## **Sociology Environmentalism Globalization Reinventing The Globe:**

**Sociology, Environmentalism, Globalization** Steven Yearley, 1996-04-04 This authoritative book brings together the sociologies of globalization and the environment in one volume Steven Yearley argues that environmental issues have received scant attention in the general debate on globalization even though environmentalists have been very successful in capturing the language and imagery of the globe

*Nature and Sociology* Tim Newton, 2007-08-07 This book engages with and contests the new sociology of nature It moves beyond existing debates by presenting new social theory and working across current fields of interest addressing the debate on new genetics and genomics taking human biology seriously and the issues of interdisciplinarity that are likely to arise in longer term attempts to work across the social and natural world *Nature and Sociology* will be of great interest to students of a variety of disciplines including sociology and social science human geography social and biological anthropology and the natural sciences

**From Precaution to Profit** Brian Gareau, 2013-01-29 This book challenges the oft cited belief that the Montreal Protocol remains an exemplary global environmental agreement Through a sociological analysis of the political decision making process and controversies generated at Montreal Protocol meetings the book documents new ways global environmental governance is organized based on neoliberal ideals The book shows how neoliberalism as a dominant discourse and economic practice has become increasingly embedded in the Montreal Protocol and how global powers are able to act protectionist amid that discourse The book demonstrates how recent controversies involve much more than just economic protectionism per se it also involves the protection of the legitimacy of certain forms of scientific knowledge It traces the rise of a new form of disagreement between global powers members of the scientific community civil society and agro industry groups signaling the negative impact of neoliberal policies on ozone politics and global environmental governance more broadly The book reveals how global civil society groups involved in the Montreal Protocol are affected by the neoliberal discourse which has left them relatively ineffective in their efforts to push for environmental protection

*Environmental Literacy and the Teaching of English* Uwe Küchler, 2025-09-01 How can foreign language education be the spark that ignites environmental awareness and sustainability This book offers a humanities approach to this topic highlighting the potential of language literature culture and media communication to enrich environmental discussions It examines foreign language education and explores related fields such as environmental humanities environmental education and education for sustainable development It also investigates ecolinguistics ecocriticism and cultural ecology The book presents a framework for environmental literacy in foreign language teaching providing a unique perspective on the role of foreign language education in promoting sustainability environmental awareness and critical thinking ultimately nurturing more hopeful paths for a sustainable future

*The Global Emergence of Constitutional Environmental Rights* Joshua C. Gellers, 2017-05-18 Over the past 40 years countries throughout the world have similarly adopted human rights related to environmental governance and protection in

national constitutions Interestingly these countries vary widely in terms of geography politics history resources and wealth This raises the question why do some countries have constitutional environmental rights while others do not Bringing together theory from law political science and sociology a global statistical analysis and a comparative study of constitutional design in South Asia Gellers presents a comprehensive response to this important question Moving beyond normative debates and anecdotal developments in case law as well as efforts to describe and categorize such rights around the world this book provides a systematic analysis of the expansion of environmental rights using social science methods and theory The resulting theoretical framework and empirical evidence offer new insights into how domestic and international factors interact during the constitution drafting process to produce new law that is both locally relevant and globally resonant Scholars practitioners and students of law political science and sociology interested in understanding how institutions cope with complex problems like environmental degradation and human rights violations will find this book to be essential reading

Environmental Justice Paul Thompson, 2017-09-29 Environmental justice is one of the most controversial and important issues in contemporary social science Volume 8 of the Energy and Environmental Policy series challenges our understanding of environmental justice in a global context It includes theoretical investigations and case studies by leading authors in the field Global forces of technology and the development of global markets are transforming social life and the natural order These changes require a critical examination of nature society relations Increasingly modernization assigns the risks of modernity to those with the least power and greatest vulnerability to environmental harm Conventional environmentalism which focuses on critique of the effects of humanity against nature is inadequate to the challenges of globalization In particular it fails to explain sources of persistent patterns of social injustice that accompany escalating environmental exploitation As the capacity for environmental destruction expands broader concerns about environmental injustice have come to the fore including awareness of threats to whole cultures ways of life and entire ecologies The volume's authors consider the links between expanded patterns of environmental injustice and the structures and forces underlying and shaping the international political economy Environmental injustice is examined across a variety of cultures in the developed and developing world Through case studies of climate colonialism revolutionary ecology and environmental commodification the global and local dimensions of the problem are presented The latest volume in this important series demonstrates that environmental justice cannot be reduced to simple parables of indifference prejudice or appropriation It forges understanding of environmental injustice as a development of international political economy itself Likewise initiatives on behalf of environmental justice are seen as elements of broader movements to secure self determination in a globalizing world This book will be of interest to policymakers energy and environmental experts and all those interested in the environment and environmental law It provides new perspectives on the place of environmental justice in international political and economic conflict      **Companion to Environmental Studies** Noel Castree, Mike Hulme, James D.

