## **Social Science Under Debate:**

**Social Science Under Debate** Mario Bunge, 1999-01-01 Bunge contends that social science research has fallen prey to a postmodern fascination with irrationalism and relativism. He urges social scientists to re-examine the philosophy and the methodology at the base of their discipline.

**Cold War Social Science** Mark Solovey, Christian Dayé, 2021-05-13 This book explores how the social sciences became entangled with the global Cold War. While duly recognizing the realities of nation states, national power and national aspirations, the studies gathered here open up new lines of transnational investigation. Considering developments in a wide array of fields: anthropology, development studies, economics, education, political science, psychology, science studies and sociology that involved the movement of people, projects, funding and ideas across diverse national contexts, this volume pushes scholars to rethink certain fundamental points about how we should understand and thus how we should study Cold War social science itself.

**History Under Debate** Lawrence J. Mc Crank, Carlos Barros, 2013-05-13 Examine new trends in the writing of new history and what they mean to information science. History has been devalued, causing a lack of career prospects for historians, a decrease in vocations to the history profession and historical discontinuity between generations. *History Under Debate: International Reflection on the Discipline* is a recap of the crucial Second International Historia a Debate conference held on July 17, 1999, in Santiago de Compostela. This book details the comparative critical perspectives on history, historians, their audiences and the coming trends that will inevitably impact information science. The in-depth examination provides innovative approaches to historians as they redefine their discipline in relation to the global society of the new millennium while presenting invaluable insights for librarians, social scientists and political scientists. *History Under Debate: International Reflection on the Discipline* examines how the writing of history in the twenty-first century is revitalized by international comparative historiography thanks to new technologies and the multinational integration processes in economy, politics, culture and academics. The first section discusses the Historia a Debate HaD Forum and Movement, detailing the need for change to restore history as a vital global subject in modern times. The remainder of the book consists of reflective and comparative views on the study of history and historiography as well as history in and about Spain and its relation to the rest of the world. The book explores new ways for moving the discipline beyond sources and source criticism alone to a different concept of the historical profession as a science with a human subject that discovers the past as people construct it. Included in this book is the English translation of the HaD Manifesto, a proposal designed to unify historians of the twenty-first century and ensure a new dawn for history, its writings and its teachings. *History Under Debate: International Reflection on the Discipline* includes vital discussions on Linguistic Turn, Postmodernism and Deconstruction, gender studies and social history, objectivity and subjectivity in historical interpretation, multiple views of history from differing times and places, history as criticism, literature and reconstruction. *History Under Debate: International Reflection on the Discipline* is an essential resource that teaches historians, librarians, social scientists

and humanists how to use cross border development and new global historiographic networks to bring hope for a future in history

**The SAGE Handbook of the Philosophy of Social Sciences** Ian C Jarvie, Jesus Zamora-Bonilla, 2011-03-14 In this exciting Handbook Ian Jarvie and Jesus Zamora Bonilla have put together a wide ranging and authoritative overview of the main philosophical currents and traditions at work in the social sciences today Starting with the history of social scientific thought this Handbook sets out to explore that core fundamentals of social science practice from issues of ontology and epistemology to issues of practical method Along the way it investigates such notions as paradigm empiricism postmodernism naturalism language agency power culture and causality [Finding Philosophy in Social Science](#) Mario Bunge, Professor Mario Bunge, 1996-01-01

**The Social Sciences and Rationality** Hudson Meadwell, 2017-10-19 In recent decades rational choice theory has emerged as the single most powerful controversial claimant to provide a unified theoretical framework for all the social sciences In its simplest form the theory postulates that humans are purposive beings who pursue their goals in a rational efficient manner seeking the greatest benefit at the lowest cost This volume brings together prominent scholars working in several social science disciplines and the philosophy of science to debate the promise and problems of rational choice theory As rational choice theory has spread from its home base in economics to other disciplines it has come under fierce criticism To its critics the extension of the explanatory model mistakenly assumes that the logic of economic rationality can explain non economic behavior and at its worst commits the ethnocentric error of imposing Western concepts of rationality on non Western societies and cultures This volume includes strong advocates as well as forceful critics of the rational choice approach However in contrast to previous debates all the contributors share a commitment to open constructive and knowledgeable dialogue Well known advocates of rational choice theory Michael Hechter Michael Smith Chris Manfredi explicitly ponder some of its serious limitations while equally well known critics Ian Shapiro Mario Bunge strike a surprisingly conciliatory tone in contemplating its legitimate uses Vociferous critics of neoclassical economics Bunge favorably discuss sociological proponents of rational choice theory while two economists who are not particularly anti mainstream Robin Rowley George Grantham critically assess the problems of such assumptions in their discipline Philosophers Storrs McCall and sociologists John Hall alike reflect on the variable meaning of rationality in explaining social behavior In the introduction and conclusion the editors survey the current state of the debate and show how open constructive dialogue enables us to move beyond hackneyed accusations and dismissals that have characterized much previous debate

