**Social Movements in Development** Staffan Lindberg, Arni Sverrisson, 2016-07-27 Nationalist movements in the South have been superseded by a plethora of different social movements This book examines these new movements and considers emerging paradigms of organization and mobilization which are related to the role movements play in economic and political development The book analyzes a number of cases and their context and discusses the implications for social movement theory The focus is on social movements among underprivileged and middle class groups and the book is global in scope

NGO Field Workers in Bangladesh Mokbul Morshed Ahmad, 2017-11-22 This title was first published in 2002 NGOs are receiving increasing international attention and resources from policy makers donors academics and others The New Policy Agenda accepts NGOs as agents for social welfare alongside the state and as fostering democracy in the Developing World Astonishingly however there have been very few studies and no books on NGO field workers This study of field workers in Bangladesh provides excellent insights into this neglected field Bangladesh is an excellent example as since independence in 1971 it has been a donor dependent country both financially and functionally and since the 1980s has concentrated this funding towards NGOs rather than to the state The book shows how field workers are seen simply as implementers carrying out directions given by their superiors and never being consulted on how best to achieve their goals The book examines four types of NGOs international national regional and small local in a number of sample locations It compares the benefits and facilities provided by each NGO to their field workers then explores the socio economic background of both field workers and their mid level managers and examines the interactions between these two groups and between field workers and their clients It also looks at the field workers personal and professional lives and problems and details their opinions on their NGO s activities and policies and on development The findings show that NGO managers and donors lack knowledge of the realities in the field and do not realise how certain policies such as their positive discrimination of women can have negative results It proposes that NGO field workers should be more active in policy making and puts forward several recommendations for changes in the management and structure of future NGOs

*Interdisciplinary* Edo Joshua Schlachet, William C.

Hedberg,2024-07-11 *Interdisciplinary Edo* brings together scholars from across the methodological spectrum to explore new approaches to innovative humanistic research on early modern Japan 1603-1868. It makes an intervention in the field by thinking across conventional disciplinary boundaries toward a holistic and cohesive approach to Japan's early modern period. By taking historical, religious, literary, and art historical analyses into account, the contributors hope to begin a new transdisciplinary conversation on political formation, social interaction, and cultural proliferation under the Great Peace of the Tokugawa regime. This book comprises 14 essays by specialists of history, literature, religious studies, and art history. Major topics include Edo-period Japan's cultural, intellectual, and economic connections to the early modern world; environmental humanities and material culture; popular culture and aesthetics; and the question of how contemporary academic demarcation lines impact the current study of Tokugawa Japan. Individual essays range in scale from individual paintings and works of prose fiction to the tectonic plates underlying the Yamashiro basin and span topics from overseas medicinal exchange and premodern cartography to the history of intoxication. *Interdisciplinary Edo* will be of immediate interest to all scholars focusing on the early modern period as well as to researchers studying other periods of Japanese studies. As part of an ongoing and inclusive process of pluralizing and deprovincializing global conceptions of early modernity, this book will contribute to historiographical interventions outside Japan studies as well. **Territoriality in the Globalizing Society** J.v.

Hagen,Stefan Immerfall,2012-12-06 Globalization is one of the buzz words in the 1990s. It points to a world in which geographic location becomes increasingly irrelevant, a vision that has aroused both hopes and fears. Surprisingly, globalization is accompanied by increasing regionalization. This volume is a timely contribution to the debate on globalization and regionalism. Coming from several disciplines, its contributors explore the consequences of a world with no geographical barriers. Refuting simple notions of globalization, they argue that location and space will remain important dimensions of economic and social development. In view of this, the book develops a more balanced view of the tension between globalization and regionalism. **Nursing Practice, Policy and Change** Marjorie Gott,2018-10-08 Many drugs requiring intravenous infusion are used in situations where precise and rapid administration are essential. A simple miscalculation can easily lead to a massive error in dose administration with disastrous medical consequences. This is the living nightmare of every sleep-deprived junior doctor. *Intravenous Infusions: A Guide To Their Calculation* contains the vital information which doctors, nurses, and pharmacists need on those occasions demanding quick decisions. It could save lives. Community Analysis and Praxis Josefina Figueira-McDonough,2001 First Published in 2001. Routledge is an imprint of Taylor & Francis, an informa company. *Community Analysis and Practice* Josefina Figueira-McDonough,2013-05-13 Concentrating on three main themes: environmental complexity; community as the target of intervention; and commitment to social justice, *Community Theory and Practice* updates and expands the current boundaries of thinking about community organization. This book is an important resource for social work students, educators, and practitioners, as well as those who work in the areas of sociology.

