The Myth of the North American City Michael Goldberg, John Mercer, 2011-11-01 The continuing tendency to continentalize Canadian issues has been particularly marked in the area of urban studies where United States based research findings methodologies and attitudes have held sway In this book Goldberg and Mercer demonstrate that the label North American City as widely used is inappropriate and misleading in discussion of the distinctive Canadian urban environment Examining such elements of the cultural context as mass values social and demographic structures the economy and political institutions they reveal salient differences between Canada and the United States One of the most important of the many contextual differences is the strong collective sense in Canada which accepts more public intervention in social and economic matters in contrast to the American commitment to individualism Canadians consequently expect a livable central city which is compact and well served by public transit and which has a fiscally sound local government To demonstrate these issues the discussion includes a detailed cross national empirical analysis of over 300 North American metropolitan areas along some three dozen dimensions including density transportation household change and structure income and fiscal disparities and economic structure Since much urban planning in Canada is based upon the continentalist assumption this volume should generate a reassessment of policy and encourage the development of a research base to suit the distinctiveness of the Canadian experience With growing pressures to take a North American view of Canadian policies it is vitally important that the differences delineated in this book are understood not just for their urban policy implications but for broader purposes as well Urban Regeneration Peter Roberts, Peter W. Gentrification and Resistance Ilse Helbrecht, 2017-12-06 Gentrification is arguably the most dynamic area of conflict in current urban development policy it is the process by which poorer populations are displaced by more affluent groups Although gentrification is well documented German and international research largely focuses on improvements in the built environment and social composition of neighbourhoods The consequences for those who are displaced often remain overlooked Where do they move What does it mean to be forced to leave a familiar residential area What kinds of resistance strategies are developed How does anti gentrification work With a focus on Berlin the German capital of gentrification the chapters in this volume use innovative methods to explore these pressing questions

Socio-Economic Segregation in European Capital Cities Tiit Tammaru, Maarten van Ham, Szymon Marcińczak, Sako Musterd, 2015-07-24 Growing inequalities in Europe are a major challenge threatening the sustainability of urban communities and the competitiveness of European cities While the levels of socio economic segregation in European cities are still modest compared to some parts of the world the poor are increasingly concentrating spatially within capital cities across Europe An overlooked area of research this book offers a systematic and representative account of the spatial dimension of rising inequalities in Europe This book provides rigorous comparative evidence on socio economic segregation from 13 European cities Cities include Amsterdam Athens Budapest London Milan Madrid Oslo Prague Riga Stockholm Tallinn Vienna and Vilnius Comparing 2001 and 2011 this multi factor approach links segregation to four underlying universal structural factors social inequalities global city status welfare regimes and housing systems Hypothetical segregation levels derived

from those factors are compared to actual segregation levels in all cities Each chapter provides an in depth and context sensitive discussion of the unique features shaping inequalities and segregation in the case study cities The main conclusion of the book is that the spatial gap between the poor and the rich is widening in capital cities across Europe which threatens to harm the social stability of European cities This book will be a key reference on increasing segregation and will provide valuable insights to students researchers and policy makers who are interested in the spatial dimension of social inequality in European cities Chapters 1 and 15 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 3 0 license
