Blount, 1975 Presents detailed articles that shed light upon the ritual and social elements of verbal behavior **Language Change in Child and Adult Hebrew** Dorit Diskin Ravid, 1995-08-17 The study of language acquisition has taken on new meaning in the last decade Now seen as part of the study of other forms of language variation across time and space such as dialects and sociolects and the study of pidgins and Creoles it can help to provide a new understanding of how language evolves and what directs its development Dorit Ravid here provides a study of contemporary speakers of Hebrew focusing in particular on inflectional morphology She traces language development from childhood to adulthood in Hebrew speakers and explores strategies of language acquisition and language processing leading to variation in the spoken Hebrew of speakers of different ages and socioeconomic backgrounds **Linguistics Across Historical and Geographical Boundaries** Dieter

Kastovsky, A. J. Szwedek, Barbara Płoczińska, 1986 *Language and Context* Helen Leckie-Tarry, 1995-01-01 Language and Context breaks new ground in our understanding of the relationship between register genre and context Leckie Tarry argues convincingly and engagingly for a functional theory of language which specifies register in terms of contextual and linguistic features and which suggests a discursive relationship between the two Moving beyond the limits of much of today's theory this accessible volume develops a theoretical understanding of the relationship between text context language function and linguistic form Helen Leckie Tarry a specialist in the area of register and applied linguistics died in 1991 aged 49 Although she had finished a large part of this work her notes and draft chapters have been extensively edited by Professor David Birch David Birch is currently Professor of Communication and media Studies at Central Queensland University Australia and previously taught at Murdoch University Western Australia and the National University of Singapore **Language,**

Identity, and Marginality in Indonesia Joel C. Kuipers, 1998-09-10 Indonesia's policy since independence has been to foster the national language. In some regions local languages are still political rallying points but their significance has diminished and the rapid spread of Indonesian as the national language of political and religious authority has been described as the miracle of the developing world. Among the Weyewa on the island of Sumba this shift has displaced a once vibrant tradition of ritual poetic speech which until recently was an important source of authority, tradition and identity. But it has also given rise to new and hybrid forms of poetic expression. This first study to analyse language change in relation to political marginality argues that political coercion or cognitive process of style reduction may partially explain what has happened but equally important in language shift is the role of linguistic ideologies.

The Social and Psychological Contexts of Language R. N. St. Clair, H. Giles, 2013-05-13 Published in the year 1982 *The Social and Psychological Contexts of Language* is a valuable contribution to the field of Social Psychology.

Meaning, Discourse and Society Wolfgang Teubert, 2010-03-25 *Meaning, Discourse and Society* investigates the construction of reality within discourse. When people talk about things such as language, the mind, globalisation or weeds, they are less discussing the outside world than objects they have created collaboratively by talking about them. Wolfgang Teubert shows that meaning cannot be found in mental concepts or neural activity as implied by the cognitive sciences. He argues instead that meaning is negotiated and knowledge is created by symbolic interaction, thus taking language as a social rather than a mental phenomenon. Discourses Teubert contends can be viewed as collective minds enabling the members of discourse communities to make sense of themselves and of the world around them. By taking an active stance in constructing the reality they share, people thus can take part in moulding the world in accordance with their perceived needs.

Linguistics of Vietnamese Daniel Hole, Elisabeth Löbel, 2013-05-28 The present collection of articles grew out of a workshop on Vietnamese linguistics in 2009 at the University of Stuttgart, Germany. To our knowledge, no workshop with a comparable scope has been held outside of Vietnam for the past 20 years or even longer. Given the important typological status of Vietnamese as a paradigm case of an isolating language, the volume covers the most relevant fields in linguistics: syntax, semantics, phonology and the lexicon. A guiding principle in assembling the chapters for this volume has been to take an inclusive stance as far as the commitment to different frameworks and research methodologies is concerned. All the contributors are proponents of recent developments in their individual areas of specialization. The editors have taken special care to cater for a readership which should be as broad as possible. This means that each contribution is self-contained and does not presuppose any knowledge of Vietnamese. The volume is recommended to general linguists, comparative linguists, typologists and to researchers specializing in languages of East and South East Asia.

The Ethnography of Communication Muriel Saville-Troike, 2008-04-15. The Ethnography of Communication presents the terms and concepts which are essential for discussing how and why language is used and how its use varies in different cultures. Presents the essential terms and concepts introduced and developed by Dell Hymes and others and surveys the most important findings and applications of their work. Draws on insights from social anthropology and psycholinguistics in investigating the patterning of communicative behavior in specific cultural settings. Includes two completely new chapters on contrasts in patterns of communication and on politeness power and politics. Incorporates a broad range of examples and illustrations from many languages and cultures for analyzing patterns of communicative phenomena.

Readings in Creole Studies Ian F. Hancock, 1979-01-01. Creole studies embrace a wide range of disciplines: history, ethnography, geography, sociology etc. The phenomenon of creolization has come to be recognized as widespread; creolization presupposes contact and that is a human universal. The present anthology discusses social, historical and theoretical aspects of over twenty pidgins and creoles. Part one deals with general theoretical issues, especially those relating to pidgin language formation and expansion. Part two deals with those pidgins and creoles lexically related to indigenous African languages and with incipient features of creolization in African languages themselves. Part three with those related to Romance languages and part four with those

related to English Throughout the volume several current debates are taken up including the still unsettled issues of creole language origins and classification **Proceedings of Methods XIII** Barry Heselwood, 2010 This volume of papers from the 13th International Conference on Methods in Dialectology held at the University of Leeds in 2008 collects together current research and recent methodological developments in the study of dialects by new and established scholars It is organised into themed sections reporting on historical dialectology dialect literature the production of dialect maps and atlases and the collection and organisation of material for dialect dictionaries and corpora Perceptual dialectology and dialect intelligibility are also featured and there are linguistic analyses of dialectal data from many language varieties

The Acquisition of Numeral Classifiers Kasumi Yamamoto, 2011-05-03 The book is about the numeral classifier system and the acquisition of Japanese classifiers by Japanese children It consists of two parts First it provides a general typological characterization of numeral classifier phrases and discusses problems in determining what constitutes the nature of classifiers It also discusses the semantic properties of numeral classifiers based on an analysis of four languages from four different language families Second it examines the acquisitions of Japanese numeral classifiers by Japanese preschool children ages 3 to 6 with a primary emphasis on the development of comprehension The importance of the study is that it reveals that young children have a much greater sensitivity to the conceptual underpinnings of the numeral classifier system than was previously considered to be the case The research results also provide a converging source of evidence that young children often come to initially grasp the structure of the world in ways that are better understood in cognitive than perceptual terms The implications will contribute to not only the area of language acquisition but also categorization and conceptual development
