absolute but rather cross cut by a range of other concerns too Nonetheless recent political developments serve to illustrate the political potency of appeals to whiteness in a way that suggests whiteness coupled with nationhood is a central social and political topic In this book authors from the USA Australia and Europe consider the contemporary relationships between whiteness and national identity by focusing on mainstream electoral politics the normalisation of white supremacy and where whiteness stands in relation to pluralised national identities The chapters in this book were originally published as a special issue of the journal *Identities Global Studies in Culture and Power*
