Sites Of Vision The Discursive Construction Of Sight In The History Of Philosophy:

Sites of Vision David Michael Kleinberg-Levin, 1999 The fourteen contributors to Sites of Vision explore the hypothesis that the nature of visual perception about which philosophers talk must be explicitly recognized as a discursive construction indeed a historical construction in philosophical discourse In recent years scholars from many disciplines have become interested in the construction of the human senses in how the human environment shapes both how and what we perceive Taking a very different approach to the question of construction Sites of Vision turns to language and explores the ways in which the rhetoric of philosophy has formed the nature of vision and how in turn the rhetoric of vision has helped to shape philosophical thought The central role of vision in relation to philosophy is evident in the vocabulary of the discipline in words such as speculation observation insight and reflection in metaphors such as mirroring perspective and point of view and in methodological concepts such as reflective detachment and representation Because the history of vision is so pervasively reflected in the history of philosophy it is possible for both vision and thought to achieve a greater awareness of their genealogy through the history of philosophy The fourteen contributors to Sites of Vision explore the hypothesis that the nature of visual perception about which philosophers talk must be explicitly recognized as a discursive construction indeed a historical construction in philosophical discourse

Virginia Woolf and the Aesthetics of Vision Claudia Olk, 2014-08-19 The category of vision is significant for Modernist texts as well as for the unfolding discourse of Modernism itself Within the general Modernist fascination with the artistic and experimental possibilities of vision and perception this study looks at Virginia Woolf's novels and her critical writings and examines the relation between visibility and aesthetics An aesthetics of vision as this study argues becomes a productive principle of narrative The visual is not only pertinent to Woolf's processes of composition but her works create a kind of vision that is proper to the text itself a vision that reflects on the experience of seeing and renegotiates the relation between the reader and the text The study investigates key dimensions of aesthetic vision It addresses vision in the context of theories of aesthetic experience and identifies a semantics of seeing It analyses functions of symbolic materiality in the presentation of boundaries of perception modes of temporality and poetic potentialities In exploring the connections between vision and language it seeks to provide new perspectives for a reassessment of what occurs in Modernism's relation to vision

The Handbook of Visual Culture Ian Heywood, Barry Sandywell, 2017-04-20 Visual culture has become one of the most dynamic fields of scholarship a reflection of how the study of human culture increasingly requires distinctively visual ways of thinking and methods of analysis Bringing together leading international scholars to assess all aspects of visual culture the Handbook aims to provide a comprehensive and authoritative overview of the subject The Handbook embraces the extraordinary range of disciplines which now engage in the study of the visual film and photography television fashion visual arts digital media geography philosophy architecture material culture sociology cultural studies and art history Throughout the Handbook is responsive to the cross disciplinary

nature of many of the key questions raised in visual culture around digitization globalization cyberculture surveillance spectacle and the role of art The Handbook guides readers new to the area as well as experienced researchers into the topics issues and questions that have emerged in the study of visual culture since the start of the new millennium conveying the boldness excitement and vitality of the subject

Angels of Desire Jay Johnston, 2016-04-08 The idea that the human body consists of subtle bodies psycho spiritual essences can be found in a variety of esoteric traditions This radical form of selfhood challenges the dualisms at the heart of Western discourse mind body divine human matter spirit reason emotion I other Angels of Desire explores the aesthetics and ethics of subtle bodies What emerges is an understanding of embodiment not exclusively tied to materiality The book examines the use of subtle bodies across a range of traditions yogic tantric theosophical hermetic and sufi Angels of Desire shows the relevance of the subtle body for religion philosophy art history and contemporary feminist religious studies and theories of desire

Rethinking Disability Theory and Practice K. Lesnik-Oberstein, 2015-06-03 Drawing from work in a wide range of fields this book presents novel approaches to key debates in thinking about and defining disability Differing from other works in Critical Disability Studies it crucially demonstrates the consequences of radically rethinking the roles of language and perspective in constructing identities

