EBOOK: Engendering the Social N/A Marshall, Anne Witz, 2004-03-16 This edited volume focuses on the problematic engendering of classical and contemporary sociological theory addressing questions such as How were the foundations of

sociological theory shaped by an implicit masculinity Did classical sociology simply reflect or actively construct theories of sexual difference How were alternative accounts of the social suppressed in sociology s founding moments Feminist interventions in sociology are still seen as marginal to sociological theorizing This collection challenges this truncated vision of sociological theory In part one contributors interrogate the classical canon exposing the masculinist assumptions that saturate the conceptual scaffolding of sociology In part two contributors consider the long standing and problematic relationship between sociology and feminism retrieving voices marginalized within or excluded from canonical constructions of sociological theory In part three contributors engage with key contemporary debates explicitly engendering accounts of the social Engendering the Social is unique in that it not only critically interrogates sociological theory from a feminist perspective but also embarks on a politics of reconstruction working creatively at the interface of feminist and sociological theory to induce a more adequate conceptualisation of the social This is a key text for undergraduate and postgraduate students in sociology social theory and feminist theory Perceptions of Islam in Europe Hakan Yilmaz,Cagla E.

Aykac,2012-04-24 For centuries the Islamic world has been represented as the other within European identity constructions an other perceived to be increasingly at odds with European forms of modernity and culture With the perceived gap between Islam and Europe widening leading scholars in this work come together to provide genuine and realistic analyses about perceptions of Islam in the West The book bridges these analyses with in depth case studies from Britain France Germany Greece Italy the Netherlands Poland Turkey and other parts of the European Union This study goes beyond the usual dichotomies of clashes of civilizations and cultural conflict to try to understand the numerous diverse and multifaceted ways some conflictual some peaceful in which cultural exchanges have taken place historically and which continue to take place between the Muslim and non Muslim worlds Sociology in the Twenty-First Century Simon Susen,2020-10-17 This book examines key trends debates and challenges in twenty first century sociology To this end it focuses on significant issues surrounding the nature of sociology What is sociology the history of sociology How has sociology evolved and the study of sociology How can or should we make sense of sociology These issues have been and will continue to be essential to the creation of conceptually informed methodologically rigorous and empirically substantiated research programmes in the discipline Over the past years however there have been numerous disputes and controversies concerning the future of sociology Particularly important in this respect are recent and ongoing discussions on the possibilities of developing new and arguably post classical forms of sociology The central assumption underlying most of these projects is the contention that a comprehensive analysis of the principal challenges faced by global society requires the construction of a sociology capable of accounting for the interconnectedness of social actors and social structures across time and space This book provides a cutting edge overview of crucial past present and possible future trends debates and challenges shaping the pursuit of sociological inquiry Simon Susen one of the most knowledgeable scholars in the contemporary social sciences examines the

key challenges with which sociology is confronted today This book is a must read for professional sociologists as well as for those studying the subject Luc Boltanski cole des Hautes tudes en Sciences Sociales Paris France Simon Susen provides a balanced update on sociology s theoretical methodological and institutional resources as well as challenges in today s complicated local and global social worlds Fortunately he has innovative and practical recommendations for ensuring the cutting edge relevance of sociological thinking This book is an excellent choice for undergraduate and postgraduate students as well as for the general reader Sandra Harding University of California Los Angeles USA A comprehensive and judicious account of the intellectual and material state of sociology based on omnivorous reading and incisive analysis The writing is beautifully clear and the book is a major contribution to the self understanding of the discipline William Outhwaite Newcastle University UK

The Quest for Modernity Roel Meijer,2018-10-24 This book analyses the political ideologies of the several highly influential liberal socialist and communist thinkers groups and movements which sought to modernize Egypt after World War II Most of the representatives of these currents intended to transform Egyptian society completely through rapid industrialization land reforms and economic planning which would eliminate the peasantry rationalize the economy and create a new Egyptian citizen who would live in accordance with the spirit of the age This study explains why and how most liberal and left wing intellectuals eventually supported the authoritarian modernization programme of the July Revolution of 1952 It gives new insights into intellectual life during one of the most optimistic periods in Egyptian history a time when Egypt was at the height of its power and believed a whole new future lay before it uniting the Arab world and joining Asia and Africa in the common struggle for independence and dignity

Humanity and Uncontrollability Simon Susen,2024-08-14 Focusing on the work of Hartmut Rosa this book provides an in depth account of the extent to which we as humans are obliged to face up to the uncontrollability of the world Rosa is widely regarded as one of the most original contemporary European social theorists Along with the concepts of acceleration alienation and resonance the notion of uncontrollability Unverf gbarkeit ranks among the most important reference points in Rosa s critical theory especially in his recent work It is no accident then that following his extensive inquiries into acceleration and alienation and the publication of his magnum opus on resonance Rosa has found it necessary to offer a brief but powerful account of the place occupied by the concept of uncontrollability in his critical theory The first half of this book comprises a detailed outline of Rosa s central arguments on uncontrollability before moving in the second half to a thorough assessment of the most significant limitations of his approach This book will appeal to students and scholars of the social sciences and humanities particularly to those interested in social theory social philosophy and the history of ideas

Cultural Diversity and the Empowerment of Minorities Inke Du Bois,Nina Smidt,Sivan Spitzer Shohat,2007 Conflicts between different racial ethnic national and other social groups are becoming more and more salient One of the main sources of these internal conflicts is social and economic inequality in particular the increasing disparities between majority and minority groups Even societies that had been

successful in dealing with external conflicts and making the transition from war to peace have realized that this does not automatically resolve internal conflicts. On the contrary, the resolution of external conflicts may even sharpen the internal ones. This volume, a joint publication of the University of Haifa and the International Center for Graduate Studies (ICGS) at the University of Hamburg, addresses questions of how to deal with internal issues of social inequality and cultural diversity and at the same time how to build a shared civility among their different national, ethnic, religious, and social groups.

