**Social Mindscapes** Eviatar Zerubavel, 1999-10-15 Why do we eat sardines but never goldfish ducks but never parrots Why does adding cheese make a hamburger a cheeseburger whereas adding ketchup does not make it a ketchupburger By the same token how do we determine which things said at a meeting should be included in the minutes and which ought to be considered off the record and officially disregarded In this wide ranging and provocative book Eviatar Zerubavel argues that cognitive science cannot answer these questions since it addresses cognition on only two levels the individual and the universal To fill the gap between the Romantic vision of the solitary thinker whose thoughts are the product of unique experience and the cognitive psychological view which revolves around the search for the universal foundations of human cognition Zerubavel charts an expansive social realm of mind a domain that focuses on the conventional normative aspects of the way we think With witty anecdote and revealing analogy Zerubavel illuminates the social foundation of mental actions such as perceiving attending classifying remembering assigning meaning and reckoning the time What takes place inside our heads he reminds us is deeply affected by our social environments which are typically groups that are larger than the individual yet considerably smaller than the human race Thus we develop a nonuniversal software for thinking as Americans or Chinese lawyers or teachers Catholics or Jews Baby Boomers or Gen Xers Zerubavel explores the fascinating ways in which thought communities carve up and classify reality assign meanings and perceive things defamiliarizing in the process many taken for granted assumptions *Social Memory among the Literati of Yehud* Ehud Ben Zvi, 2019-07-22 Ehud Ben Zvi has been at the forefront of exploring how the study of social memory contributes to our understanding of the intellectual world of the literati of the early Second Temple period and their textual repertoire Many of his studies on the matter and several new relevant works are here collected together providing a very useful resource for furthering research and teaching in this area The essays included here address inter alia prophets as sites of memory kings as sites memory Jerusalem as a site of memory a mnemonic system shaped by two interacting national histories matters of identity and othering as framed and explored via memories mnemonic metanarratives making sense of the past and serving various didactic purposes and their problems memories of past and futures events shared by the literati issues of gender constructions and memory memories understood by the group as counterfactual and their importance and in multiple ways how and why shared memories served as a safe playground for exploring multiple central ideological issues within the group and of generative grammars governing systemic preferences and dis preferences for particular memories **Culture and Cognition** Wayne H. Brekhus, 2015-10-02 How does culture shape our thinking In what ways do our social and cultural worlds enter into our mental worlds How do the communities we belong to influence what we notice and what we ignore What cultural variation do we see in cognition What general patterns do we see across this diversity and variation In this lively and engaging book Wayne H Brekhus shows us the many ways that culture influences our cognitive thought processes Drawing on a wide range

of fascinating examples such as how members of different subcultures perceive danger and safety how cultures variably classify and perceptually weight race how social actors use and present identity as a strategic resource and how people across different organizational settings experience time Brekhus takes us on a creative diverse and insightful tour of the sociocultural character of cognition Culture and Cognition Patterns in the Social Construction of Reality offers an invaluable survey of a wide ranging body of research in the sociology of culture and cognition that will be an inviting resource for upper level undergraduates graduate students and established research scholars alike **The ^AElephant in the Room** Eviatar Zerubavel,2006-04-01 In The Elephant in the Room Eviatar Zerubavel sheds new light on the social and political underpinnings of silence and denial the keeping of open secrets Zerubavel shows how conspiracies of silence evolve illuminating the social pressures that cause people to deny what is right before their eyes Drawing on examples from newspapers and comedy shows to novels children s stories and film the book travels back and forth across different levels of social life and from everyday moments to large scale historical events **Mente, territorio y sociedad** Josep Muntanola i Thornberg,2010-04-19 Inauguramos una nueva serie azul en Architectonics titulada Teor as y pr cticas avanzadas en la investigaci n sobre arquitectura y urbanismo con un volumen introductorio al tema de las relaciones entre mente sociedad y territorio Ello ha sido posible gracias a una red de coedici n entre diversas universidades y a un nuevo comit cient fico internacional de alt simo nivel Este n mero incluye conferencias realizadas en el congreso internacional sobre Architectonics llevado a cabo en Barcelona en el a o 2004 y resume adem s tres conferencias de arquitectos en este mismo congreso con una buena pr ctica manteniendo los textos en su versi n hablada como si fuera un nivel pr ctico m s aunque ello conlleve un cierto desorden en los escritos The ^AOxford Handbook of Cognitive Sociology Wayne H. Brekhus,Gabe Ignatow,2019-06-26 The Oxford Handbook of Cognitive Sociology will serve as a resource for social researchers interested in how cognitive sociology can contribute to research within their substantive areas of focus and for faculty and graduate students interested in cognitive sociology s main contributions and the central debates within the field In particular the volume includes a broad range of cognitive sociological perspectives as the classical sociological and newer interdisciplinary approaches to cognition are often covered separately by scholars Holocaust Public Memory in Postcommunist Romania Alexandru Florian,2018-01-24 How is the Holocaust remembered in Romania since the fall of communism Alexandru Florian and an international group of contributors unveil how and why Romania a place where large segments of the Jewish and Roma populations perished still fails to address its recent past These essays focus on the roles of government and public actors that choose to promote construct defend or contest the memory of the Holocaust as well as the tools the press the media monuments and commemorations that create public memory Coming from a variety of perspectives these essays provide a compelling view of what memories exist how they are sustained how they can be distorted and how public remembrance of the Holocaust can be encouraged in Romanian society today *Theological Anthropology in the*

*Anthropocene* Jan-Olav Henriksen, 2022-12-14 The Anthropocene presents theology and especially theological anthropology with unprecedented challenges There are no immediately available resources in the theological tradition that reflect directly on such experiences Accordingly the situation calls for contextually based theological reflection of what it means to be human under such circumstances This book discusses the main elements in theological anthropology in light of the fundamental points a that theological anthropology needs to be articulated with reference to and informed by the concrete historical circumstances in which humanity presently finds itself and b that the notion of the Anthropocene can be used as a heuristic tool to describe important traits and conditions that call for a response by humanity and which entail the need for a renewal of what a Christian self understanding means Jan Olav Henriksen explores what such a response entails from the point of view of contemporary theological anthropology and discusses selected topics that can contribute to a contextually based position

**The Gospel of Climate Skepticism** Robin Globus Veldman, 2019-10-22 Why are white evangelicals the most skeptical major religious group in America regarding climate change Previous scholarship has pointed to cognitive factors such as conservative politics anti science attitudes aversion to big government and theology Drawing on qualitative fieldwork The Gospel of Climate Skepticism reveals the extent to which climate skepticism and anti environmentalism have in fact become embedded in the social world of many conservative evangelicals Rejecting the common assumption that evangelicals skepticism is simply a side effect of political or theological conservatism the book further shows that between 2006 and 2015 leaders and pundits associated with the Christian Right widely promoted skepticism as the biblical position on climate change The Gospel of Climate Skepticism offers a compelling portrait of how during a critical period of recent history political and religious interests intersected to prevent evangelicals from offering a unified voice in support of legislative action to address climate change
