DEFINITION

Social cognition refers to the processes by which people think about and interpret themselves, others, and the social world. It encompasses how individuals perceive social stimuli, the inferences they make about these stimuli, and how these perceptions influence behavior.

EXAMPLES

- **Stereotyping:** Based on limited information, individuals might categorize others into groups and make broad generalizations about their characteristics.

and the Group Tom Postmes, Jolanda Jetten, 2006-04-25 Social identity research has transformed psychology and the social sciences Developed around intergroup relations perspectives on social identity have now been applied fruitfully to a diverse array of topics and domains including health organizations and management culture politics and group dynamics In many of these new areas the focus has been on groups but also very much on the autonomous individual This has been an exciting development and has prompted a rethinking of the relationship between personal identity and social identity the issue of individuality in the group This book brings together an international selection of prominent researchers at the forefront of this development They reflect on this issue of individuality in the group and on how thinking about social identity has changed Together these chapters chart a key development in the field how social identity perspectives inform understanding of cohesion unity and collective action but also how they help us understand individuality agency autonomy disagreement and diversity within groups This text is valuable to advanced undergraduate and postgraduate students studying social psychology where intergroup relations and group processes are a central component Given its wider reach however it will also be of interest to those in cognate disciplines where social identity perspectives have application potential Social

Identities Rupert Brown, Dora Capozza, 2016-07-22 The concept of social identity occupies a central position in contemporary social psychology *Social Identities Motivational Emotional Cultural Influences* reports recent developments in the analysis of motivational and affective aspects of social identity processes The book also examines the cross cultural generality of Social Identity Theory explanations of intergroup competitiveness which have strongly influenced international research in this area People's social identities and self evaluation are thought to be largely derived from group memberships it is presumed that people are motivated to attain positivity in these identities by favouring the ingroup in intergroup comparisons An increasing

stream of research is being devoted to extending the applicability of social identity concepts to intergroup relations and related fields. The editors present here a collection of contributions from leading figures in social psychology which explore the state of the art in social identity theory. The most prominent motivational theories of identification are reported. Central themes concern motivations which lead individuals to join a group and identify with it, the role emotions have in favouring or hindering intergroup relations, the effect of emotions on intergroup behaviour, how people react to social identity threats. Shedding new light on important social problems like prejudice, bigotry and intense conflicts around the world, this unique volume will be indispensable to students and researchers of social psychology, sociology and cultural studies.

Social Identifications Dominic Abrams, Michael A. Hogg, 2006-06-07 The authors of *Social Identifications* set out to make accessible to students of social psychology the social identity approach developed by Henri Tajfel, John Turner and their colleagues in Bristol during the 1970s and 1980s. Michael Hogg and Dominic Abrams give a comprehensive and readable account of social identity theory as well as setting it in the context of other approaches and perspectives in the psychology of intergroup relations. They look at the way people derive their identity from the social groups to which they belong and the consequences for their feelings, thoughts and behaviour of psychologically belonging to a group. They go on to examine the relationship between the individual and society in the context of a discussion of discrimination, stereotyping and intergroup relations, conformity and social influence, cohesiveness and intragroup solidarity, language and ethnic group relations and collective behaviour. *Social Identifications* fills a gap in the literature available to students of social psychology. The authors' presentation of social identity theory in a complete and integrated form and the extensive references and suggestions for further reading they provide will make this an essential source book for social psychologists and other social scientists looking at group behaviour.

Social Identity Processes in Organizational Contexts Michael A. Hogg, Deborah J.

This book is an integrative platform for a closer relationship between social psychologists and organizational psychologists who study social identity processes in organizations.
