**Underclass** John Welshman,2013-10-10 Who are those at the bottom of society There has been much discussion in recent years on both Left and Right about the existence of an alleged underclass in both Britain and the USA It has been claimed this group lives outside the mainstream of society is characterised by crime suffers from long term unemployment and single parenthood and is alienated from its core values John Welshman shows that there have always been concerns about an underclass whether constructed as the social residuum of the 1880s the problem family of the 1950s or the cycle of deprivation of the 1970s There are marked differences between these concepts but also striking continuities Indeed a concern with an underclass has in many ways existed as long as an interest in poverty itself This book is the first to look systematically at the question providing new insights into contemporary debates about behaviour poverty and welfare reform This new edition of the pioneering text has been updated throughout and includes brand new chapters on Problem Families and New Labour as well as Troubled Families and the Coalition Government It is a seminal work for anyone interested in the social history of Britain and the Welfare State

*Realism and Sociology* Justin Cruickshank, 2007-01-24. In recent years, methodological debates in the social sciences have increasingly focused on issues relating to epistemology. Realism and Sociology makes an original contribution to the debate, charting a middle ground between postmodernism and positivism. Critics often hold that realism tries to assume some definitive account of reality. Against this, it is argued throughout the book that realism can combine a strong definition of social reality with an anti-foundational approach to knowledge. The position of realist anti-foundationalism that is argued for is developed and defended via the use of immanent critiques. These deal primarily with post-Wittgensteinian positions that seek to define knowledge and social reality in terms of rule-following practices within different forms of life and language games. Specifically, the argument engages with Rorty's neo-pragmatism and the structuration theory of Giddens. The philosophy of Popper is also drawn upon in a critically appreciative way. While the positions of Rorty and Giddens seek to deflate the claims of grand theory, albeit in different ways, they both end up with definitive claims about knowledge and reality that preclude social research. By avoiding the general deflationary approach that relies on reference to practices, realism is able to combine a strong social ontology with an anti-foundational epistemology and thus act as an underlabourer for empirical research.
