Research on Professional Responsibility and Ethics in Accounting Cynthia Jeffrey, 2010-01-20 Presents the research and cases that focus on the professional responsibilities of accountants and how they deal with the ethical issues they face This title features articles on a broad range of important topics including professionalism social responsibility ethical judgment and accountability Taxation in Utopia Donald Morris, 2020-09-01 Taxation in Utopia explores utopian political philosophy from the neglected perspective of taxation At its core taxation is an ethical question It requires people to sacrifice for the benefit of others whether or not they also benefit themselves Donald Morris refers to this broader nonmonetary context as constructive taxation which includes restrictions on privacy and access to information constraints on marriage and child rearing and conventions restricting the proprietorship of land Morris examines this in the context of various utopian writings such as More s Utopia as well as literary treatments of these issues such as Bellamy s Looking Backward This interdisciplinary exploration of utopian taxation provides a novel approach to examining relations between a state s view of the general welfare and the sacrifices this view requires of its citizens Longing and Belonging Allison Pugh, 2009-03-04 Even as they see their wages go down and their buying power decrease many parents are still putting their kids material desires first These parents struggle with how to handle children's consumer wants which continue unabated despite the economic downturn And indeed parents and other adults continue to spend billions of dollars on children every year Why do children seem to desire so much so often so soon and why do parents capitulate so readily To determine what forces lie behind the onslaught of Nintendo Wiis and Bratz dolls Allison J Pugh spent three years observing and interviewing children and their families In Longing and Belonging Parents Children and Consumer Culture Pugh teases out the complex factors that contribute to how we buy from lunchroom conversations about Game Boys to the stark inequalities facing American children Pugh finds that children's desires stem less from striving for status or falling victim to advertising than from their yearning to join the conversation at school or in the neighborhood Most parents respond to children's need to belong by buying the particular goods and experiences that act as passports in children's social worlds because they sympathize with their children's fear of being different from their peers Even under financial constraints families prioritize children feeling normal Pugh masterfully illuminates the surprising similarities in the fears and hopes of parents and children from vastly different social contexts showing that while corporate marketing and materialism play a part in the commodification of childhood at the heart of the matter is the desire to belong The Theory of Taxation and Public Economics Louis

Kaplow, 2011 The Theory of Taxation and Public Economics presents a unified conceptual framework for analyzing taxation the first to be systematically developed in several decades An original treatment of the subject rather than a textbook synthesis the book contains new analysis that generates novel results including some that overturn long standing conventional wisdom This fresh approach should change thinking research and teaching for decades to come Building on the work of James Mirrlees Anthony Atkinson and Joseph Stiglitz and subsequent researchers and in the spirit of classics by A C Pigou William Vickrey and Richard Musgrave this book steps back from particular lines of inquiry to consider the field as a whole including the relationships among different fiscal instruments Louis Kaplow puts forward a framework that makes it possible to rigorously examine both distributive and distortionary effects of particular policies despite their complex interactions with others To do so various reforms ranging from commodity or estate and gift taxation to regulation and public goods provision are combined with a distributively offsetting adjustment to the income tax The resulting distribution neutral reform package holds much constant while leaving in play the distinctive effects of the policy instrument under consideration By applying this common methodology to disparate subjects The Theory of Taxation and Public Economics produces significant cross fertilization and yields solutions to previously intractable problems **Public Health Law and Ethics** Lawrence O.
