Technology, Policy, and Inclusion Anjal Prakash, Aarushi Jain, Puran Singh, Avik Sarkar, 2023-10-24. Technology Policy and Inclusion looks at the intersections between public policy and technology in India. It explores the barriers in instituting effective governance and development and examines how these can be mitigated through technological interventions in developing countries. Increased digitisation of the economy has added to the development challenges in India and issues such as exclusion and social inequality. This volume stresses the need for governments to leverage technology to bring more vulnerable and marginalised groups into the fold of financial and social inclusion. It also focuses on the importance of regulation for a responsible integration of technologies and minimising risks. The book includes examples and case studies from different areas including management of the COVID 19 pandemic through digital means, real estate digital infrastructure, digital census, e markets for farmers and government interventions that use technology to deliver financial services in remote areas of the country. It also outlines various solutions for fostering equity and socio economic development. Part of the Innovations Practice and the Future of Public Policy in India series, this volume will be of interest to students and researchers of public policy, political science, development studies and sociology as well as policy professionals and technocrats. This book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons CC BY NC ND 4.0 license.

Data Science and Medical Informatics in Healthcare Technologies Nguyen Thi Dieu Linh, Zhongyu (Joan) Lu, 2021-06-19. This book highlights a timely and accurate insight at the endeavour of the bioinformatics and genomics clinicians from industry and academia to address the societal needs. The contents of the book unearth the lacuna between the medication and treatment in the current preventive medicinal and pharmaceutical system. It contains chapters prepared by experts in life sciences along with data scientists for examining the circumstances of health care system for the next decade. It also highlights the automated processes for analyzing data in clinical trial research specifically for drug development. Additionally, the data science solutions provided in this book help pharmaceutical companies to improve on what had historically been a manual, costly and laborious process for cross referencing research in clinical trials on drug development while laying the groundwork for use with a full range of other drugs for the conditions ranging from tuberculosis to diabetes to heart attacks and many others.