After the Globe, Before the World RBJ Walker, 2010-04-05 A sustained critique of the primary traditions of both political theory and international relations theory this book provides an analysis of the relationship between claims about sovereignty and the spatiotemporal articulation of boundaries borders and limits

The Philosopher's Gaze David Michael Levin, 2023-04-28 David Michael Levin's ongoing exploration of the moral character and enlightenment potential of vision takes a new direction in The Philosopher's Gaze Levin examines texts by Descartes Husserl Wittgenstein Nietzsche Heidegger Benjamin Merleau Ponty and Levinas using our culturally dominant mode of perception and the philosophical discourse it has generated as the site for his critical reflections on the moral culture in which we are living In Levin's view all these philosophers attempted to understand one way or another the distinctive pathologies of the modern age But every one also attempted to envision if only through the faintest of traces traces of mutual recognition traces of another way of looking and seeing the prospects for a radically different lifeworld The world after all inevitably reflects back to us the character the reach and range of our vision In these provocative essays the author draws on the language of hermeneutical phenomenology and at the same time refines phenomenology itself as a method of working with our experience and thinking critically about the culture in which we live This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1999 David Michael Levin's ongoing exploration of the moral character and enlightenment potential of vision takes a new direction in The Philosopher's Gaze Levin examines texts by Descartes Husserl Wittgenstein Nietzsche

Heidegger Benjamin Merleau-Ponty *Sociability and Cosmopolitanism* David Burrow, 2015-10-06 This collection of essays expands the focus of Enlightenment studies to include countries outside the core nations of France Germany and Britain Notions of sociability and cosmopolitanism are explored as ways in which people sought to improve society **Image Ethics in Shakespeare and Spenser** J. Knapp, 2011-02-28 Focusing on works by Shakespeare and Spenser this study shows the connection between visuality and ethical action in early modern English literature The book places early modern debates about the value of visual experience into dialogue with subsequent philosophical and ethical efforts *Seeing Things* Alan Louis Ackerman, 2011-01-01 A technological revolution has changed the way we see things The storytelling media employed by Pixar Animation Studios Samuel Beckett and William Shakespeare differ greatly yet these creators share a collective fascination with the nebulous boundary between material objects and our imaginative selves How do the acts of seeing and believing remain linked Alan Ackerman charts the dynamic history of interactions between showing and knowing in *Seeing Things* a richly interdisciplinary study which illuminates changing modes of perception and modern representational media *Seeing Things* demonstrates that the airy nothings of *A Midsummer Night's Dream* the Ghost in *Hamlet* and soulless bodies in Beckett's media experiments alongside *Toy Story*'s digitally animated toys all serve to illustrate the modern problem of visualizing as *Hamlet* put it that within which passes show Ackerman carefully analyses such ghostly appearances and disappearances across cultural forms and contexts from the early modern period to the present investigating the tension between our distrust of shadows and our abiding desire to believe in invisible realities *Seeing Things* provides a fresh and surprising cultural history through theatrical verbal pictorial and cinematic representations **A Phenomenology of Attention and the Unfamiliar** Antony Fredriksson, 2022-10-10 Building on the thriving discussion on the role of attention within the phenomenological tradition from Aron Gurwitsch and Merleau-Ponty to Bernhard Waldenfels this book investigates the enigmatic role of attention as a faculty that enables change within subjective and intersubjective experience The aim of the book is to reveal some characteristics of the processes in which subjects are unmade and remade and to highlight how we are able to change our relation to an empirical world that nevertheless has unity and constancy in our perception *Dictionary of Visual Discourse* Barry Sandywell, 2016-04-22 This substantial and ambitious dictionary explores the languages and cultures of visual studies It provides the basis for understanding the foundations and motivations of current theoretical and academic discourse as well as the different forms of visual culture that have come to organize everyday life The book is firmly placed in the context of the visual turn in contemporary thought It has been designed as an interdisciplinary or transdisciplinary introduction to the vocabularies and grammars of visuality that inform thinking in the arts and humanities today It also offers insight into the philosophical frameworks which underpin the field of visual culture A central theme that runs throughout the entries is the task of moving away from a narrow understanding of visuality inherited from traditional philosophy toward a richer cultural and multi-sensorial philosophy of concrete experience The dictionary

