into six chapters Chapter 1 provides a detailed discussion of the social learning theory followed by an analysis of the theoretical views on the social reinforcement issue in Chapter 2 The contiguity theory of modeling and important role played by symbolic coding processes in imitation are described in Chapter 3 Chapter 4 elaborates the developmental analysis of imitation while Chapter 5 outlines an empirical and theoretical overview of the status of punishment and its role in the development of self control in children The last chapter summarizes the contributions compiled in this text This publication is recommended for students and professionals in child development and social and clinical psychology **Social learning and imitation** Neal E. ; Dollard Miller (John), 2023 *Social Learning and Imitation* Miller, Neal Elgar Miller, John Dollard, 2000 **Apes, Monkeys, Children, and the Growth of Mind** Juan Carlos Gómez, 2009-07 What can the study of young monkeys and apes tell us about the minds of young humans In this fascinating introduction to the study of primate minds Juan Carlos Gomez identifies evolutionary resemblances and differences between human children and other primates He argues that primate minds are best understood not as fixed collections of specialized cognitive capacities but more dynamically as a range of abilities that can surpass their original adaptations In a lively overview of a distinguished body of cognitive developmental research among nonhuman primates Gomez looks at knowledge of the physical world causal reasoning including the chimpanzee like errors that human children make and the contentious subjects of ape language theory of mind and imitation Attempts to teach language to chimpanzees as well as studies of the quality of some primate vocal communication in the wild make a powerful case that primates have a natural capacity for relatively sophisticated communication and considerable power to learn when humans teach them Gomez concludes that for all cognitive psychology s interest in perception information processing and reasoning some essential functions of mental life are based on ideas that cannot be explicitly articulated Nonhuman and human primates alike rely on implicit knowledge Studying nonhuman primates helps us to understand this perplexing aspect of all primate minds **Bounded Rationality** Gerd Gigerenzer, Reinhard Selten, 2002-07-26 In a complex and uncertain world humans and animals make decisions under the constraints of limited knowledge resources and time Yet models of rational decision making in economics cognitive science biology and other fields largely ignore these real constraints and instead assume agents with perfect information and unlimited time About forty years ago Herbert Simon challenged this view with his notion of bounded rationality Today bounded rationality has become a fashionable term used for disparate views of reasoning This book promotes bounded rationality as the key to understanding how real people make decisions Using the concept of an adaptive toolbox a repertoire

of fast and frugal rules for decision making under uncertainty it attempts to impose more order and coherence on the idea of bounded rationality The contributors view bounded rationality neither as optimization under constraints nor as the study of people s reasoning fallacies The strategies in the adaptive toolbox dispense with optimization and for the most part with calculations of probabilities and utilities The book extends the concept of bounded rationality from cognitive tools to emotions it analyzes social norms imitation and other cultural tools as rational strategies and it shows how smart heuristics can exploit the structure of environments
