Technology, Crime, and Justice M. R. McGuire, 2012-06-14 As technology comes to characterize our world in ever more comprehensive ways there are increasing questions about how the rights and wrongs of technological use can be adequately categorized To date the scope of such questions have been limited focused upon specific technologies such as the internet or bio technology with little sense of any social or historical continuities in the way technology in general has been regulated In this book for the first time the question of technology and its relation to criminal justice is approached as a whole Technology Crime and Justice analyzes a range of technologies including information communications nuclear biological transport and weapons technologies amongst many others in order to pose three interrelated questions about their affects upon criminal justice and criminal opportunity to what extent can they really be said to provide new criminal opportunity or to enhance existing ones what are the key characteristics of the ways in which such technologies have been regulated how does technology itself serve as a regulatory force both in crime control and social control more widely Technology Crime and Justice considers the implications of contemporary technology for the practice of criminal justice and relates them to key historical precedents in the way technology has been interpreted and controlled It outlines a new social way of thinking about technology in terms of its affects upon our bodies and what they can do most obviously the ways in which social life and our ability to causally interact with the world is extended in various ways It poses the question could anything like a Technomia of technology be identified a recognizable set of principles and sanctions which govern the way that it is produced and used principles also consistent with our sense of justice This book provides a key resource for students and scholars of both criminology and technology studies

Access to Information, Technology, and Justice Ursula Gorham, 2017 Over the past fifteen years the dramatic increase of online self help legal resources information and tools specifically developed for use by low income individuals without legal counsel has been promoted as one way to help those individuals who are caught in this justice gap Unfortunately however opportunities arising from the Internet and related information and communication technologies do not accrue to everyone equally as physical intellectual and social barriers to information persist Access to Information

Technology and Justice A Critical Intersection as the first ever book length examination of the use of technology to expand access to justice in the United States highlights an emerging paradox wherein the technological transformation that has created an increasing array of legal self help resources and services is also creating barriers to access for disadvantaged individuals Those who cannot read those who do not speak the English language those who are unfamiliar with the law and those with limited digital literacy skills all find themselves at a fundamental disadvantage The legal community has only begun to examine whether these resources and services are in fact meeting the needs of struggling self help users This book builds upon existing work in this area by undertaking an in depth exploration of how information and communication technologies are changing and failing to change the legal information landscape for those who most need this information Drawing upon the ongoing collaborative efforts of legal aid organizations libraries courts and non profit organizations this book provides a framework for removing barriers to equitable access to legal information with the ultimate goal of encouraging continued discussion and action
