moves such as the academies programme in England and charter schools in the United States It draws on recent studies of a distinct new phase in Australian school reform the creation of independent public schools IPS in Western Australia and Queensland and global policy moves in public education in order to provide a truly international dialogue and debate on these matters This book moves beyond critique It innovatively brings together Australian and international perspectives and a rich range of diverse theoretical lenses practice philosophy feminism gender relational and postmodernism As such it provides a crucial forum for illuminating alternate ways to conceptualise educational leadership policy and social justice as resources for hope

**EBOOK: ENGAGING TEACHERS** Trevor Gale,Kathleen Densmore,2003-04-16 This is a useful interesting and valuable work The authors ask the difficult questions and attempt answers which although complex are written in an accessible and open manner It deserves to be widely read Educational Review Engaging Teachers makes a deliberate attempt to reclaim the education discourse captured by new right politics and connect it with a radical democratic agenda for schooling On its agenda are education markets policy leadership professionalism and communities Engaging with these is conceived on at least two levels First as an invitation to teachers to become involved in reconstructing schooling for socially just purposes and in democratic ways From this perspective the

politics of engagement is not simply a matter of acquiescence or resistance but is informed by a commitment to generate alternatives teachers parents and students making things happen rather than having things done to them Also signalled is an intent to work collectively exploring and acting on common interests and across uncommon ground Second the book also celebrates teachers engaging in these reconstructive efforts in attractive and meaningful ways The attraction is decisions about schooling made by those they affect as well as decisions that are meaningful because they engage the interests of all

**Engaging Teachers** Gale, Trevor, Densmore, Kathleen, 2003-04-01 Engaging Teachers makes a deliberate attempt to reclaim the education discourse captured by new right politics and connect it with a radical democratic agenda for schooling On its agenda are education markets policy leadership professionalism and communities Engaging with these is conceived on at least two levels

Educational Leadership Relationally Scott Eacott, 2015-01-19 Educational leadership management and administration has a rich history of epistemological and ontological dialogue and debate However in recent times at least since the publication of Colin Evers and Gabriele Lakomski's trilogy knowing exploring and doing educational administration there has been a distinct dearth Educational Leadership Relationally explicitly returns matters of epistemology and ontology to the centre of the discussion Through a sustained and rigorous engagement with contemporary thought and analysis Scott Eacott articulates and defends a relational approach to scholarship in educational leadership management and administration Eacott belongs to a group of scholars in educational administration who could be called meta sociologist This group blends sociology historical revisionism managerial theories and general philosophy to emphasise the relevance of sociological analysis in the field of educational administration Proposing a relational turn Eacott outlines a methodological agenda for constructing an alternative approach to educational leadership management and administration scholarship that might be persuasive beyond the critical frontier The relational research programme is arguably the most ambitious agenda in educational leadership management and administration coming out of Australia since Colin Evers and Gabriele Lakomski's natural coherentism and Richard Bates Critical Theory of Educational Administration As a research agenda it engages with the centrality of administration in constructions of the social world the legitimation of popular labels such as leadership the inexhaustible and inseparable grounding of administrative labour in time and space and overcomes contemporary tensions of individualism collectivism and structure agency to provide a productive rather than merely critical space to theorise educational leadership management and administration

**The International Handbook on the Sociology of Education** Carlos Alberto Torres, Ari Antikainen, 2002-12-10 The twentieth century has been marked by the expansion of educational opportunities worldwide It has been the century of education and the role of the state in the promotion of public education has been decisive Yet at the millennium's turn efforts to diminish the role of the state are rapidly changing education especially in terms of its role in democracy This comprehensive handbook offers a fresh view of the social context of education outlining the challenges as well as the advances in public and private education systems The book offers a

systematic account of current social theory and methodologies applied perspectives on the development of education in many regions of the world and compares key themes such as access school choice equity and educational performance **A Class Act** Susan Robertson, 2017-09-29 This book offers an original and challenging theoretical and empirical approach to mapping the changing nature of teachers work historically and in the contemporary period It is an attempt to understand how and in what ways teachers work has changed following the demise of the post war settlement and the imminent collapse of teachers project of professionalism secured through solidaristic strategies such as unionism Dr Robertson argues that in order to understand these issues a more rigorous set of conceptual tools around social class occupational power and worker control is needed The first two sections of the book set out to address that problem The final section elaborates on the changing contexts and conditions for contemporary teachers more generally and argues that structural and ideological changes within educational provision have led to differing capacities in the realization of class assets