Proctor,2018-05-01 Companion to Environmental Studies presents a comprehensive and interdisciplinary overview of the key issues debates concepts approaches and questions that together define environmental studies today The intellectually wide ranging volume covers approaches in environmental science all the way through to humanistic and post natural perspectives on the biophysical world Though many academic disciplines have incorporated studying the environment as part of their curriculum only in recent years has it become central to the social sciences and humanities rather than mainly the geosciences The environment is now a keyword in everything from fisheries science to international relations to philosophical ethics to cultural studies The Companion brings these subject areas and their distinctive perspectives and contributions together in one accessible volume Over 150 short chapters written by leading international experts provide concise authoritative and easy to use summaries of all the major and emerging topics dominating the field while the seven part introductions situate and provide context for section entries A gateway to deeper understanding is provided via further reading and links to online resources Companion to Environmental Studies offers an essential one stop reference to university students academics policy makers and others keenly interested in the environmental question the answer to which will define the coming century

**The Business of Greening** Stephen Fineman,2017-10-19 The Business of Greening first published in 2000 debates the relationship between business and greening and the future form this relationship could take The book gives voice to industrial actors employees employers managers technical specialists regulators in the context of their organizations within industrial sectors or as part of wider institution regimes The business of greening is taken as socially constructed shaped through tensions and competing interests It produces outcomes that are sometimes unexpected sometimes hopeful These outcomes are explored by examining a range of workers including estate agents bankers bakers printers regulators in small and large corporations Contributors write from a wide range of different social sciences including sociology geography organizational science and psychology This title will be of particular interest to students and researchers of environmental and business studies and to those who shape environmental policy in government and industry

**Partnership and Leadership** T. de Bruijn,Arnold Tukker,2013-10-14 Sustainable development has become a central perspective in environmental strategies around the world It is clear that neither governments nor businesses have the capability to bring about sustainability on their own Therefore collaboration has emerged as a central concept At the same time it is obvious that someone has to take the lead in the development towards sustainability This book focuses on different forms of collaboration emerging between various actors The objective of the book is to more systematically explore the different roles and relationships between partnership and leadership Basically both partnership and leadership can be seen in a positive and negative way for example as far as partnership is concerned we can assume that the path towards sustainability can be paved by parties coming together taking some initiative collaborating On the opposite partnership and consensus based decisions can be seen as an obstacle to foster radical changes in production and consumption patterns

Similarly leadership can be seen as an obstacle to sustainable development if leaders form close circles and are not willing to share experiences with other actors but leadership could also be considered as an important element to keep concepts and practices forward The book holds this double perspective explaining mapping and analyzing different goals formats methods of more and less collaborative approaches but at the same time taking a critical approach to the theme by understanding related risks effects prospects and corrective actions Next to a conceptual part the book brings together case studies from around the world The focus is in describing and understanding various formats of collaboration and critically evaluating its effects and prospects A concluding chapter discusses the role of partnership and leadership in realizing various levels of environmental innovations optimization and re design that usually affect only a small part of the production consumption structure and much more complicated radical innovations that have to deal with societal sub systems The book is in part an edited version of selected papers presented during the 1998 Greening of Industry Conference in Rome on the subject enriched with contributions of other invited authors *Metaphors for Environmental Sustainability* Brendon