*Sanctuaries of the City* Anni Greve, 2016-04-01 This book proposes that we can learn from Tokyo about the intrinsic importance of in between realms to an international culture the sanctuaries It argues that certain urban societies are more robust than others because they offer socio spatial capacities that enable the development of skills for coping with modern forms of living It studies places that may open the way to an international culture namely market places venues for performing arts and religious sites which with particular reference to the Durkheimian tradition are considered here in their quality as sanctuaries From its empirical analysis of such sanctuaries in Tokyo this book develops a more general theory about mega cities urban sociability and identity

**Building a Heaven on Earth** Albert L. Park, 2014-12-31 Why and how did Korean religious groups respond to growing rural poverty social dislocation and the corrosion of culture caused by forces of modernization under strict Japanese colonial rule 1910 1945 Questions about religion s relationship and response to capitalism industrialization urbanization and secularization lie at the heart of understanding the intersection between colonialism religion and modernity in Korea Yet getting answers to these questions has been a challenge because of narrow historical investigations that fail to study religious processes in relation to political economic social and cultural developments In *Building a Heaven on Earth* Albert L Park studies the progressive drives by religious groups to contest standard conceptions of modernity and forge a heavenly kingdom on the Korean peninsula to relieve people from fierce ruptures in their everyday lives The results of his study will reconfigure the debates on colonial modernity the origins of faith based social activism in Korea and the role of religion in a modern world *Building a Heaven on Earth* in particular presents a compelling story about the determination of the Young Men s Christian Association YMCA the Presbyterian Church and the Ch ndogyo to carry out large scale rural movements to form a paradise on earth anchored in religion agriculture and a pastoral life It is a transnational story of leaders from these three groups leaning on ideas and systems from countries such as Denmark France Japan and the United States to help them reform political economic social and cultural structures in colonial Korea This book shows that these religious institutions provided discursive and material frameworks that allowed for an alternative form of modernity that featured new forms of agency social organization and the nation In so doing *Building a Heaven on Earth* repositions our understandings of modern Korean history

**Globalization on Trial** Farhang Rajaee, 2000 *Globalization on Trial* challenges the conventional view that equates globalization with the expansion of the capitalist economic system With a broad historical and holistic brush the author presents a view of globalization that is both multidisciplinary and multicultural What opportunities must we seize What dangers must we overcome Rajaee examines human governance and the paradox of globalism and nationalism or nativism providing a particularly fresh perspective on Islamic civilization He also focuses on our education system and how it will have to adapt to meet the new challenges

Fighting Back Charlie Fox, 2016-06-03 Work for the Dole is not a new idea It was introduced in Victoria in 1932 and

