perspective on value in the context of the sociolinguistics and political economy of English as a global language and as an apparent commodified entity The problematic issues of value as they apply to language are dealt with from Marxist and Bourdieusean perspectives The book also offers a helpful critique of the claims of alternative paradigms of English expansion such as ELF and their shortcomings in respect of the concept of value Manuela Vida Mannl puts forth a critique of the marketization of English and the complicity of higher education in the reproduction of linguistic hierarchies and social inequalities in Cyprus and by implication more generally She presents a conception of English as a marketable attribute that does not necessarily require competence which points to the ongoing imbrication of English in the reproduction of global structural and social inequality as it exposes the myth of class advancement through English Building on an extensive study based on 205 questionnaires and 25 subsequent in depth ethnographic interviews and by focusing on the value of English within the unique context of divided Cyprus this book uncovers an intriguing perspective on the neoliberal role and significance of the English language in our globalized world *The Oxford History of Phonology* Bezael Elan Drescher, Harry van der Hulst, 2022 This volume is the first to provide an up to date and comprehensive history of phonology spanning the history of phonological thought from Panini to the latest advances in computational modelling and learning This in depth exploration provides new perspectives on where phonology has been and sheds light on where it could go next

Centre international de recherches sur le bilinguisme, 1982 [English in Cyprus or Cyprus English](#) Sarah Buschfeld, 2013-06-12 This volume provides the first ever comprehensive analysis of a potential variety of English spoken in the Greek part of the Mediterranean island of Cyprus Despite the fact that Cyprus was a British colony from 1878 to 1960 the

status of the English language spoken there has not yet been discussed systematically within the framework of World Englishes To determine whether English in Cyprus has second language variety status or should rather be considered as learner English the monograph investigates its historical sociopolitical and sociolinguistic background and drawing on a corpus of spoken data offers a synchronic analysis of linguistic features The results suggest to rethink some of the well established taxonomies of World Englishes research especially those that strictly differentiate between second language varieties and learner Englishes This renders the book relevant not only to scholars working in the field of World Englishes but also to second language acquisition researchers

Salience in Sociolinguistics Péter Rácz, 2013-10-14 This work proposes a definition of the notion of salience in sociolinguistics Salient linguistic variants are those that are easily picked up by the listeners and these stand in opposition to invisible variants which are even if they also show complex social stratification completely ignored Taking a quantitative angle this work sees salience as a function of relative frequency differences giving it an empirically testable operationalisation
