thought of in relation to other typically more established fields Indeed one of the most valuable utilities of spatial history is its capacity to facilitate conversations across those fields Consequently it must be discussed in relation to a variety of historiographical contexts Each of these have their own intellectual genealogies institutional settings and conceptual path dependencies With this in mind this guide surveys the following areas territoriality infrastructure and borders nature environment and landscape city and home social space and political protest spaces of knowledge spatial imaginaries cartographic representations and historical GIS research