incorporates intertextual links that encourage readers to explore connections between major themes theories and key figures in the field In addition the author s introduction provides a comprehensive and critical introduction which documents the significance of the visual turn in contemporary theory and culture It is accompanied by an extensive bibliography and further reading list As both a substantive academic contribution to this growing field and a useful reference tool this book offers a theoretical introduction to the many languages of visual discourse It will be essential reading for graduate students and scholars in visual studies the sociology of visual culture cultural and media studies philosophy art history and theory design film and communication studies

Picturing Space, Displacing Bodies Lyle Massey, 2007 In *Picturing Space Displacing Bodies* Lyle Massey argues that we can only learn how and why certain kinds of spatial representation prevailed over others by carefully considering how Renaissance artists and theorists interpreted perspective Combining detailed historical studies with broad theoretical and philosophical investigations this book challenges basic assumptions about the way early modern artists and theorists represented their relationship to the visible world and how they understood these representations By analyzing technical feats such as anamorphosis the perspectival distortion of an object to make it viewable only from a certain angle drawing machines and printed diagrams each chapter highlights the moments when perspective theorists failed to unite a singular ideal viewpoint with the artist s or viewer s viewpoint or were unsuccessful at conjoining fictive and lived space Showing how these failures were subsequently incorporated rather than rejected by perspective theorists the book presents an important reassessment of the standard view of Renaissance perspective While many scholars have maintained that perspective rationalized the relationships among optics space and painting *Picturing Space Displacing Bodies* asserts instead that Renaissance and early modern theorists often revealed a disjunction between geometrical ideals and practical applications In some cases they not only identified but also exploited these discrepancies This discussion of perspective shows that the painter s geometry did not always conform to the explicitly rational Cartesian formula that so many have assumed nor did it historically unfold according to a standard account of scientific development

Looking Through Images Emmanuel

Alloa,2021-10-05 Images have always stirred ambivalent reactions Yet whether eliciting fascinated gazes or iconoclastic repulsion from their beholders they have hardly ever been seen as true sources of knowledge They were long viewed as mere appearances placeholders for the things themselves or deceptive illusions Today the traditional critique of the spectacle has given way to an unconditional embrace of the visual However we still lack a persuasive theoretical account of how images work Emmanuel Alloa retraces the history of Western attitudes toward the visual to propose a major rethinking of images as irreplaceable agents of our everyday engagement with the world He examines how ideas of images and their powers have been constructed in Western humanities art theory and philosophy developing a novel genealogy of both visual studies and the concept of the medium Alloa reconstructs the earliest Western media theory Aristotle s concept of the diaphanous milieu of vision and the significance of its subsequent erasure in the history of science Ultimately he argues for a historically informed phenomenology of images and visual media that explains why images are not simply referential depictions windows onto the world Instead images constantly reactivate the power of appearing As media of visualization they allow things to appear that could not be visible except in and through these very material devices Eye hEar The Visual in Music Simon

Shaw-Miller,2017-07-05 Eye hEar The Visual in Music employs the concept of the visual in proximate relation to music producing a tension is it not the case that there is a gulf between painting and music between the visible and the audible One is full of colour and light yet silent one is invisible and marvellously noisy Such a belief this book argues betrays an ideological constraint on music desiccating it to sound and art to vision The starting point of this study is more hybrid and hydrating that music is never employed without numerous and complex intersections with the visual By involving the concept of synaesthesia the book evokes music s multi sensory nature stops it from sounding alone and offers music as a subject for art historians Music bleeds into art and visuality in its graphic depiction in notation in the theatre of performance its sights and sites This book looks at music in its absolute guise as a model for art at notation and the conductor as the silent visual fulcrum around which music circulates at the music and image of Erik Satie at the concert hall as white cube at the symphonic film 2001 A Space Odyssey and at the liminality of John Cage and Andy Warhol **Internet Daemons** Fenwick

