Sinkyone Notes Gladys Ayer Nomland, California Indian Library Collections Project, 1935 **The Left Coast** Philip L. Fradkin, 2011-06-21 Philip L. Fradkin one of California's most acclaimed environmental historians felt drawn to the coast as soon as he arrived in California in 1960. His first book *California The Golden Coast* captured the wonder of the shoreline's natural beauty along with the controversies it engendered. In *The Left Coast* the author and his photographer son Alex Fradkin revisit some of the same places they explored together in the early 1970s. From their written and visual approaches this father-son team brings a unique generational perspective to the subject. Mixing history, geography, interviews, personal experiences, and photographs they find a wealth of stories and memorable sights in the multiplicity of landscapes defined by them as the Wild, Agricultural, Residential, Tourist, Recreational, Industrial, Military, and Political coasts. Alex Fradkin's expressive photographs add a layer of meaning, enriching the subject with their distinctive eloquence while bringing a visual dimension to his father's words. In this way the book becomes the story of a close relationship within a probing study of a varied and contested coastline.

Trust in the Land Beth Rose Middleton Manning, 2011-02-15 The Earth says God has placed me here. The Earth says that God tells me to take care of the Indians on this earth; the Earth says to the Indians that stop on the Earth, feed them right. God says feed the Indians upon the earth. Cayuse Chief Young Chief Walla Walla Council of 1855: America has always been Indian land. Historically and culturally Native Americans have had a strong appreciation for the land and what it offers. After continually struggling to hold on to their land and losing millions of acres, Native Americans still have a strong and ongoing relationship to their homelands. The land holds spiritual value and offers a way of life through fishing, farming, and hunting. It remains essential not only for subsistence but also for cultural continuity that Native Americans regain rights to land they were promised. Beth Rose Middleton examines new and innovative ideas concerning Native land conservancies, providing advice on land trusts, collaborations, and conservation groups. Increasingly, tribes are working to protect their access to culturally important lands by collaborating with Native and non-Native conservation movements. By using private conservation partnerships to reacquire lost land, tribes can ensure the health and sustainability of vital natural resources. In particular, tribal governments are using conservation easements and land trusts to reclaim rights to lost acreage. Through the use of these and other private conservation tools, tribes are able to protect or, in some cases, buy back the land that was never sold but rather was taken from them. *Trust in the Land* sets into motion a new wave of ideas concerning land conservation. This informative book will appeal to Native and non-Native individuals and organizations interested in protecting the land as well as environmentalists and government agencies.

reverberations Jeffner Allen, 1994-01-01 This is a groundbreaking work of poetry, autobiography, lesbian studies, multicultural writing, feminist philosophy, and postmodernism. Jeffner Allen achieves a crossing of borders and complex worlds often heralded in feminist theory but rarely attempted. These abundance writings are intimate chattings that celebrate collisions, transitions, unexpected

that welcome fluidity a breathing that traverse deaths and lives How to love where there may be nothing in common or this today and not that tomorrow

s known societies for cross cultural research *Projectile Technology* Heidi Knecht, 2013-06-29 Artifacts linked to projectile technologies traditionally have provided the foundations for time space systematics and cultural historic frameworks in archaeological research having to do with foragers With the shift in archaeological research objectives to processual interpretations projectile technologies continue to receive marked attention but with an emphasis on the implications of variability in such areas as design function and material as they relate to the broader questions of human adaptation The reason that this particular domain of foraging technology persists as an important focus of research I think comes in three parts A projectile technology was a crucial part of most foragers strategies for survival it was functionally specific and it generally was fabricated from durable materials likely to be detected archaeologically Being fundamental to meat acquisition and the principal source of calories projectile technologies were typically afforded greater time investment formal modification and elaboration of attributes than others Moreover such technologies tend to display greater standardization because of constraints on size morphology and weight that are inherent to the delivery system The elaboration of attributes and standardization of form gives projectile technologies time and space sensitivity that is greater than most other foraging technologies And such sensitivity is immensely valuable in archaeological research **Native Peoples A to Z** Donald Ricky, 2009-01-01 A current reference work that reflects the changing times and attitudes of and towards the indigenous peoples of all the regions of the Americas from publisher description *A bibliography of the Athapaskan languages* Richard T. Parr, 1974-01-01 This bibliography brings together the relevant materials in linguistics anthropology archaeology folklore and ethnomusicology for the Athapaskan languages It consists of approximately 5 000 entries of which one fourth have been annotated as well as maps and census illustrations Published in English **Into the Forest** Jean Hegland, 2009-12-23 NOW A MAJOR MOTION PICTURE Set in the near future *Into the Forest* is a powerfully imagined novel that focuses on the relationship between two teenage sisters living alone in their Northern California forest home Over 30 miles from the nearest town and several miles away from their nearest neighbor Nell and Eva struggle to survive as society begins to decay and collapse around them No single event precedes society's fall There is talk of a war overseas and upheaval in Congress but it still comes as a shock when the electricity runs out and gas is nowhere to be found The sisters consume the resources left in the house waiting for the power to return Their arrival into adulthood however forces them to reexamine their place in the world and their relationship to the land and each other Reminiscent of Margaret Atwood's *A Handmaid's Tale* *Into the Forest* is a mesmerizing and thought provoking novel of hope and despair set in a frighteningly plausible near future America Praise for *Into the Forest* A beautifully written and often profoundly moving novel *San Francisco Chronicle* A work of extraordinary power insight and lyricism *Into the Forest* is both an urgent warning and a passionate celebration of life and love Riane Eisler author of *The Chalice and the Blade* From the first page the sense of crisis and the lucid honest voice of the narrator pull the reader in A truly admirable addition to a genre defined by the very high standards of George Orwell's 1984 Publishers

Markstrom, 2008-01-01 *Empowerment of North American Indian Girls* is an examination of coming of age ceremonies for American Indian girls past and present featuring an in depth look at Native ideas about human development and puberty Many North American Indian cultures regard the transition from childhood to adulthood as a pivotal and potentially vulnerable phase of life and have accordingly devised coming of age rituals to affirm traditional values and community support for its members Such rituals are a positive and enabling social force in many modern Native communities whose

younger generations are wrestling with substance abuse mental health problems suicide and school dropout Developmental psychologist Carol A Markstrom reviews indigenous historical and anthropological literatures and conveys the results of her fieldwork to provide descriptive accounts of North American Indian coming of age rituals She gives special attention to the female puberty rituals in four communities Apache Navajo Lakota and Ojibwa Of particular interest is the distinctive Apache Sunrise Dance which is described and analyzed in detail Also included are American Indian feminist interpretations of menstruation and menstrual taboos the feminine in cosmology and the significance of puberty customs and rites for the development of young women **Monograph series** Statens etnografiska museum (Sweden),1953 **The History and Environmental Impacts of Hunting Deities** Richard J.
