

KKB180 Creative Futures: Assessment 2 – Augmented Poster

Task Overview

Assessment name	Augmented Poster
Description	You will design an academic poster that presents a thesis statement about an issue impacting the creative industries. Your poster will be augmented by digital creative content that further explains and demonstrates your thesis.
Due Date	Online submission You must submit: 1. Your group Augmented Poster, including link to the site hosting/exhibiting the Creative Content that constitutes the augmented component of the Poster (45%/60%) 2. Your individual documentation, including reflection on your individual contribution to collaboration to produce the Augmented (15%/60%) through Canvas by Sunday 4 th June 2023 11.59 PM
Length	500 word minimum
Weighting	60%
Individual or Group	Group with individual component
Learning outcomes measured	1. Research, investigate and analyse trends and emerging opportunities in creative sectors, disciplines, and occupations. 2. Identify and characterise ways that creative practitioners add value through interdisciplinary, socially networked, entrepreneurial creative practice. 3. Locate, evaluate, and synthesise information from a variety of sources into written communication. 4. Write and create for specific academic and creative industry applications taking into account audience, purpose, and context.

Task Instructions

Technology Assessment Creative Futures

Haydar Yalcin, Tugrul U. Daim

Technology Assessment Creative Futures:

Technology Assessment Mark A. Boroush, 1980 Technology assessment at the Second International Congress issues paradigms and practice Conjectures and reflections **Technology Assessment** Alan Thomas Roper, 1976 **Social Impact Assessment And Monitoring** Michael J Carley, Eduardo Bustelo, 2019-05-28 This systematic critical review of more than 600 recent publications in social impact assessment SIA and related fields is based on the authors belief that SIA is more than an analytical technique it is also a logical and timely response to our ever growing need for more and better information to facilitate decision making in an increasingly c **The Futures Research Directory** World Future Society, 1987-01-01 The World Future Society is an independent nonprofit scientific and educational organization concerned with how people will live in the coming decades Founded in 1966 the Society currently has over 25 000 members worldwide Individuals and groups from all nations are eligible to join the Society and participate in its programs and activities The Society publishes a number of periodicals and books sponsors local chapters and holds conferences and assemblies The publications include THE FUTURIST a bimonthly magazine reporting trends forecasts and ideas about the future FUTURE SURVEY a monthly digest of abstracts of futures relevant literature and FUTURES RESEARCH QUARTERLY a professional journal providing information on more technical future oriented topics The Society also maintains a unique bookstore that enables members to purchase future related books cassette recordings of Society conference sessions videocassettes and more all at special member prices Chapters of the World Future Society are active in both the United States and abroad Chapters offer speakers educational courses seminars and other opportunities for members in local areas to meet and work together World Future Society conferences and general assemblies provide opportunities to hear and meet many outstanding thinkers The Society s next major conference will be held in Washington B C in August 1989 **Making Babies: Biomedical Technologies, Reproductive Ethics, and Public Policy** Inmaculada de Melo-Martín, 2013-03-09 Each year roughly a million new cases of cancer appear in the US and more than 500 000 Americans die annually of premature death Although medical progress has slowed cancer mortality its incidence is increasing roughly six times faster than cancer mortality is decreasing Breast cancer in particular has been increasing about one percent each year since 1973 At least two of the factors responsible for this surge in breast cancer are women s use of medically prescribed synthetic hormones and the exposure of the entire population to chemicals such as dioxin Both exposures increase the likelihood of breast cancer Although many ethicists worry about involuntary societal imposition of chemicals such as dioxin through industrial and agricultural processes allegedly voluntary exposures also constitute both a public health problem and a biomedical ethics difficulty Physicians recommend synthetic hormones for example to women who apparently take them voluntarily In the case of in vitro fertilization doctors prescribe hormones to induce egg production and to increase the chances of reproduction for couples who are unable to have children Despite the benefits of medical technologies such as hormone stimulation and in

vitro fertilization they also carry great risks The price that childless women pay for their opportunity to have children through in vitro fertilization may be their own increased risk of diseases such as breast cancer that are hormone dependent

