Sociological Measurement An Inventory Of Scales And:

Sociological Measurement Charles M. Bonjean, Richard J. Hill, S. Dale MacLemore, 1967

Health Measurement

Scales David L. Streiner, Geoffrey R. Norman, John Cairney, 2014-11-06 Clinicians and those in health sciences are frequently called upon to measure subjective states such as attitudes feelings quality of life educational achievement and aptitude and learning style in their patients This fifth edition of *Health Measurement Scales* enables these groups to both develop scales to measure non tangible health outcomes and better evaluate and differentiate between existing tools *Health Measurement Scales* is the ultimate guide to developing and validating measurement scales that are to be used in the health sciences The book covers how the individual items are developed various biases that can affect responses e g social desirability yea saying framing various response options how to select the best items in the set how to combine them into a scale and finally how to determine the reliability and validity of the scale It concludes with a discussion of ethical issues that may be encountered and guidelines for reporting the results of the scale development process Appendices include a comprehensive guide to finding existing scales and a brief introduction to exploratory and confirmatory factor analysis making this book a must read for any practitioner dealing with this kind of data

Measurements in the Social Sciences Hubert M. Blalock, 1974 Among the frustrations constantly confronting the social scientist are those associated with the general process of measurement The importance of good measurement has long been recognized in principle but it has often been neglected in practice in many of the social sciences Now that the methodological tools of multivariate analysis simultaneous equation estimation and causal modeling are diffused more widely into the social sciences and now that the very serious implications of random and non random measurement errors are being systematically investigated it is all the more important that social scientists give top priority to the quality of their data and the clarity of their theoretical conceptualizations as well as to methods for analyzing fallible data This book deals with selected problems of measurement and is written for graduate students and professional social scientists particularly in the technically less developed fields of sociology political science and anthropology The book is organized so that in general one proceeds from problems of data collection to those of data analysis It is not intended to be a complete work covering all types of measurement problems that have arisen in the social sciences Instead it represents a series of studies of topics that are deemed to be crucial for the advancement of social science research but which have not received sufficient attention in most of the social sciences The basic purpose is to stimulate further methodological research on measurement and to study the ways in which knowledge that has been accumulated in some fields may be generalized so that it may be applied to others The book is divided into three major parts Part I is concerned with applying scaling approaches developed in psychometrics to problems that arise in other social sciences The focus is on finding better ways to ask questions of respondents so as to raise the level of measurement above that of simple ordinal scales Part II focuses on multiple indicator theory and strategies as applied to relatively complex models and to change data In this section the

emphasis shifts to how one analyzes fallible data through the construction of explicit measurement error models Part III deals with the statistical analysis of ordinal data including the interpretation and empirical behaviors of various ordinal measures of association The final chapter written by the editor discusses how ordered metric assumptions may be used to make more powerful predictions than those characterizing much of contemporary social science H M Blalock Jr 1926 1991 was Professor Department of Sociology the University of Washington Seattle He was recipient of the 1973 ASA Samuel Stouffer Prize and was a Fellow of the American Statistical Association and the American Academy of Arts and Sciences and is a member of the National Academy of Sciences He was the 70th president of the American Sociological Association

Sociological Methods Norman K. Denzin, 2017-07-12 A comprehensive collection of contemporary and classical readings on sociological method this book provides students with systematic analyses of each of the major strategies employed in sociological research It may be used as a supplement or as the basic set of readings for all courses in methods The book contains thirteen sections dealing with theory and its development issues of sampling units problems of developing new measurement techniques difficulties surrounding the interview with special emphasis on interviewing deviant hostile and silent respondents the nature of causation and a review of the major methods of proof available to the sociologist Actual research studies focusing in turn on the experiment the survey participant observation life histories and unobtrusive analysis are also included Each section is preceded by an introduction that defines the major issues in each paper offers a discussion of problems not covered explicitly in the readings and in general shows how each paper contributes to a view of interactional research processes Because of its interactional approach its use of classic articles its anticipation of problems not yet formulated clearly in the literature its illustrations of how social organizations may be studied its inclusion of articles relevant to the social psychology of experiments and its new statements on the ethics of research this book will be invaluable in methods courses Especially when used in conjunction with its companion text *The Research Act* the book provides perhaps the most original and most useful compendium available to students today *Research Instruments in Social Gerontology*, 1982 *Surveys in Social Research* D. A. De Vaus, 2002 As well as explaining how to conduct effective social research surveys the author of *Surveys in Social Research* provides a range of tools to enable the reader to become a critical consumer of research findings

