Financial Performance Measures and Value Creation: the State of the Art Daniela Venanzi,2011-12-01 The choice of financial performance measures is one of the most critical challenges facing organizations The accounting based measures of financial performance have been viewed as inadequate as firms began focusing on shareholder value as the primary long term objective of the organization Hence value based metrics were devised that explicitly incorporate the cost of capital into performance calculations Despite the increasing emphasis on these value based measures no definitive evidence exists of which metric works better than others and on the extent to which any of them is superior to traditional accounting measures In this scenario the objective of this book is contributing to the ongoing dialogue on the appropriateness of different financial performance measures by providing a systematic and updated review of the major value based measures by highlighting their respective strengths and weaknesses and by comparing the main international empirical evidence on their effectiveness This book can be a powerful tool for guiding managers and graduate students in the tangled forest of the existing metrics by providing them with the quick but adequate knowledge for consistently adopting them **Major U.S. Statistical Series** Jean Slemmons Stratford,Juri Stratford,1992 A framework for understanding the flood of statistical data which pours out of the US government and for locating series that report regularly on specific topics such as population economic indicators and government finance
