Okamoto, 2012-12-06 The Japanese population is aging faster than any other in the world The percentage of Japan's population aged 65 and above was only 7.1% in 1970 but just 30 years later in 2000 it reached 17.2% A declining birth rate and a rising average life expectancy will continue to push this trend further This situation is causing serious problems for Japanese society Structural reforms especially tax and social security reforms to accommodate this drastic demographic change have become an urgent policy issue The purpose of this book is to establish guidelines for tax and social security reforms in Japan in terms that are both efficient and equitable In this study an extended life cycle general equilibrium model is employed to rigorously take account of the rapidly aging Japanese population The simulation approach adopted in our analysis permits us to calculate the effects of alternative policy packages on capital accumulation and economic welfare This enables us to make proposals for concrete economic policies Reforming Pensions in Developing and Transition Countries K. usually measured using methods that are not meaningful in relation to this long term objective The recent global financial crisis has highlighted the need to develop better performance evaluation methods that are consistent with the retirement income objective of pension funds Compiling research derived from a partnership among the World Bank the Organisation for Economic Co operation and Development OECD and three private partners Evaluating the Financial Performance of Pension Funds discusses the theoretical basis and key implementation issues related to the design of performance benchmarks based on life cycle savings and investment principles The book begins with an evaluation of the financial performance of funded pension systems using the standard mean variance framework It then provides a discussion of the limitations inherent to applying these methods to pension funds and outlines the many other issues that should be addressed in developing more useful and meaningful performance measures through the formulation of pension specific benchmark portfolios Practical implementation issues are addressed through empirical examples of how such benchmarks could be developed The book concludes with commentary and observations from several noted pension experts about the need for a new approach to performance measurement and the impact of the recent global financial crisis on pension funds *The Challenge of Public Pension Reform in Advanced and Emerging Economies* Mr.Benedict J. *Transformation of Social Security* Katharina Müller, Andreas Ryll, Hans-Jürgen Wagener, 2012-12-06 This collection of papers focuses on the recent pension reform experiences in Central Eastern Europe while starting from a broader theoretical and empirical context. It provides evidence for the political feasibility of radical pension reform considered unlikely in the West. The approach is both multi disciplinary and cross regional. The book contains papers by economists, political scientists and sociologists. The authors come from Germany, Poland, Hungary, the Czech Republic and the US. The volume consists of four parts. First, general questions of transformation and social security in post 1989 Central Eastern Europe are addressed, followed by an introduction into issues and role models in the international pension reform debate. Then three Central European country cases are presented, analysing institutional legacies, recent reform measures and relevant political actors. A comparative section on Central Eastern European pension reforms concludes this book.

**Social Security Reform in Transition Economies** C. Becker, G. Marchenko, S. Khakimzhanov, A. Seitenova, V. Ivliev, 2009-01-05 This book examines social security reform in the Central Asian republic of Kazakhstan with a focus on lessons for late reformers such as China and Russia.

*Analyzing the Distributional Impact of Reforms, 2* Aline Coudouel, Stefano Paternostro, 2005 The analysis of the distributional impact of policy reforms on the well being or welfare of different stakeholder groups, particularly on the poor and vulnerable, has an important role in the elaboration and implementation of poverty reduction strategies in developing countries. In recent years, this type of work has been labeled as Poverty and Social Impact Analysis (PSIA) and is increasingly implemented to promote evidence based policy choices and foster debate on policy reform options. While information is available on the general approach, techniques and tools for distributional analysis, each sector displays a series of specific characteristics. These have implications for the analysis of distributional impacts, including the types of impacts and transmission channels that warrant particular attention. The tools and techniques most appropriate to the data source typically utilized and the range of political economy factors most likely to affect the reform process. This volume provides an overview of the specific issues arising in the analysis of the distributional impacts of policy and institutional reforms in selected sectors. Each chapter offers guidance on the selection of tools and techniques most adapted to the reforms under scrutiny and offers examples of applications of these approaches. This is a companion to the first volume which offers guidance on trade, monetary and exchange rate policy, utility provision, agricultural markets, land policy and education.