Larson, 2011-06-07 Scientists turn to metaphors to formulate and explain scientific concepts but an ill considered metaphor can lead to social misunderstandings and counterproductive policies Brendon Larson observes in this stimulating book He explores how metaphors can entangle scientific facts with social values and warns that particularly in the environmental realm incautious metaphors can reinforce prevailing values that are inconsistent with desirable sustainability outcomes *Metaphors for Environmental Sustainability* draws on four case studies two from nineteenth century evolutionary science and two from contemporary biodiversity science to reveal how metaphors may shape the possibility of sustainability Arguing that scientists must assume greater responsibility for their metaphors and that the rest of us must become more critically aware of them the author urges more critical reflection on the social dimensions and implications of metaphors while offering practical suggestions for choosing among alternative scientific metaphors *Global Futures* A. Brah, M. Hickman, M. Mac an Ghaill, 1999-04-30 Providing critical assessment of the globalization thesis through sustained analysis of the nexus of processes underlying social and cultural relations this book examines explores and teases out the many contradictions embedded within different discourses of globalization Together the various chapters in the collection offer a wide ranging critique of those accounts which represent globalization primarily if not exclusively as the classic story of European modernity with its attendant narratives of ostensibly unfettered movement of people unmitigated economic growth and social progress *Risk and Technological Culture* Joost Van Loon, 2013-01-11 The question as to whether we are now entering a risk society has become a key debate in contemporary social theory *Risk and Technological Culture* presents a critical discussion of the main theories of risk from Ulrich Becks foundational work to that of his contemporaries such as Anthony Giddens and Scott Lash and assesses the extent to which risk has impacted on modern societies In this discussion van Loon demonstrates how new technologies are transforming the character of risk and examines the relationship between

technological culture and society through substantive chapters on topics such as waste emerging viruses communication technologies and urban disorders In so doing this innovative new book extends the debate to encompass theorists such as Bruno Latour Donna Haraway Gilles Deleuze Felix Guattari and Jean Fran ois Lyotard

**Moralizing the Corporation** Boris Holzer,2010-01-01 Each chapter in this book by itself is a worthy contribution to the existing research on the TNC in a globalised world In spire Journal of Law Politics and Societies The argument of this book is so powerful and convincing because it focuses on global subpolitics the corporate ir responsibility the power of its critics and the consuming citizen This shift of perspectives and its sophistication makes Moralizing the Corporation a must read for anyone interested in the dynamics of globalization Ulrich Beck University of Munich Germany Moralizing the Corporation offers a multi disciplinary analysis of the conflicts between transnational corporations and transnational advocacy groups The book is theoretically sophisticated and full of interesting and nuanced empirical findings that generate new knowledge about the relationship between politics and markets It views transnational corporations as quasi public institutions and explains their vulnerability to the non state authority of political consumers and protest groups Holzer develops theory on transnational subpolitics and corporate reflexivity and should be read by scholars and activists alike Michele Micheletti University of Stockholm Sweden This insightful book examines how transnational corporations respond to the challenges of anti corporate activism and political consumerism In prominent cases involving major corporations such as Nestl Nike and Royal Dutch Shell transnational activists have successfully mobilized public opinion and consumers against alleged corporate misdemeanours Campaigns and boycott calls can harm a corporation s image but as this book points out public scrutiny also gives corporations the opportunity to present themselves as responsible and accountable corporate citizens who subscribe to the very norms and values propagated by the activists Academics scholars and postgraduate students in international business management organization studies social movement studies and political sociology will find this book invaluable

*A Future for Regional Australia* I. W. Gray,Geoffrey Lawrence,2001-07-31 This book interprets the predicament faced by Australia s regional people from their own perspective and proposes a means by which they can act together to find a secure future under globalisation It argues that neoliberalism in combination with its real world effects in economic policy are driving regional Australia further into social environmental and economic decay The book will be of great interest to all concerned about the future of regional Australia and will make a lively and relevant text for students studying the social sciences in the countryside or in the major cities

