suggests a masculinized militarized battleground or a settled region threatened by a brown cataclysmic flood Finally the nation scale complements the body scale but in a more contemporary and scientific way Whiteness reflects a body politic fighting the disease of cancer immigration in two ways with an imagined militaristic immune system and with hi tech aggressive operations This diseased body politic communicates whiteness and nativism about the border through discursive border symptoms and border operations that represent the intersection of immunology discourse the racial construction of the body politic and anxiety about postmodern economic transformation and its impact on national borders Pauper Management Improved: Particularly by Means of an Application of the Penopticon Principle of Construction Jeremy Bentham,1812 Ohio Medical and Surgical Journal ,1853