became one of the battlegrounds of unemployed politics The provision and administration of sustenance relief work eviction of tenants from their homes the issue of free speech these were the major issues confronting unemployed workers and their families and organisations and they fought successive governments over each one Written in a pleasingly clear and accessible style this absorbing work shows how complex unemployed politics was and situates it in the long history of agitation by unemployed workers It takes issue with the prevailing historical orthodoxy that unemployed workers in Australia during the Great Depression were introspective politically apathetic and concerned only with survival It shows that to the contrary they were active organised and remarkably successful in their aims It also shows that government unemployment relief was as much a product of this agitation as it was of government policies and preferences Yet the movement was always pulled in other direction by the hunger and poverty of its members by their need simply to survive by the disengagement that accompanies individual powerlessness and by resignation in the face of such an incomprehensible disaster That a creative often extensive and vigorous unemployed movement could exist in such circumstances in a decade of the worst poverty Australia has known is surely a tribute to the courage and resistance of the men and women who made unemployed politics Fox's book takes a complex look at the actual politics of the unemployed in the Great Depression a subject which for various reasons Hence it represents a substantial revision of the existing historiography      Ordinary Economies in Japan Tetsuo Najita, 2009-09-16 Ordinary Economies in Japan directs our attention to a subordinate yet powerful theme in modern Japanese economic thought that appeared unobtrusively in the mid Tokugawa period and found expression in the formation of voluntary non hierarchical associations of commoners who purposively organized their self help activities apart from state authority Tetsuo Najita's compelling analysis of it is groundbreaking and explains a great deal about Japanese modernization that economic historians have overlooked or undervalued Stephen Vlastos University of Iowa      Postsecular Cities Justin Beaumont, Christopher Baker, 2011-06-16 This book reflects the wide spread belief that the twenty first century is evolving in a significantly different way to the twentieth which witnessed the advance of human rationality and technological progress including urbanisation and called into question the public and cultural significance of religion In this century by contrast religion faith communities and spiritual values have returned to the centre of public life especially public policy governance and social identity Rapidly diversifying urban locations are the best places to witness the emergence of new spaces in which religions and spiritual traditions are creating both new alliances but also bifurcations with secular sectors Postsecular Cities examines how the built environment reflects these trends Recognizing that the turn to the postsecular is a contested and multifaceted trend the authors offer a vigorous open but structured dialogue between theory and practice but even more excitingly between the disciplines of human geography and theology Both disciplines reflect on this powerful but enigmatic force shaping our urban humanity This unique volume offers the first insight into these interdisciplinary and challenging debates      **Monarchies and Nations** Paul Dresch, James P. Piscatori, 2005-05-27 Despite their small populations the Arab

states of the Gulf exercise an enormous and global influence But all too often these states are treated as if their only importance were as pawns in a global strategic board game and are simply dealt with as mere models of the intersection of oil wealth and power Here Dresch and Piscatori bring together a more nuanced picture exploring how the citizen populations of these states define themselves in a wider context The Gulf provides extreme examples of the nexus of identities not only because these polities are so dependent on transnational flows of wealth and imagery but because at home the citizen workforce is often outnumbered by migrant labour Examining the issues such as Gulf owned transnational media the role of women in the Kuwaiti state and the way Saudi Arabia manages the yearly influx of pilgrims for the Hajj Monarchies and Nations is essential reading for all those interested in the society politics and the future security of the Gulf Educational Futures Ivana Milojevic,2005-05-19 This book provides an overview and analysis of current tensions debates and key issues within OECD nations particularly Australia the USA Canada and the UK with regard to where education is and should be going Using a broad historical analysis it investigates ideas and visions about the future that are increasingly evoked to support arguments about the imminent demise of the dominant modern educational model Focusing neither on prediction nor prescription this text suggests the goal is an analysis of the ways in which the notion of the future circulates in contemporary discourse Five specific discourses are explored globalisation new information and communications technologies feminist indigenous and spiritual The book demonstrates the connections between particular approaches to time visions of the future and educational visions and practices The author asserts that every approach to educational change is inherently based on an underlying image of the future **Routledge Encyclopedia of International Political Economy: Entries G-O** R. J. Barry Jones,2001 This important new work is the first comprehensive reference to the rapidly developing field of international political economy IPE Featuring over 1200 A Z entries the coverage encompasses the full range of issues concepts and institutions associated with IPE in its various forms Comprehensively cross referenced and indexed each entry provides suggestions for further reading along with guides to more specialized sources Selected entries include African Development Bank benign neglect Black Monday casino capitalism debt management efficiency floating exchange rates General Agreement on Tariffs and Trade GATT information society economy Organization of Petroleum Exporting Countries OPEC Microsoft multinational corporations definitions NATO patents rent seeking Schellin Thomas tax havens trusts Value Added Tax VAT zero sum games and many more **Newly Emerging Needs of Children** N.