**Philosophy of Latin America** Guttorm Fløistad,2013-04-17 In most contributions collected in this volume the influence from European and American philosophy can be felt Remarkably ten out of thirteen philosophers feel that the working out of a genuine Latin American local national and continental cultural identity is a challenge to philosophy This volume contains articles on topics within a variety of disciplines political philosophy ethics history of philosophy formal logic philosophy of science and technology as well as philosophical interpretation of literature It is relevant to a large audience of philosophers and researchers in these disciplines *Social Science for What?* Mark Solovey,2020-07-07 How the NSF became an

important yet controversial patron for the social sciences influencing debates over their scientific status and social relevance In the early Cold War years the U S government established the National Science Foundation NSF a civilian agency that soon became widely known for its dedication to supporting first rate science The agency s 1950 enabling legislation made no mention of the social sciences although it included a vague reference to other sciences Nevertheless as Mark Solovey shows in this book the NSF also soon became a major albeit controversial source of public funding for them **Communication**

*Handbook of Philosophy of Management* Cristina Neesham, Markus Reihlen, Dennis Schoeneborn, 2022-12-01 The Handbook of Philosophy of Management addresses the philosophical foundations of management in theory and practice It covers established branches of philosophy such as aesthetics epistemology moral philosophy political and social philosophy philosophy of education philosophy of practice and philosophy of science The Handbook s broad scope maps out the field and

provides a forum where philosophy can be meaningfully applied to the study of management in all its forms The original peer reviewed research published here sheds new light on the complexities of management theory and practice beyond what hitherto has been possible with the sole application of the social sciences As philosophy provides a meta framework for moving beyond paradigm fragmentation within management research and education this allows researchers and practitioners to find harmony and discord in the perspectives revealed by a philosophical lens *Identities, Boundaries and Social Ties* Charles Tilly, 2015-11-17 *Identities Boundaries and Social Ties* offers a distinctive coherent account of social processes and individuals connections to their larger social and political worlds It is novel in demonstrating the connections between inequality and de democratization between identities and social inequality and between citizenship and identities The book treats interpersonal transactions as the basic elements of larger social processes Tilly shows how personal interactions compound into identities create and transform social boundaries and accumulate into durable social ties He also shows how individual and group dispositions result from interpersonal transactions Resisting the focus on deliberated individual action the book repeatedly gives attention to incremental effects indirect effects environmental effects feedback mistakes repairs and unanticipated consequences Social life is complicated But the book shows it becomes comprehensible once you know how to look at it **Controversy in Marketing Theory: For Reason, Realism, Truth and Objectivity**

Shelby D. Hunt, 2016-09-16 In this book distinguished theorist and author Shelby D Hunt analyzes the major controversies in the philosophy debates raging throughout the field of marketing Using an historical approach Hunt argues against relativism and for scientific realism as a philosophy for guiding marketing research and theory He also shows how the pursuit of truth and objectivity in marketing research are both possible and desirable Specific controversies analyzed in the book include Does positivism dominate marketing research Does positivism imply quantitative methods Is relativism an appropriate foundation for marketing research Does relativism imply pluralism tolerance and openness Should marketing pursue the goal of objective research An ideal companion to Hunt's classic text *Foundations of Marketing Theory* this volume will be equally useful on its own in any graduate level course on marketing theory **Modernity and the Ideals of Arab-Islamic and Western-Scientific Philosophy**

A. Z. Obiedat, 2022-07-08 This is the first study to compare the philosophical systems of secular scientific philosopher Mario Bunge 1919-2020 and Moroccan Islamic philosopher Taha Abd al Rahman b 1945 In their efforts to establish the philosophical underpinnings of an ideal modernity these two great thinkers speak to the same elements of the human condition despite their opposing secular and religious worldviews While the differences between Bunge's critical realist epistemology and materialist ontology on the one hand and Taha's spiritualist ontology and revelational mystical epistemology on the other are fundamental there is remarkable common ground between their scientific and Islamic versions of humanism Both call for an ethics of prosperity combined with social justice and both criticize postmodernism and religious conservatism The aspiration of this book is to serve as a model for future dialogue between

holders of Western and Islamic worldviews in mutual pursuit of modernity's best case scenario