**The Voluntary Sector** Jeremy Kendall,2004-02-24 Serving as an introduction to the UK s voluntary sector this book builds on the foundations lain in an earlier book by Kendall and Dahrendorf Using a comparative approach to place the UK voluntary sector in perspective this book considers the scope scale structure and impact of the voluntary sector s activities on society Based on both qualitative and quantitative evidence this informative book includes statistical mapping of the sector as well as semi structured interviews conducted with voluntary sector policy

actors A much needed addition to the current literature The Voluntary Sector provides a theoretical framework and in depth analysis of an increasingly important area      **Framing Production** Paul Rosen,2002 A study of technological sociological and cultural changes in the British bicycle industry from the 1870s to the present      *Globalizing Issues* Erik Neveu,Muriel Surdez,2020-09-07 This book is an invitation to question conventional and often misleading visions of globalization No problem is global by nature issues are transformed by the action of claims makers to become problems debated in supra national forums triggering policy choices and policy transformations Contributions highlight how health issues environmental issues and or political issues are framed as global by a set of stakeholders scientific experts bureaucrats political parties or actors social movements social networks firms As the volume maps the social logic behind the globalization of problems it also presents an opportunity for the very cross disciplinary collaboration it calls for researchers mobilizing the agenda setting paradigm of issue globalization and those working within the social constructionist model are both represented here providing a unique opportunity to examine the dynamics of globalization from the perspectives of political media economic sociology international relations social movement studies and beyond      A Cross-Sectional Review: Description Of The Environmental Non-Governmental Organizations Between 1980-2000 In Turkey - Müge Ensari Özay - Andrzej Furman Müge Ensari Özay - Andrzej Furman,2021-02-01 This book aims to describe and classify environmental non governmental organizations in Turkey In the data gathering phase of the study face to face interviews were conducted with the staff and heads of environmental non governmental organizations panels and meetings were attended After reviewing alternative definitions and classifications of non governmental organizations the classification framework has been based on six main criteria legal structures objectives action areas orientations geographic distributions and relations with government Furthermore the study addresses the rapid growth of environmental non governmental organizations in number and diversity and explains the reasons of this increase as the changing policies of governments the increase in international financial aids to the NGOs and the growing environmental problems between 1980 and 2000      Globalising the Climate Stefan Aykut,Jean Foyer,Edouard Morena,2017-03-03 Frequently presented as a historic last chance to set the world on a course to prevent catastrophic climate change the 21st Conference of the Parties to the Climate convention COP21 was a global summit of exceptional proportions Bringing together negotiators scientists journalists and representatives of global civil society it also constituted a privileged vantage point for the study of global environmental governance in the making This volume offers readers an original account of the current state of play in the field of global climate governance Building upon a collaborative research project on COP21 carried out by a multidisciplinary team of twenty academics with recognised experience in the field of environmental governance the book takes COP21 as an entry point to analyse ongoing transformations of global climate politics and to scrutinise the impact of climate change on global debates more generally The book has three key objectives To analyse global climate governance through a combination of long term analysis and on sight observation To

identify and analyse the key spaces of participation in the global climate debate To examine the climatisation of a series of crosscutting themes including development energy security and migration This book will be of great interest to students scholars and policymakers of climate politics and governance international relations and environmental studies

**Governing the Air** Rolf Lidskog, Göran Sundqvist, 2011 Experts offer theoretical and empirical analyses that view the regulation of transboundary air pollution as a dynamic process Governing the Air looks at the regulation of air pollution not as a static procedure of enactment and agreement but as a dynamic process that reflects the shifting interrelationships of science policy and citizens Taking transboundary air pollution in Europe as its empirical focus the book not only assesses the particular regulation strategies that have evolved to govern European air but also offers theoretical insights into dynamics of social order political negotiation and scientific practices These dynamics are of pivotal concern today in light of emerging international governance problems related to climate change The contributors all prominent social scientists specializing in international environmental governance review earlier findings analyze the current situation and discuss future directions for both empirical and theoretical work The chapters discuss the institutional dimensions of international efforts to combat air pollution examining the effectiveness of CLRTAP Convention for Long Range Transboundary Air Pollution and the political complexity of the European Union offer a broad overview and detailed case studies of the roles of science expertise and learning and examine the missing link in air pollution policies citizen involvement Changing political conditions evolving scientific knowledge and the need for citizen engagement offer significant challenges for air pollution policy making By focusing on process rather than product learning rather than knowledge and strategies rather than interests this book gives a nuanced view of how air pollution is made governable
