**E. Gualandri, V. Venturelli**

## **Technological Entrepreneurism Enterprise Formation Financing And Growth:**

**Technological Entrepreneurism** Mario W. Cardullo,1998-01-01 *OECD SME and Entrepreneurship Outlook 2005* OECD,2005-07-21 Describes recent trends concerning SMEs and entrepreneurship in OECD economies and beyond discussing innovation regulatory burdens entrepreneurship education access to financing and women s entrepreneurship Includes a statistical annex The SME Financing Gap (Vol. I) Theory and Evidence OECD,2006-10-25 Analyzes the lack of funding for small and medium sized enterprises SMEs and recommends measures to foster an improved flow of financing

*Educating Social Entrepreneurs, Volume II* Paul Miesing,Maria Aggestam,2017-07-31 Educating Social Entrepreneurs From Business Plan Formulation to Implementation appears at a time of unprecedented environmental disasters natural resources depletion and significant failure of governments and global businesses to attend to worldwide social problems In this era of downsizing restructuring and social changes notions of traditional venture creation and the ways of creating social values have been challenged We draw on examples from various parts of the business world and societies to prepare students scholars and entrepreneurial managers to deal with the challenges presented by a new and diverse business environment to create business plan for a social venture Illuminating troublesome aspects of the global social and business worlds this workbook comprises two volumes that covers key issues Students scholars and entrepreneurs who want to help a world of multiple disparities by dealing with social entrepreneurship will find this to be beneficial reading Innovation in Food Ecosystems Paola De Bernardi,Danny Azucar,2019-11-28 This book addresses the intersections of entrepreneurship innovation and sustainability in food systems and presents high quality research illustrating the central role that food consumption and production play in achieving sustainability goals Entrepreneurship and innovation have become particularly relevant aspects in the European Union EU especially since the Sustainable Development Goals SDGs were announced in 2015 In many cases innovations tend to arise from small and medium sized enterprises and from completely new entrepreneurial endeavors This book represents essential reading for researchers and young academics seeking to reduce disparities and inequalities in food production and consumptions patterns By encouraging sustainable entrepreneurship and innovation it will also help young scholars find support for their startup ideas Regional Innovation Patrick Dubarle,Yali Woyessa,2016-06-01 This book provides an excellent analysis of regional innovation policy issues and developments with a wealth of examples notably from OECD countries Key policy areas such as clusters support services and higher education institutions are well documented The research methodology is founded on the experience accumulated by the authors over several decades in many different countries in the context of a world class international organisation This allows a good selection of policy relevant examples and an experienced presentation of them Jean Eric Aubert Former programme manager World Bank and OECD *OECD SME and Entrepreneurship Outlook ,2005* *Nurturing Science-based Ventures* Ralf W. Seifert,Benoît F. Leleux,Christopher L. Tucci,2008-01-25 Few would deny that small entrepreneurial firms play an important

economic and social role Not only do they generate a significant number of jobs but they also contribute a large proportion of gross national product GNP Not all small firms qualify as entrepreneurial entities however While small refers mostly to size entrepreneurial refers to growth and a value creation orientation The vast majority of small firms have no growth aspirations nor do they have the means and skills to grow As such they may still provide employment and local value but would not embrace the high potential aspirations of entrepreneurial ventures This book clearly addresses those entrepreneurs who are interested in leading high growth potential companies

| Table 1 Growth Typology of Small Firms |                     |                  |                 |
|----------------------------------------|---------------------|------------------|-----------------|
| Type of venture                        | Desired sales range | Future employees | Lifestyle       |
| 0 to 1 million                         | 0 to 4              | Smaller          | high potential  |
| 1 million to 20 million                | 5 to 50             | High potential   | over 20 million |
| Over 50                                | High innovation     | technology based | startups        |

assume a very special role in high growth entrepreneurship Although these startups constitute a comparatively low number of small businesses they produce proportionately far more jobs than their low and medium innovation counterparts The aim of achieving rapid growth is typically referred to as high expectation entrepreneurship An area of major concern to us is a fact revealed in the latest GEM report The rate of European high expectation entrepreneurial activity is among the lowest in the world Bridging the Equity Gap for Innovative SMEs E. Gualandri, V. Venturelli, 2008-10-09 Explores the idea that Europe's growth problems may be caused by weaknesses in capital markets and in the access to risk capital It addresses the evaluation of the financial needs and constraints of start up firms and how these might be bridged The role of public sector intervention is analyzed focusing on international best practices

**OECD SME and Entrepreneurship Outlook 2005** Organisation for Economic Co-operation and Development, 2005 Small and medium sized enterprises SMEs represent over 95 per cent of businesses in most OECD countries and generate about two thirds of private sector employment This is the third edition of this publication which reviews recent trends relating to SMEs and entrepreneurship in OECD economies and beyond as well as reporting on recent policy initiatives to promote the competitiveness of the SME sector Issues covered include regulatory and administrative burdens entrepreneurship education and training SME access to financing technology innovation and international markets the growing importance of women's entrepreneurship and local policy issues This edition also includes the text of the Istanbul Ministerial Declaration on fostering the growth of innovative and internationally competitive SMEs