Integrated Impact Assessment Frederick Rossini, 2019-03-01 An outgrowth of the recognition that the varieties of impact assessment have much in common and that the common elements are a sound basis for an intellectual framework this book incorporates contributions from leading practitioners of technology environmental and social impact assessment The authors describe integrated impact assessment address **Science Policy, Ethics, and Economic Methodology** Kristin

Shrader-Frechette, 2012-12-06 If indeed scientists and technologists especially economists set much of the agenda by which the future is played out and I think they do then the student of scientific methodology and public ethics has at least three options He can embrace certain scientific methods and the value they hold for social decisionmaking much as Milton Friedman has accepted neoclassical economics Or he can condemn them regardless of their value much as Stuart Hampshire has rejected risk cost benefit analysis RCBA Finally he can critically assess these scientific methods and attempt to provide solutions to the problems he has uncovered As a philosopher of science seeking the middle path between uncritical acceptance and extremist rejection of the economic methods used in policy analysis I have tried to avoid the charge of being anti science Fred Hapgood in response to my presentation at a recent Boston Colloquium for the Philosophy of Science said that my arguments felt like a call for rejection of the methods of risk cost benefit analysis Not so as Chapter Two of this volume should make eminently clear All my criticisms are constructive ones and the flaws in economic methodology which I address are uncovered for the purpose of suggesting means of making good techniques better Likewise although I criticize the economic methodology by which many technology assessments TAs and environmental impact analyses EIAs have been used to justify public projects it is wrong to conclude that I am anti technology **Review of the Technology Assessment**

Act United States. Congress. House. Committee on Science and Technology. Subcommittee on Science, Research, and Technology, 1978 **Towards the Information Society** G. Banse, C.J. Langenbach, P. Machleidt, 2012-12-06 Information and knowledge play an increasingly important role in the implementation of public policies in particular those of the Central and Eastern European Countries They are involved in many respects in the elaboration of scientific programs They are more and more present in the political decision making process and as topic for scientific conferences They are often at the centre of international discussions on related topics for example differences in approaches to produce and apply knowledge or different responses to social function of information A major lesson of these past years applies to democracy Europeans demand more involvement in decisions that concern them This demand goes well beyond decision making For public action to be acceptable and efficient the whole process should become more democratic from the definition of the problems to the implementation and the evaluation of solutions In the context of conducting research on the consequences of scientific and technological advance the Europäische Akademie Bad Neuenahr Ahrweiler in Germany and the Academy of Science of the

Czech Republic organised a conference on the relationship between democracy participation technology assessment in February 1999 The objective of the workshop was to express and to the problems of transition from exchange various viewpoints and attitudes information society to knowledge society The great response given to the international conference underlines the need not only for Central and Eastern European Countries to take into consideration more common projects like this for the future *Future-Oriented Technology Assessment* Haydar Yalcin,Tugrul U. Daim,2024-11-13

Comprehensive resource explaining how to evaluate technologies for different purposes in any industry using four different practical approaches By identifying emerging technology and application trends through analyses of published papers and patents Future Oriented Technology Assessment offers a comprehensive view of technology assessment structured into three different practical approaches Technology Evaluation Technology Roadmapping and Technology Intelligence The first three chapters include studies which utilize technology gap analysis multiple criteria decision analysis expert assessment quantification or neural networks to evaluate or forecast technology alternatives The next four chapters use technology roadmapping which charts a comprehensive plan for implementing technology The final five chapters apply bibliometric analysis patent analysis and network analysis to identify technology trends and the leaders in the field Additional topics covered in Future Oriented Technology Assessment include Smart grid technology as an alternative to fossil fuel consumption Heat pump water heaters that reduce the cost of energy and improve energy efficiency with particular focus on research from the US and China Nanotechnology in construction in Saudi Arabia to improve heat insulation energy efficiency and tensile strength in green building designs With comprehensive practical insight into evaluating emerging technologies across different industries Future Oriented Technology Assessment is an essential read for researchers in technology and professionals in engineering and technology management along with professionals and graduate students in related disciplines and programs of study
