DEFINITION

Learning theories are frameworks that explain how people acquire and retain knowledge. They provide a systematic way to understand how individuals process and respond to new information. Different theories focus on different aspects of the learning process, such as cognitive, behavioral, and constructivist approaches.

EXAMPLE

This theory suggests that learning occurs through the reinforcement or punishment of certain actions. For example, in a classroom setting, a student may receive praise or a good grade for completing a task correctly, reinforcing the behavior of completing tasks.