Developments in Sociology Robert Burgess, Anne Murcott, 2014-06-11. Appropriate as a supplemental text to courses in Sociology. Providing an overview grounded in research, *Developments in Sociology* focuses on the major areas of theoretical, methodological, and substantive developments in sociology. This textbook delivers a new thematic introduction to social theory that explores theoretical issues in their contemporary social contexts. Each chapter is devoted to a specific thematic area, including the state, governance, the economy, civil society, culture, language, knowledge, the self, emotions, the body, and social justice. Each chapter details the key issues for debate and the relevant theories while linking those debates and theories to everyday life. Distributed throughout the chapters are focused sections on key concepts and their research applications, alongside helpful additional detail, including a glossary, further suggested readings, chapter summaries, and questions for discussion. The book also provides useful information on key theoretical movements such as feminism, Marxism, and post-structuralism, as well as biographies of key theorists. As such, it reflects the breadth of social theory and its interdisciplinary nature by drawing on thinkers not just from sociology but also from philosophy, history, literature, geography, cultural, and gender studies. The book's logical structure and clear pedagogical features make it an appealing and accessible introductory text for students new to social theory. The chapters demonstrate the relevance of social theory to everyday life such that readers can understand and actively engage with key concepts. *Modernity at the Beginning of the 21st Century* Volker Schmidt, 2008-12-11. Modernity is back on sociology's agenda. From the beginnings of sociology as an academic discipline, questions surrounding the meaning and consequences of modernity have fascinated generations of sociologists. The initial interest in the concept was inspired by a sense of a deep rupture and crisis afflicting European society, a sense that society was approaching something fundamentally different from the past: an entirely new form of societal organization that bore little resemblance to anything known before. Where exactly this transformation was headed was by no means clear, but around the 18th century a growing number of European intellectuals and scholars realized that the changes that had been in the making since the late 15th century were irreversible and could not be contained in any particular region or confined to particular sectors of society but would ultimately transform all spheres of life. Like other thinkers, sociologists observed this transformation with awe, and their attitude towards it has always been ambivalent. The 20th century, during which modernity gradually began to break through

globally was also a century during which many sociologists became increasingly disillusioned with the promises of the modern project. But with the exhaustion of the energies of postmodernism the intellectual movement that wanted to bury modernity the interest in modernity began to resurface again not least because it became increasingly clear that the world is far from approaching a societal condition pointing systematically beyond modernity. Instead we are witnessing an intensification of modernization processes around the world. But what is modernity anyway? The aim of the present volume is to contribute to the ongoing discussion about the meaning of modernity and about the significance of modernization processes in non-Western societies. As befits a subject matter as controversial and complex as this one the book's chapters offer no conclusive answers to the questions they raise and address. The debate about modernity must and will continue and one hopes that it will be conducted in an atmosphere of mutual respect despite sometimes fierce disagreement between the participants. For only if we listen to each other can we make genuine intellectual progress.

Curating Difficult Knowledge E. Lehrer, C. Milton, M. Patterson, 2011-10-04 This volume inscribes an innovative domain of inquiry bringing museum and heritage studies to bear on questions of transitional justice, memory and post-conflict reconciliation. As practitioners, artists, curators, activists and academics the contributors explore the challenges of bearing witness to past conflicts.

Globalized Knowledge Flows and Chinese Social Theory Xiaoying Qi, 2014-01-21 This book considers the nature and possibilities of conceptual change and transformation under conditions of globalization especially with regard to Chinese social and cultural concepts. It argues that the influence of globalization promotes the spread of West European and American social science concepts and methods at the expense of local concepts and approaches and at the same time paradoxically provides opportunities for the incorporation of local concepts including Chinese concepts into Western or mainstream social science.

Higher Education and the Challenge of Sustainability Peter Blaze Corcoran, Arjen E.J. Wals, 2007-05-08

Sustainability challenges universities around the world to rethink their missions and to re-structure their courses, research programs and life on campus. Graduates are increasingly exposed to notions of sustainability which are emotionally, politically, ethically and scientifically charged. They must be able to deal with conflicting norms and values, uncertain outcomes and futures and a changing knowledge base. At the same time they will need to be able to contextualize knowledge in an increasingly globalized society. This book provides a variety of valuable theoretical and practical resources for students, teachers, researchers and administrators who seek to integrate sustainability in higher education. Sustainability is not only explored as both an outcome and a process of learning but as a catalyst for educational change and institutional innovation. The book raises the various problematics related to this inchoate field and provides an intellectual history and critical assessment of the prospects for institutionalizing sustainability in higher education.
