information available in its central database On the elections day the voter inserts the card in any computer with connection to Internet at any place in the world the voter's eligibility is checked by the computer through a software against the information in the SSA database and then allowed to enter a National Electoral Website to vote in national state and local elections guided step by step by the computer It totally eliminates the problematic voter registration process and absentee ballot problems It eliminates over voting and under voting and voting more than once for any office It saves to the taxpayers at least 80 percent of the present electoral costs

Marx, Alienation and Techno-Capitalism Lelio Demichelis, 2022-08-05 In this book translated into English for the first time Lelio Demichelis takes on a modern perspective of the concept process of alienation This concept much more profound and widespread today than first described and denounced by Marx has largely been forgotten and erased Using the characters of Narcissus Pygmalion and Prometheus the author reinterprets and updates Marx Nietzsche Anders Foucault and in particular critical theory and the Frankfurt School views on an administered society where everything is automated and engineered manifest today in algorithms AI machine learning and social networking showing that in a world where old and new forms of alienation come together man is increasingly led to delegate i.e. alienate sovereignty freedom responsibility and the awareness of being alive

Capitalism and Democracy in the 21st Century Dennis C. Mueller, Uwe Cantner, 2013-03-09 Joseph Schumpeter oscillated in his view about the type of economic system that was most conducive to growth In his 1911 treatise Schumpeter argued that a more decentralized and turbulent industry structure where the process of creative destruction was triggered by vigorous entrepreneurial activity was the engine of economic growth But by 1942 Schumpeter had modified his theory arguing instead that a more centralized and stable industry structure was more conducive to growth According to Schumpeter 1942 p 132 under the managed economy there was little room for entrepreneurship because Innovation itself is being reduced to routine Technological progress is increasingly becoming the business of teams of trained specialists who turn out what is required to make it work in predictable ways p 132 Schumpeter 1942 reversed his earlier view by arguing that the integration of knowledge creation and appropriation bestowed an inherent innovative advantage upon giant corporations Since capitalist enterprise by its very achievements tends to automatize progress we conclude that it tends to make itself superfluous to break to pieces under the pressure of its own success

Orwell in Athens Wim B. H. J. van de Donk, I. Th. M. Snellen, P. W. Tops, 1995 Informatization is playing an increasingly important role in democratic politics For some time already various applications of Information and Communication Technologies ICT are more or less successfully used by politicians representative bodies political parties and citizens It is however reasonable to believe that informatization will be of paramount interest for existing actors and institutions that are involved in public decision making in a democracy The advent of telecommunication infrastructures that will enable the use of all kinds of

interactive facilities is considered to be an important step towards a more participative democratic system. Many projects that share a common feature have been set up with the ambition to renew democratic decision making structures and practises with the help of ICT. Most of these projects can be found at the level of local and/or regional government. In this book the claim that these projects can reform or strengthen democratic politics is explored and discussed both empirically and theoretically. The research that is presented in this book makes clear that as far as the role of informatization regarding the functioning of the democratic polity is concerned it appears that informatization represents both opportunities and threats.

Technomics H. Lee Martin, 2006-09-18 Have you ever wondered about the forces behind globalization, mass customization, just in time delivery, virtual companies and perfect information? Providing a platform to understand and navigate our rapidly advancing world. **Technomics: The Theory of Industrial Evolution** explains the relationship between technology, economy and organization.

Social Movements and Free-Market Capitalism in Latin America Sybil Rhodes, 2012-02-01 This innovative book examines how the privatization and reregulation of the telecommunications sectors in Chile, Argentina and Brazil in the 1980s and 1990s provoked the rise of new consumer protest movements in Latin America. Sybil Rhodes looks at how hasty privatization of state-owned telephone companies led to short-term economic windfalls for multinational corporations but long-term instability due to consumer movements or the threat of them. Eventually these governments implemented consumer-friendly regulation as a belated form of damage control. In contrast, governments that privatized through more gradual democratic processes were able to make credible commitments to their citizens as well as to their multinational investors by including regulatory regimes with consumer protection mechanisms built in. Rhodes illustrates how consumers, previously unacknowledged actors in studies of social movements, market reforms and democratizations in and beyond Latin America, are indispensable to understanding the political and social implications of these broad global trends.