Surveys in Social Research David de Vaus, 2013-01-11 This work provides advice on how to plan conduct and analyze social surveys It emphasizes the links between theory and research the logic and interpretation of statistics and the practices of social research The fifth edition includes a new chapter on ethics and a glossary It assumes no background in statistical analysis and gives readers the tools they need to come to grips with this often confusing field

Profile and Measurement of Social Well-being Indicators for Use in the Evaluation of Water and Related Land Management Planning Patricia K. Guseman, Kathryn T. Dietrich, 1978 As a part of the continuing development of the Water Resources Assessment Methodology WRAM this report focuses on the Social Well Being SWB account as defined by the

Water Resource Council's Principles and Standards An outline of SWB categories subcategories and variables as interpreted from Principles and Standards is included In addition for selected variables definitions information about measurement and suggestions for prediction are provided It is noted that although the set of variables discussed in this report assists in defining SWB the list is tentative not exhaustive and is intended for use within the framework of WRAM The particulars of each planning study and the judgment of professionals and publics will dictate omission of some variables and inclusion of others Author Household Survey Manual, 1969 United States. Bureau of the Budget. Office of Statistical Policy, 1970

Household Survey Manual United States. Bureau of the Budget, 1969 *Handbook of Research Design and Social Measurement* Delbert Charles Miller, 1983 Assessment of Biological Mechanisms Across the Life Span Lisabeth F. DiLalla, Stephanie M. Clancy Dollinger, Stephanie MC Dollinger, 2013-06-17 Based on the First Biannual Lifespan Development Conference this volume offers a multidisciplinary and multidimensional approach to the study of lifespan development in the areas of neuropsychology cognition behavior genetics and perception The objective of the conference was to provide a lively forum for the discussion of issues related to lifespan development and to reflect on important topics challenging the field during the 1990s The chapters in this book motivated by the conference presentations cover the assessment and evaluation of developmental changes in visual perception the contribution of behavioral genetic factors to development the predictability of perinatal risk factors as they relate to cognitive and linguistic outcomes the neuropsychological changes during aging and innovative approaches to the study of cognitive development using neuropsychological testing methods *Theory and Methods in Sociology* John Hughes, Wes Sharrock, 2017-09-16 This book offers a guide to sociology that explores its theoretical and methodological dimensions Aiming to provide the reader with a sense of the reasoned character of the discipline it traces how different theories and methods relate to one another exploring the particular problems they spawn and the debates that have arisen in response *Social Support Measurement and Intervention* Sheldon Cohen, Lynn G. Underwood, Benjamin H. Gottlieb, 2000-10-19 Surgery and pharmaceuticals are not the only effective procedures we have to improve our health The natural human tendency to care for fellow humans to support them with social networks has proven to be a powerful treatment as well As a result the areas of application for social support intervention have expanded dramatically during the past 20 years As these areas have expanded so too has the literature on the theory and measurement of social support Yet the literature has focussed on very particular areas Investigators in the social sciences have mainly focused on the protection that social support confers in the context of stressful life events and transitions whereas studies in the health sciences have concentrated on the effects of social networks and supports on population mortality and morbidity Although no single theoretical framework has been widely accepted there is consensus that both the psychological sense of support and actual expressions of support play critical roles in maintaining health and well being This book is a state of the art resource for the selection and development of strategies

for social support assessment and intervention Designed for use by behavioral and medical scientists conducting studies of physical illness psychological adjustment and psychiatric illness in human populations this volume presents a broad conceptual framework addressing the role of social support in mental and physical health The book is divided into four sections The first provides some historical context as well as a conceptual overview of how social support might influence mental and physical health The second discusses techniques for measuring social networks and support and the third addresses the design of different types of support interventions The final section presents some general comments on the volume and its implications for social support research and intervention This resource is meant to aid researchers in understanding the conceptual criteria on which measurement and intervention decisions should be made when studying the relations between social support and health Furthermore the information provided on both measurement and intervention will be valuable to practitioners interested in designing and evaluating prevention and treatment initiatives Sponsored by the Fetzer Institute as a follow up to their successful 1995 publication *Measuring Stress* this book will provide the most up to date research on the effects of social support interventions on physical and mental health *Comparative Methods in Sociology* Ivan Vallier, 2023-11-10 The essays in this volume are intended to help social scientists do better comparative research and thereby to improve our possibilities for creating more satisfactory explanations or theories These broad aims are advanced throughout the book in several ways 1 by an identification and assessment of the methodological strategies of exceptionally important comparativists past and present 2 by an explication and refinement of logics of procedure that are central to many types of comparative research 3 by a presentation of new research models that link or bridge heretofore separate lines of comparative inquiry and 4 by the definition of methodological criteria by which theories and conceptual frameworks can be more fruitfully related to and qualified by comparative studies Specific problems such as comparability causal inference conceptualization measurement and sampling are addressed in various sections of particular essays From the Preface This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1971 *Handbook of Research Design and Social Measurement* Delbert C. Miller, Neil J. Salkind, 2002-01-16 If a student researcher had only one handbook on their bookshelf Miller and Salkind's Handbook would certainly have to be it With the updated material the addition of the section on ethical issues which is so well done that I'm recommending it to the departmental representative to the university IRB and a new Part 4 on Qualitative Methods the new Handbook is an indispensable resource for researchers Dan Cover Department of Sociology Furman University I have observed that most instructors want to teach methodology their way to imbue the course with their own approach Miller Salkind allows one to do this easily The book is both conceptually strong e.g. very good coverage of epistemology research

