Science and Technology Education and Communication Maarten C. A. van der Sanden, Marc J. de Vries, 2016-11-25 Science technology education on the one hand and communication on the other are to a large extent still separate worlds and many opportunities for synergy and cross fertilisation are yet unused This divide is unfortunate since educators need communication skills and communicators often use aspects of education in their strategies Moreover innovation processes in both domains ask for education and communication insights and skills Therefore scholars

and practitioners in both domains must seek connections and synergy by exchanging insights and ideas This book discusses the shared aims of science technology education and communication such as science literacy and engagement as well as common processes and challenges such as social learning social design and professionalisation and assessment Aims processes and challenges that inspire enhance and deepen the education and communication synergy from a theoretical and practical side If one reads the various chapters and reflects on them from one's own perspective as a scholar or practitioner the question is no longer if cross fertilisation and synergy are needed but when are we seriously going to take up this challenge together This book aims to initiate the dialogue that the situation in the development of the topic requires at this point

Explaining Law Larry D. Barnett,2015-08-04 Sociologist lawyer Larry D Barnett advances the macrosociological thesis that in nations that are structurally complex and democratically governed concepts and doctrines of law on society central social activities are fashioned by society level conditions not by particular or even prominent individuals Because a substantial body of social science research has found that law in a modern nation does not have a large permanent effect on the frequency of such activities the book contends that the content of law on the activities is a product not a determinant of the society in which the law exists Explaining Law bolsters this contention with several original studies and illustrates types of quantitative evidence that can be used to build a macrosociological theory of law **From Society to System** Michel Freitag,2022-10-27 From Society to System presents sociologist Michel Freitag s 1935 2009 distinctive multifaceted and interdisciplinary work Elaborated within the grand sociological tradition his dialectical sociology redefines sociality as the realm of the symbolic to pinpoint its ontological frailty Such a perspective expands the borders within sociology to rejoin classical philosophical preoccupations revisiting social ontology as a radical critique of contemporary society where not only life and planet earth is at stake as a result of capitalism but reflexivity as well This collection of essays touches on topics that have been of central concern for social theory since the end of the 20th century the discussion about holism versus individualism and the dissolution of transcendental identity the current state of the social sciences both epistemologically and practically the end of 20th century debate over the nature of society along with its future in the context of globalisation These essays show how Freitag s sociology is part of a larger unified framework that integrates ontology epistemology anthropology and philosophy into a coherent vision of the world testifying to the distinctiveness of Freitag s social theory standing next to other great social theorists such as Margaret Archer J rgen Habermas Murray Bookchin and Ulrich Beck