McKelvey,2018-10-30 A complete history and theory of internet daemons brings these little known but very consequential programs into the spotlight We re used to talking about how tech giants like Google Facebook and Amazon rule the internet but what about daemons Ubiquitous programs that have colonized the Net s infrastructure as well as the devices we use to access it daemons are little known Fenwick McKelvey weaves together history theory and policy to give a full account of where daemons come from and how they influence our lives including their role in hot button issues like network neutrality Going back to Victorian times and the popular thought experiment Maxwell s Demon McKelvey charts how daemons evolved from concept to reality eventually blossoming into the pandaemonium of code based creatures that today orchestrates our internet Digging into real life examples like sluggish connection speeds Comcast s efforts to control peer to peer networking

and Pirate Bay's attempts to elude daemonic control and skirt copyright McKelvey shows how daemons have been central to the internet greatly influencing everyday users Internet Daemons asks important questions about how much control is being handed over to these automated autonomous programs and the consequences for transparency and oversight

The Auditory Culture Reader Michael Bull, Les Back, 2020-05-31 The first edition of The Auditory Culture Reader offered an introduction to both classical and recent work on auditory culture laying the foundations for new academic research in sound studies Today interest and research on sound thrives across disciplines such as music anthropology geography sociology and cultural studies as well as within the new interdisciplinary sphere of sound studies itself This second edition reflects on the changes to the field since the first edition and offers a vast amount of new content a user friendly organization which highlights key themes and concepts and a methodologies section which addresses practical questions for students setting out on auditory explorations All essays are accessible to non experts and encompass scholarship from leading figures in the field discussing issues relating to sound and listening from the broadest set of interdisciplinary perspectives Inspiring students and researchers attentive to sound in their work newly commissioned and classical excerpts bring urban research and ethnography alive with sensory case studies that open up a world beyond the visual This book is core reading for all courses that cover the role of sound in culture within sound studies anthropology sociology cultural studies history media studies and urban geography

Force: A Fundamental Concept of Aesthetic Anthropology Christoph Menke, 2013 This book reconceives modern aesthetics by reconstructing its genesis in the 18th century between Baumgarten's Aesthetics and Kant's Critique of Judgment Force demonstrates that aesthetics and hence modern philosophy began twice On the one hand Baumgarten's Aesthetics is organized around the new concept of the subject as a totality of faculties an agent defined by capabilities one who is able Yet an aesthetics in the Baumgartian manner as the theory of the sensible faculties of the subject at once faces a different aesthetics the aesthetics of force The latter conceives the aesthetic not as sensible cognition but as a play of expression propelled by a force that rather than being exercised like a faculty does not recognize or represent anything because it is obscure and unconscious the force of what in humanity is distinct from the subject The aesthetics of force is thus a thinking of the nature of man of aesthetic nature as distinct from the culture acquired by practice It founds an anthropology of difference between force and faculty human and subject

Media, Technology, and Literature in the Nineteenth Century Margaret Linley, 2016-04-29 Operating at the intersection where new technology meets literature this collection discovers the relationship among image sound and touch in the long nineteenth century The chapters speak to the special mixed media properties of literature while exploring the important interconnections of science technology and art at the historical moment when media was being theorized debated and scrutinized Each chapter focuses on a specific visual acoustic or haptic dimension of media while also calling attention to the relationships among the three Famous works such as Wordsworth's I wandered lonely as a cloud and Shelley's Frankenstein are discussed alongside a range of lesser known

literary scientific and pornographic writings Topics include the development of a print culture for the visually impaired the relationship between photography and narrative the kaleidoscope and modern urban experience Christmas gift books poetry painting and music as remediated forms the interface among the piano telegraph and typewriter Ernst Heinrich Weber s model of rationalized tactility and how the shift from visual to auditory telegraphic instruments amplified anxieties about the place of women in nineteenth century information networks Full of surprising insights and connections the collection offers new impetus for stimulating historical conversations and debates about nineteenth century media while also contributing fresh perspectives on new media and re mediation today
