Early Identification of Children at Risk R.N. Emde, W.K. Frankenburg, J. Sullivan, 2013-12-01 This volume contains contributions that are interdisciplinary and international The editors believe this is an especially timely and promising

enterprise for both sources of diversity are needed for improving our abilities to identify the young child at risk and to prevent disability In terms of disciplines the volume brings together papers by health care providers such as pediatricians and public health nurses as well as educators and psychologists Each of these groups works in dissimilar settings and faces dissimilar problems Health care providers seek simple identification procedures for use in busy primary care settings psychologists emphasize well constructed research designs and educators reflect the need for early identification and education Each of these specialist groups has something to offer the other but too often each tends to limit its publications and readings to its own discipline thus failing to capitalize on a wider scope of knowledge and practice We hope that this selection of papers will allow all readers addressing the early identification of children at risk to generate a more integrated interdisciplinary perspective We also hope this volume reflects the sense of excitement that we feel from a sharing of international perspectives There is no single approach to the early identification of children at risk that is universally applicable to all countries In addition approaches within each country vary because of availability of financial and human resources and differing expectations of local communities

Childhood Social Development Harry McGurk,2022-02-22 This book provides an account of research in action and debate in progress in a selection of areas of childhood social development where significant progress is underway The chapters are written by an eminent group of British and American developmental psychologists each of whom has made primary contributions to research in the areas covered in the volume The contributors were invited to reflect upon the current scene in social developmental research and to develop their own distinctive viewpoint and contribution to the field The book addresses issues in social development from infancy to adolescence The topics examined include interactions between biological and social factors in social development sex role development the development of friendships the role of peer interaction in social and cognitive development and the influence of cultural artifacts in the social and cognitive development of children Although each chapter is concerned with a different aspect of social development there are a number of themes that recur throughout the volume One concerns the nature of social development the acquisition of social understanding and the development of social skills are not individual achievements of children reared in isolation Rather they are the outcome of social processes in which the developing child engages sometimes in an unequal partnership with experienced adults at other times in more equal partnership with peers and playmates In both cases the development change is a constructive outcome A second recurrent theme is a concern for developmental researchers to take fuller account than they may traditionally have done of the nature of the cultural settings in which social development occurs Different cultures have different customs and artifacts and these can constrain development in different ways This issue is considered throughout the book and is the specific focus of the final chapter
