Telecommunications and Politics Andrew Davies,1994 This technological revolution is connected to a shift from mass production to a system of flexible production in which far flung corporate activities are being integrated into digital networks of information and control **Communication in Modern Social Ordering** Kai Eriksson, 2011-07-21 Communication in Modern Social Ordering investigates the modern history of communication in relation to the thinking of the political community in the United States By illustrating the intertwining of the technological developments in communication methods and its community building effects the different representations of society and their political implications are examined against the development of communication systems from the telegraph to the telephone to computer networks It was the telegraph that made communication a continual process thus freeing it from the rhythmical motion of the postal service and from physical transportation in general and provided both a model and a mechanism of control Using the theories of both Foucault and Heidegger to provide a lens for new investigation the author studies not the meanings of communication and its logic as such but rather the conditions and structures that allow meanings and logic to be formulated in the first place The book offers an original combination of historical analysis with an ontological discussion of the evolution of telecommunications in the U S as a phenomenon of modern social ordering The Privatisation of European **Telecommunications** Johan From, Kjell A. Eliassen, 2017-11-28 This international volume presents a comprehensive comparative study of the transformation of the European telecommunications industry from 1990 to the present The book focuses on the old incumbent operators and their dramatic change from state agencies to listed companies It analyzes the liberalization process as well as the corporatization and privatization of these companies The contributors assess the conditions for the transformations taking place the driving forces for change the effects to management the efforts of the EU during these processes and ultimately the role of the private owner Political science publications have all but excluded analysis of the newly privatized companies their contribution to the liberalization process both before and after privatization and the interplay between the national political and company levels. The book redresses this shortcoming and also features a double empirical focus in that the main national incumbents in Europe are analyzed and compared to Telenor the Norwegian former incumbent The People's Network Robert MacDougall, 2013-11-25 The Bell System dominated telecommunications in the United States and Canada for most of the twentieth century but its monopoly was not inevitable In the decades around 1900 ordinary citizens farmers doctors small town entrepreneurs established tens of thousands of independent telephone systems stringing their own wires to bring this new technology to the people Managed by opportunists and idealists alike these small businesses were motivated not only by profit but also by the promise of open communication as a weapon against monopoly capital and for protection of regional autonomy As the Bell empire grew independents fought fiercely to retain control of their local networks and companies a struggle with an emerging corporate

giant that has been almost entirely forgotten The People's Network reconstructs the story of the telephone's contentious beginnings exploring the interplay of political economy business strategy and social practice in the creation of modern North American telecommunications Drawing from government documents in the United States and Canada independent telephone journals and publications and the archives of regional Bell operating companies and their rivals Robert MacDougall locates the national debates over the meaning use and organization of the telephone industry as a turning point in the history of information networks The competing businesses represented dueling political philosophies regional versus national identity and local versus centralized power Although independent telephone companies did not win their fight with big business they fundamentally changed the way telecommunications were conceived *E-governance* Pankaj Sharma,2004 The Book Envisages The Rational Perspective On E Govenance Dealing With Major Issues In A Comprehensive Manner The Major Issues Covered Are Core Goverance Technology And Ict E Governance Initiatives In Indian States And Legal Issues

Understanding Public Management Kjell A Eliassen, Nick Sitter, 2008-02-25 A broad ranging and highly intelligent account of key recent developments internationally which skillfully updates the public management and governance literatures Ewan Ferlie Royal Holloway Public management has been radically changed and reformed this book gives students a fine introduction to these changes and to the theories dealing with them J rgen Gr nnegaard Christensen University of Aarhus An introduction and guide to the dramatic changes that have occurred in the provision of public services over the last two decades this book combines theoretical perspectives with a range of case studies from Europe North America and further afield to explain why how and with what success liberal democracies have reformed the service role of the state The book pays close attention to four major dimensions of this transition External challenges and opportunities globalisation and EU integration Reducing the role of the state Liberalisation privatisation regulation and competition policy Improving the role of the state New Public Management e Government and beyond Managing the New Public Sector organisations strategy and leadership This text is designed for undergraduate courses in public governance but it also addresses the core components of MPA programmes the parameters tools principles and theories of public sector reform

Governing Global Electronic Networks William J. Drake, Ernest J. Wilson, III, 2008-12-05 Experts analyze the global governance of electronic networks emphasizing international power dynamics and the concerns of nondominant actors The burgeoning use and transformative impact of global electronic networks are widely recognized to be defining features of contemporary world affairs Less often noted has been the increasing importance of global governance arrangements in managing the many issues raised in such networks This volume helps fill the gap by assessing some of the key international institutions pertaining to global telecommunications regulation and standardization radio frequency spectrum satellite systems trade in services electronic commerce intellectual property traditional mass media and Internet content Internet names and numbers cybercrime privacy protection and development Eschewing technocratic approaches the contributors

offer empirically rich studies of the international power dynamics shaping these institutions. They devote particular attention to the roles and concerns of nondominant stakeholders such as developing countries and civil society and find that global governance often reinforces wider power disparities between and within nation states But at the same time the contributors note governance arrangements often provide nondominant stakeholders with the policy space needed to advance their interests more effectively Each chapter concludes with a set of policy recommendations for the promotion of an open dynamic and more equitable networld order Contributors Peng Hwa Ang Jonathan D Aronson Byung il Choi Tracy Cohen Peter F Cowhey William J Drake Henry Farrell Rob Frieden Alison Gillwald Boutheina Guermazi Cees J Hamelink Ian Hosein Wolfgang Kleinwaechter Don MacLean Christopher May Milton Mueller John Richards David Souter Ernest Wilson III Jisuk Privatisation and Liberalisation in European Telecommunications Willem Hulsink, 2012-12-06 This book combines a detailed sector specific study of comparative telecommunications regimes set in the context of the EC with an extensive historical and empirical analysis of individual policy management and change as experienced by three diverse regulatory cultures namely Britain the Netherlands and France By adopting a comprehensive analytical framework based on far reaching literature the author explores a wide range of theories addressing key issues at the forefront of contemporary political and academic debate as Do nation states matter in the globalizing telecommunications industry Does the common challenge of techno global telecommunications restructuring elicit different national responses What is the significance of a single speed or multi speed Europe in implementing telecommunications governance regimes Third World Citizens and the Information Technology Revolution N. Saleh, 2010-11-22 This book challenges the widely held view that the information technology IT revolution has empowered people in the Third World Tracing the making of the global IT regime it shows that governments and corporations of the wealthy countries dominated this process systematically excluding representatives of ICTs for Global Development and Sustainability: Practice and Applications Stevn, low income countries Jacques, Van Belle, Jean-Paul, Mansilla, Eduardo Villanueva, 2010-09-30 This book unites the theoretical underpinnings and scientific methodology of an approach of deploying ICT in marginalized communities to bridge the so called digital divide This book contains case studies of Asia Africa Latin America and the Caribbean that demonstrate which approaches work and which do not in deploying public access to information sources Provided by publisher
