Social Science And Social Policy:

Dimensions of Impact in the Social Sciences Tina Haux, 2019-07-03 Impact has become a central part of the assessment criteria for academic worth. It has been adopted by many research funding bodies and it is firmly embedded in the British Research Excellence Framework. However, a clear definition of impact remains elusive and guidance on how exactly to achieve it is often superficial. This concise informative book analyses impact across the social sciences. It draws on the analysis of the most highly ranked British impact case studies from the 2014 Research Excellence Framework as well as fifteen interviews with senior academics providing a longitudinal and critical framing of impact. The author concludes with valuable recommendations of how and when scholars can achieve impact.

Social Science and Public Policy Martin Rein, 1976 Monograph on the need for critical evaluation of value systems underlying the relationship between social research and social policy discusses obstacles to the contribution of empirical research and social theory regarding policy formulation, equal opportunity in context with social stratification and social mobility etc and uses the health services field as an example of the problem.

Encyclopedia of Catholic Social Thought, Social Science, and Social Policy Michael L. Coulter, Richard S. Myers, Joseph A. Varacalli, 2012-04-05 The two original volumes of the Encyclopedia of Catholic Social Thought, Social Science and Social Policy were published in 2007. Those two volumes included 848 entries from nearly 300 contributors and included a wide range of entries in three general categories: entries exploring Catholic social thought at a theoretical level; entries reflecting the learning of various social science and humanistic disciplines as this learning relates to Catholic social thought; and entries examining specific social policy questions. This third supplemental volume continues the approach of the original two. First, the volume includes entries that explore Catholic social thought at its broadest, most theoretical level, for example, an entry on Pope Benedict's important social encyclical *Caritas in Veritate*. Second, the volume includes entries that discuss recent social science research that bears on issues important to Catholic social thought, for example, an entry on the social costs of pornography draws on recent research on the topic. Third, the volume includes entries discussing specific issues of social policy that have become increasingly important in recent years, for example, an entry on embryo adoption and or rescue. This third volume contains 202 entirely new entries from over 100 contributors. The contributors include distinguished scholars such as Father Robert John Araujo, S.J., Loyola University of Chicago; Father Kevin L. Flannery, S.J., Gregorian University; Robert P. George, Princeton University; William E. May, John Paul Institute and the Culture of Life Foundation; D.Q. McInerney, Our Lady of Guadalupe Seminary; and Michael Novak, Ave Maria University. The work will appeal to anyone who is looking for a clear and accurate introduction to Catholic social thought.

Critical Issues in Social Theory John K. Rhoads, 1991 Critical Issues in Social Theory is an analytical survey of persistent controversies that have shaped the field of sociology It defines clarifies and proposes solutions to these critical issues through commentary on the writings of such influential social theorists as Hobbes Marx Durkheim Weber Mead Merton Parsons and Schutz Instead of being just another history or another classification of theories Rhoads's four part model allows him to focus attention on issues that remain at the core of sociological theory today First Rhoads analyzes the controversy over positivism as the proper methodological model for the study of human society Is there one science of which sociology is a branch or do the peculiarities of sociology's subject matter require a modification of the scientific method borrowed from the natural sciences Rhoads next considers the relationship of individuals to society and its structures Does society have a mode of existence distinct from its members or is it merely an abstraction derived from the characteristics of individuals Third a discussion of social order raises the question

of whether social order is the consequence of rules and their underlying moral values or the product of continuous construction based on self interest Finally the relative importance of consensus and conflict in social relationships is addressed Is society better understood as a community united by beliefs values and rules or is the social dynamic of continual conflict over beliefs values and rules more fundamental In coming to grips with these issues the author in some instances takes sides and in others arrives at a synthesis of diverse perspectives In the final chapter he points to the limitations on the possibility of rational action that come to light in the clashes over these basic issues **Social Policy** Paul

People, Plans, and Policies Herbert J. Gans, 1993 The primary theme of this collection of essays is that the cities basic problems are poverty and racism and until these concerns are addressed by bringing about racial equality creating jobs and instituting other reforms the generally low quality of urban life will persist Gans argues that the individual must work to alter society He believes that not only must parents have jobs to improve their children s school performance but that the country needs a modernized New Deal a more labor intensive economy and a thirty two hour work week to achieve full employment Other controversial ideas presented in this book include Gans s opposition to the whole notion of an underclass which he feels is the latest way for the nonpoor to unjustly label the poor as undeserving He also believes that poverty continues to plague society because it is often useful to the nonpoor He is critical of architecture that aims above all to be aesthetic or to make philosophical statements is doubtful that planners can or should try to reform our social or personal lives and thinks we should concentrate on achieving individual public policies until we learn how to properly plan as a society