design and statistics and at the same time provides a wealth of practical knowledge scales indices professional organizations computer applications etc In addition it covers the waterfront of methodology Michael L Vasu Director of Information Technology North Carolina State University A unique and excellent reference tool for all social science researchers and a good textbook for graduate students and senior year undergraduate classes These students are about to enter the real life of research and need a handy and comprehensive tool as a starting point that offers shortcuts for getting into real research projects For a small project the book offers enough information to get the project started For big projects the book is ideal for information on where to look for things and examples Jianhong Liu Department of Sociology Rhode Island College The book considered a necessity by many social science researchers and their students has been revised and updated while retaining the features that made it so useful The emphasis in this new edition is on the tools graduate students and more advanced researchers need to conduct high quality research Features Benefits Provides step by step instruction for students research training by beginning with how to find a creative idea a middle range theory and initial hypothesis and proceeds through design proposal collection and analysis of data followed by writing reporting and publication Section on scales and indices are organized so that readers can quickly locate and find the type of scale or index in which they may be interested All sections are now followed by useful and well considered reference sections so that readers can read more about each topic Includes updated coverage on new scales internal and external validity and new analytic techniques with extensive references on each Presents extensive coverage of how to prepare manuscripts for publication including a list of all journals covered by Sociological Abstracts along with the editorial office address and URL for each entry Discusses the importance of policy research with presentation and discussion of specific models as an adjunct to both applied and basic research techniques Provides extensive coverage of funding opportunities including those offered by the National Institutes of Health the National Science Foundation and a directory of private funding sources including relevant contact information New to this edition New Part 4 by John Creswell and Ray Maietta provides a comprehensive introduction to qualitative methods including a review of existing computer applications for collecting and analyzing data New and more current reviews and commentaries have replaced dated or no longer relevant excerpts Thousands of new references on the assessment of important sociological variables as well as references to such topics as statistical analysis computer applications and specific topics Thoroughly updated information on the use of computers and online research techniques including beginning and intermediate material about the Internet and its use by the modern research scientist Coherent and thoughtful review of the most popular statistical analysis software packages New guidelines and discussion of ethical practices in social and behavioral science research including extensive coverage of institutional review board procedures and activities Expansion of social indicators to include international coverage Plus there is an extensive and well organized table of contents with four levels of headings and for the first time in the history of the book a comprehensive index Paradigms and Fairy Tales

Julienne Ford,2020-10-28 This book is an introduction to the epistemology and practice of social science It provides an exposition and critique of the ideology and practice of social science and an examination of the professional social scientist as a manipulator of ideas and appearances Social Research Bernard S. Phillips,1971 *Designing Educational Project and Program Evaluations* David A. Payne,2012-12-06 Drawing upon experiences at state and local level project evaluation and based on current research in the professional literature Payne presents a practical systematic and flexible approach to educational evaluations Evaluators at all levels state local and classroom will find ideas useful in conducting managing and using evaluations Special user targets identified are state department of education personnel and local school system administrative personnel The volume can be used by those doing evaluation projects in the field or as a text for graduate courses at an introductory level The book begins with an overview of the generic evaluation process Chapter Two is devoted to the criteria for judging the effectiveness of evaluation practice Chapter Three addresses the all important topic of evaluation goals and objectives Chapters Four Five and Six basically are concerned with the approach framework or design of an evaluation study Chapter Four contains a discussion of four major philosophical frameworks or metaphors and the implications of these frameworks for conducting an evaluation Chapters Five and Six describe predominantly quantitative and qualitative designs respectively Design implementation and operational issues related to instrumentation Chapter Seven management and decision making Chapter Eight and reporting and utilization of results Chapter Nine are next addressed The final chapter of the book Chapter Ten considers the evaluation of educational products and materials *American Sociological Review* ,1936 Includes sections Book reviews and Periodical literature
