6th International Workshop on Digital Image Processing and Computer Graphics (DIP-97) : Applications in Humanities and Social Sciences : 20-22 October 1997, Vienna, Austria International Workshop on Image Processing and Computer Optics, 1998 Proceedings of the Sixth International Workshop on Software Specification and Design, October 25-26, 1991, Como, Italy, 1991 *Progress In Image Analysis And Processing II - Proceedings Of The 6th International Conference* Virginio Cantoni, Stefano Levialdi, M Ferretti, R Negrini, R Stefanelli, 1992-06-08 This book presents reports by well known experts on the most recent research results in image coding analysis and understanding and promising applications for solving real problems in manufacturing remote sensing and biomedicine The topics covered include shape analysis and computer vision pattern recognition methods and applications parallel computer architectures for image processing and analysis human perception and use of artificial intelligence techniques for image understanding languages for image abstraction processing and retrieval vision modules and neural computation **Document Analysis Systems VI** Simone Marinai, Andreas Dengel, 2004-08-26

This volume contains papers selected for presentation at the 6th IAPR Workshop on Document Analysis Systems DAS 2004 held during September 8-10 2004 at the University of Florence Italy Several papers represent the state of the art in a broad range of traditional topics such as layout analysis applications to graphics recognition and handwritten documents Other contributions address the description of complete working systems which is one of the strengths of this workshop Some papers extend the application domains to other media like the processing of Internet documents The peculiarity of this 6th workshop was the large number of papers related to digital libraries and to the processing of historical documents a taste which frequently requires the analysis of color documents A total of 17 papers are associated with these topics whereas two years ago in DAS 2002 only a couple of papers dealt with these problems In our view there are three main reasons for this new wave in the DAS community From the scientific point of view several research fields reached a thorough knowledge of techniques and problems that can be effectively solved and this expertise can now be applied to new domains Another incentive has been provided by several research projects funded by the EC and the NSF on topics related to digital libraries
