The authors conduct a broad survey of freedom of speech around the world from Europe over Russia and both Americas to Africa, Asia and Australia. The aim of this survey is to identify safeguards of freedom of speech on both a national and an international level, violations and threat scenarios and in particular challenges to freedom of speech in the digital era. **American History from a**

Global Perspective David Russo, 2000-03-30 This study is the first interpretive text for the study of American exceptionalism and the first overall assessment of geographic, political, economic, social and cultural aspects of the American past written from a global perspective. Russo argues that life in the United States can be better understood if it is examined from either a wider perspective, the English speaking world, the Western Hemisphere, Western Civilization, or a narrower perspective, regional and local variations. Even when the Americans were innovative in their multi ethnic and multi racial society in their egalitarian social beliefs in their political democracy, their innovations were soon copied by others. Therefore Russo argues they are no longer distinctly American. Using nations as the basis for fields of study can both reveal and distort the historical record. When one considers different perspectives, America's uniqueness recedes in importance. American culture was a variant of a wider Western culture. The American economy was an extension of Western capitalism, whether agrarian, commercial or industrial. American society was a Western society with racial castes and multi ethnic additions to the population. American government functioned like other Western governments even with innovative forms. Republican then democratic. The American past is thus seen to be far less distinctive than previous syntheses have assumed. **Social Work**
